e-Exam Manage Questions for Advanced Java Programming (17625) for topic 1 Go Back to Subjects

Question Edited Successfully

Q No	Question	To pic	Fig ure	Q Type	Mar ks	Answer
1	JPanel and Applet use _____ as their default layout	1	N	R	1	FlowLayout
2	Which are various AWT controls from following?	1	N	R	1	Labels, Push buttons, Check boxes, Choice lists.
3	Which of the following component class cannot be add on applet	1	N	R	1	Menu
4	A checkbox is a control that consists of a _____	1	N	R	1	Combination of a small box and a Label
5	A Frame's _____ designates the area of the frame excluding the title,menu bar and the border.	1	N	R	1	ContentPane
6	A GUI stands for _____.	1	N	R	1	stands for Graphical User Interface
7	A JCheckBoxMenuItem is a subclass of _____.	1	N	R	1	All of these
8	A label is a simple control which is used to display _____ on the window	1	N	R	1	Text(non-editable)
9	A ScrollPane is _____	1	N	R	1	Container
10	A superclass of Textfield and TextArea classes that is used to create single-line , multiline textfields respectively is_____.	1	N	R	1	Textcomponent
11	A _____ is a component that appears as a group of folders in a file cabinet.	1	N	R	1	JTabbedPane
12	A _____ automatically arranges the components added to a container.	1	N	R	1	Layout Manager
13	A _____ is a passive AWT control which do not generate any event.	1	N	R	1	Label
14	A _____ component is a display area for a short string of text, image or both.	1	N	R	1	Jlabel
15	All Component on Container can be removed by calling following method	1	N	R	1	removeAll()
16	All swing component classes are placed in	1	N	R	1	javax.swing
17	An Applet is _____ of Panel	1	N	R	1	subclass
18	Applet Container is used to prepare _____ output window.	1	N	R	1	Both a and b
19	AppletViewer tool is available in which of the folder of JDK	1	N	R	1	bin
	Arranges the components as a deck of cards such that only one					

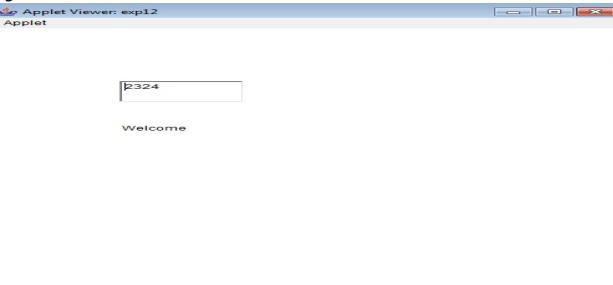

20	component is visible at a time	1	N	R	1	CardLayout
21	At the top of the AWT hierarchy is the _____ class.	1	N	R	1	Component
22	AWT classes are contained in the _____ package	1	N	R	1	java.awt
23	AWT is used for creating a GUI in Java. AWT stands for	1	N	R	1	Abstract Window Toolkit
24	AWTEvent Class is define in following package	1	N	R	1	java.awt
25	A _____ is Componenet that represents a hierarchical view of data	1	N	R	1	Jtree
26	A _____ is component that presents a rectangular area in which a component may be viewed	1	N	R	1	ScrollPane
27	Border Layout is divided into _____ regions	1	N	R	1	five
28	BorderLayout class has _____ regions to add components to it	1	N	R	1	Five
29	By default flowlayout uses _____ justification.	1	N	R	1	Center
30	By default page-up and page-down increment of scrollbar is _____.	1	N	R	1	10
31	By default the Frame has a _____	1	N	R	1	Titlebar,borders,resizing corners
32	By default which layout manager is set on applet	1	N	R	1	FlowLayout
33	By which method You can set or change the text in a Label?	1	N	R	1	setText()
34	Canvas is a _____	1	N	R	1	Window
35	Checkable menu items are created using object of .....class.	1	N	R	1	CheckboxMenuItem
36	Choose the incorrect statement	1	N	R	1	BorderLayout b = new BorderLayout(3,4);
37	Combobox is a combination of _____	1	N	R	1	TextField and Dropdown List
38	Components are added to which pane of swing JApplet .	1	N	R	1	ContentPane
39	constructors of Jseparator are	1	N	R	1	both i and ii
40	Container is the sub class of?	1	N	R	1	Component
41	Control not support by awt are	1	N	R	1	TabbedPane,Table
42	Current text of label can be obtained using _____.	1	N	R	1	getText ()
43	Deafult layout manager for Frame is _____.	1	N	R	1	BorderLayout
44	Default layout manager for panel is	1	N	R	1	FlowLayout
45	Default layout manager for Window is	1	N	R	1	Borderlayout
46	Default Layout of Frame	1	N	R	1	BorderLayout
47	Default orientation of progress bar is:	1	N	R	1	Horizontal
48	Double-buffering built in, tool tips, dockable tool bars, keyboard accelerators, custom cursors, etc. are new features of _____?	1	N	R	1	Swing
49	Each menu is associated with a _____ list of menu items	1	N	R	1	Drop-down
50	Every layout manager is an instance of _____.	1	N	R	1	the LayoutManager interface
51	Executable applet is nothing but _____ file of applet	1	N	R	1	.class

52	FileDialog is which kind of dialog box?	1	N	R	1	Modaltype
53	FlowLayout arranges components from	1	N	R	1	Left to Right
54	FlowLayout does not support this value of alignment...	1	N	R	1	FlowLayout.BASELINE
55	Font class is available in _____	1	N	R	1	java.awt package
56	For adding controls to a window, we use following method	1	N	R	1	add()
57	for using Swing control one must import _____ pacakge	1	N	R	1	import javax.swing.*
58	Frame is a standard window,which is _____ of Window class from AWT hierarchy	1	N	R	1	sub class
59	getContentPane() method of which class	1	N	R	1	JApplet
60	getSelectedCheckbox() mehod of which class	1	N	R	1	CheckboxGroup
61	How can the Checkbox class be used to create a radio button in AWT?	1	N	R	1	By associating Checkbox objects with a CheckboxGroup
62	How do you change the current layout managers for a container?	1	N	R	1	Use the setLayout() method
63	How many checkboxes we can check at a time:	1	N	R	1	multiple
64	How To Apply Image To Button ?	1	N	R	1	Using ImageIcon
65	How would you set the color of a graphics context called g to cyan?	1	N	R	1	g.setColor(Color.cyan);
66	Identify the correct constructor of Font class?	1	N	R	1	Font( String name, int fontstyle,int pointsize)
67	Identify wrong constructor of Checkbox	1	N	R	1	None of Above
68	In applet, which of the following tag is used for accepting user defined parameter?	1	N	R	1	Param
69	In AWT Checkbox class is used to create _____	1	N	R	1	Checkbox and Radio buttons
70	In AWT Radio buttons are created using_____	1	N	R	1	CheckBoxGroup
71	In FlowLayout manager the default space between each component is	1	N	R	1	5 Pixel
72	In Graphics class Which method is used to set the graphics current color to the specified color?	1	N	R	1	public abstract void setColor(Color c)
73	In how many ways we can define the scrollbar?	1	N	R	1	All of the above
74	In Swing Buttons are the subclasses of which class?	1	N	R	1	AbstractButton
75	In Swing the content pane can be obtained via method_____	1	N	R	1	getContentPane()
76	In Swing _____ is a component that displays rows and columns of data.	1	N	R	1	table
77	In Swing, tables are implemented by the _____ class	1	N	R	1	JTable
78	Indentify which is a valid constructor of MenuItem class?	1	N	R	1	MenuItem(String Itemname)
79	Items are added in JComboBox using method.....?	1	N	R	1	addItem()
80	JApplet class is Derived form	1	N	R	1	Applet
81	Java supports input/output of data through the classes included in the _____ package:	1	N	R	1	Java.io
82	JCheckBox is _____ Component	1	N	R	1	lightweight

83	JRadioButton is a subclass of _____.	1	N	R	1	AbstractButton
84	JTabbedPane class is present in which package?	1	N	R	1	javax.swing
85	Jtree class comes under which package	1	N	R	1	javax.swing
86	List can be created for multiple selection by using following constructor.	1	N	R	1	List(int num,boolean multiselect)
87	Model is the _____ of the MVC architecture.	1	N	R	1	bottom most level
88	mouse click will always generate _____ event?	1	N	R	1	MouseEvent
89	MutableTreeNode is extends_____ interface	1	N	R	1	TreeNode
90	MVC Architecture is	1	N	R	1	Model-View-Controller
91	Name the class used to represent a GUI application window, which is optionally resizable and can have a title bar, an icon, and menus	1	N	R	1	Frame
92	On which side applet always executed?	1	N	R	1	Client side
93	Package of drawString() method is	1	N	R	1	java.awt
94	Panel is defined as	1	N	R	1	All of above
95	Panel is used for _____ components	1	N	R	1	Grouping
96	Pluggable Look & Feel is the feature of	1	N	R	1	Swing
97	Positions the componenets into five regions:east,west,north,south,center	1	N	R	1	BorderLayout
98	Program which executes applet is known as_____	1	N	R	1	Appletviewer
99	public class MenuBar extends _____	1	N	R	1	MenuComponent
100	Scrollbar( ) creates a _____ scroll bar by default.	1	N	R	1	Vertical
101	Select the proper constructor of FileDialog	1	N	R	1	FileDialog(Frame parent, String boxName)
102	Select the proper syntax to addcomponent in an applet	1	N	R	1	Component add(Component comoObj)
103	setBorder() method is used to set a border for _____?	1	N	R	1	Jcomponent
104	setMenuBar() method of which class	1	N	R	1	Frame
105	State true or false i) AWT is an extended version of swing ii) Paint( ) of Applet class cannot be overridden	1	N	R	1	i-false, ii-false
106	Swing components are	1	N	R	1	lightweight and platform independent
107	swing is the set of _____ that provides more powerful & flexible components as compare to AWT.	1	N	R	1	Classes
108	Text field usually called as	1	N	R	1	edit control
109	TextField class is used for_____	1	N	R	1	Single-Line text-entry area
110	The Applet class is in .....package	1	N	R	1	java.applet
111	The AWT container is an instance of the _____ class which holds various components and other containers	1	N	R	1	Container
112	The CardLayout class defines the following constructors:	1	N	R	1	CardLayout() // First Cardlayout(int hor, int ver) //second
113	The CardLayout class manages the components in such a manner that	1	N	R	1	Only one

	component is visible at a time					
114	The concept of the menu bar canbe implemented by using three java classes—	1	N	R	1	All of these
115	The coordinate of the upper-left corner of a frame is _____.	1	N	R	1	(0, 0)
116	The correct hierarchy for panel is	1	N	R	1	Component-Container-Panel
117	The default layout manager for the content pane of a swing based applet is	1	N	R	1	Border-Layout
118	The following specifies the advantages of It is lightweight. It supports pluggable look and feel. It follows MVC (Model View Controller) architecture.	1	N	R	1	Swing
119	The method drawRect() is used to display an _____	1	N	R	1	outlined rectangle
120	The method setLabel can be used with what type of Object ?	1	N	R	1	TextField.
121	The method _____ gets the text of the button jtb is	1	N	R	1	jtb.getText( )
122	the method _____ places a menu mu into a menu bar mb.	1	N	R	1	mb.add(mu)
123	The method _____ sets the foreground color to yellow in Jframe	1	N	R	1	f.setForeground (Color.YELLOW)
124	The method _____ creates a IconImage for file c:\image\us.gif	1	N	R	1	new ImageIcon("c:\image\us.gif");
125	The method _____ gets the text (or caption) of the label jlbl	1	N	R	1	jlbl.getText()
126	The setBackground() method is part of the following class in java.awt package:	1	N	R	1	Component
127	The string parameter to the JButton constructor	1	N	R	1	tells what text will appear on the button
128	The Swing component classes that are used in encapsulate a mutually exclusive set of buttons are?	1	N	R	1	ButtonGroup
129	The syntax for drawRect() method is	1	N	R	1	drawRect(int top, int left, int width, int height)
130	The TextArea controls create a _____ respectively.	1	N	R	1	Multi-line text
131	the various Control Supported by AWT are	1	N	R	1	All of these
132	The various controls supported by swing are:	1	N	R	1	all of the above
133	The _____ arranges components in rows and columns and makes all components the same size.	1	N	R	1	GridLayout manager
134	The _____ interface is used to handle button events:	1	N	R	1	ActionListener
135	The _____ class is used to create radio button in AWT	1	N	R	1	CheckboxGroup
136	The _____ Can be used to enter or display a string	1	N	R	1	textfield
137	These four methods commonly used in? 1)public void add(Component c) 2)public void setSize(int width,int height) 3)public void setLayout(LayoutManager m) 4)public void setVisible(boolean)	1	N	R	1	Component class
138	To create window with title bar which of the following class is used?	1	N	R	1	Frame
139	To create file dialog box _____ class is used	1	N	R	1	FileDialog

140	To display text on the applet _____ method is used.	1	N	R	1	drawString()
141	To draw a line in applet, we use following method	1	N	R	1	drawLine()
142	To fetch caption of button _____ method is used.	1	N	R	1	getLabel( )
143	To retrieve the current state of a check box,call _____	1	N	R	1	getState()
144	To set title to the frame window _____ method is used.	1	N	R	1	void setTitle(String str)
145	We can add menus to _____	1	N	R	1	Frames
146	What are controls or components?	1	N	R	1	Controls or components allow users to interact with application
147	What are the TextComponent ?	1	N	R	1	TextField , TextArea
148	What Are The Types of Dialogbox ?	1	N	R	1	modal and Modeless Dialogbox
149	What are the variables defined in Dimension	1	N	R	1	height and width
150	What Checkbox method allows you to tell if a Checkbox is checked?	1	N	R	1	getState()
151	What does the following line of code do? TextField text = new TextField(10);	1	N	R	1	Creates text object that can hold 10 columns of text.
152	What is API	1	N	R	1	Application Programming Interface
153	What is default alignment of components using FlowLayout	1	N	R	1	FlowLayout.CENTER
154	what is default layout manager for panels and applets	1	N	R	1	FlowLayout
155	What is the default layout for a dialog?	1	N	R	1	BorderLayout
156	What is the difference between a TextArea and a TextField?	1	N	R	1	A TextArea can handle multiple lines of text
157	What is the minimum and maximum of JProgressBar	1	N	R	1	minimum -0 Maximum -100
158	What is the use of following method in JDialog? Container getContentPane()	1	N	R	1	This method returns,a Content Pane for the JDialog.
159	What is use of 3rd parameter in given constructor Scrollbar(int,int,int,int)	1	N	R	1	Thumbsize
160	What is use of second parameter in given constructor Label(String,int)	1	N	R	1	sepcifies the alignment of text in label in terms of pixel
161	what layout manager should you use so that every component occupies the same size in the container?	1	N	R	1	GridLayout
162	What letter precedes Swing component names that have a corresponding AWT component?	1	N	R	1	J
163	What method is used to prevent a user from changing the size of a Frame() object?	1	N	R	1	setResizable( false )
164	What methods are used to get and set the text label displayed by a Button object?	1	N	R	1	getLabel( ) and setLabel( )
165	When DialogBox is closed which method gets called	1	N	R	1	dispose()
166	When layout manager is disabled , which method is used to determine the shape and position of Component?	1	N	R	1	setBounds
167	When we invoke repaint() for a java.awt.Component object, the AWT invokes the method:	1	N	R	1	update()

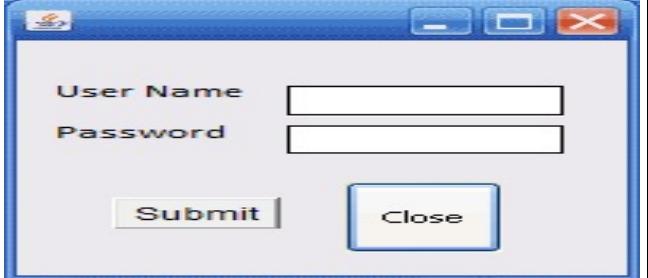

168	which method is used to set the visibility of the frame?	1	N	R	1	1.setVisible(true)
169	which package we need to import while writing swing JRadioButton class	1	N	R	1	import javax.swing.*;
170	Which abstract class is the super class of all menu related classes.	1	N	R	1	MenuComponent
171	Which Among the below is not an AWT class	1	N	R	1	RadioButton
172	Which are the Alignment Constant of Label ?	1	N	R	1	All The Above
173	Which are the subclasses of the container class?	1	N	R	1	Windows,Panel,ScrollPane.
174	Which AWT component is not editable?	1	N	R	1	Label
175	Which AWT control is used for multi-line text entry?	1	N	R	1	TextArea
176	Which class can be used to represent a checkbox with a textual label that can appear in a menu.	1	N	R	1	CheckboxMenuItem
177	Which class creates a node in Jtree?	1	N	R	1	DefaultMutableTreeNode
178	Which class defines the setSize( ) method ?	1	N	R	1	Frame
179	Which class encapsulates a blank window upon which we can draw?	1	N	R	1	Canvas
180	Which class is on the top of the AWT event hierarchy?	1	N	R	1	java.awt.AWTEvent
181	Which class is used to create a pop-up list of items from which the user may choose?	1	N	R	1	Choice
182	Which Class is used to get dimension of an Applet?	1	N	R	1	Dimension
183	Which class is used to represent a single line textbox with password character facility?	1	N	R	1	TextField
184	Which class provides many methods for graphics programming?	1	N	R	1	java.awt.Graphics
185	Which component cannot be added to a container?	1	N	R	1	JFrame
186	Which component displays information in hierarchical manner with parent-child relationship?	1	N	R	1	JTree
187	Which component in swing represents data in rows and columns?	1	N	R	1	JTable
188	Which Component of AWT provides a compact, multichoice , scrolling selection?	1	N	R	1	List
189	Which components are needed to get following shown output Figure:- 	1	Y1	R	1	Label,TextField
190	which Container use a Border Layout as their default layout?	1	N	R	1	All of the above

191	Which containers may have a MenuBar?	1	N	R	1	Frame
192	Which control is not contain in AWT Package ?	1	N	R	1	ScrollPane
193	Which constructor creates a TextArea with 10 rows and 20 columns ?	1	N	R	1	new TextArea(10 , 20 )
194	Which is Controll in swing a combination of a text field and a dropdown list	1	N	R	1	JComboBox
195	Which is correct method for adding button component into North region of border layout? Assume b1 as button object .	1	N	R	1	add(b1, BorderLayout.NORTH)
196	which is default layout Manager for Japplet?	1	N	R	1	BorderLayout
197	Which is immediate super class for TextField?	1	N	R	1	TextComponent
198	Which is the a constructor of JTabbed Pane	1	N	R	1	Both option A and B
199	Which is the correct constructor for JProgressBar	1	N	R	1	All of the above
200	Which is the correct constructor of GridLayout	1	N	R	1	GridLayout(int numrows, int numcols)
201	Which is the immediate super class of Applet?	1	N	R	1	Panel
202	Which is the method is used to count the number of items in the list	1	N	R	1	getItemCount()
203	Which is true about swing?	1	N	R	1	All the above
204	Which is various methods of TextField control from following?	1	N	R	1	getText(),setText(),setEchoChar()
205	Which layout arranges the components as a deck of cards such that only one component is visible at a time	1	N	R	1	CardLayout
206	Which layout should you use to organize the components of a container in a tabular form?	1	N	R	1	GridLayout
207	Which method executes only once	1	N	R	1	init() method
208	Which method gets the text associated with Label object jlbl?	1	N	R	1	jlbl.getText()
209	Which method Is used to add items to JComboBox	1	N	R	1	addItem()
210	Which method is used to add tabs to a JTabbedPane?	1	N	R	1	addTab()
211	Which method is used to change size and position of Components?	1	N	R	1	void setBounds(int x,int y,int width,int height)
212	Which method is used to change the name of a menu item	1	N	R	1	void setLabel(String newName)
213	Which method is used to close a swing frame?	1	N	R	1	setDefaultCloseOperation()
214	Which method is used to display Label on checkbox?	1	N	R	1	String getLabel()
215	Which method is used to set label for Button B ?	1	N	R	1	B.setLabel(String s)
216	Which method is used to set the dimensions of the window.	1	N	R	1	void setSize(int newWidth, int newHeight)
217	Which method is used to set the layout of the Applet?	1	N	R	1	setLayout();
218	Which method sets the size and position of a component	1	N	R	1	setBounds()
219	Which method will cause a Frame to be displayed?	1	N	R	1	setVisible( true)
220	Which object can be constructed to show and select any number of choices in the visible window?	1	N	R	1	List
221	Which of the following applet tags is legal to embed an applet class named Test into a Web page?	1	N	R	1	&lt; applet code = Test.class width = 200 height = 100&gt;&lt;/applet&gt;

222	Which of the following are not swing component?	1	N	R	1	both a & b
223	Which of the following are passed as an argument to the paint( ) method?	1	N	R	1	A Graphics object
224	Which of the following are subclasses of Container Class?	1	N	R	1	ScrollPane,Vector,String
225	Which of the following are subclasses of java.awt.Component?	1	N	R	1	Container
226	Which of the following are true?	1	N	R	1	Panel extends Container.
227	which of the following class is Derived from Container Class?	1	N	R	1	Panel
228	Which of the following class act as a super class in class hierarchy?	1	N	R	1	Component
229	Which of the following components allow multiple selections?	1	N	R	1	List
230	Which of the following components does not have visible borders?	1	N	R	1	Panel
231	Which of the following contain a Menubar?	1	N	R	1	A Frame
232	Which of the following controls does not support interaction with user?	1	N	R	1	Label
233	Which of the following creates a List with 5 visible items and multiple selection enabled?	1	N	R	1	new List(5, true)
234	which of the following is not a AWT control.	1	N	R	1	ButtonGroup
235	Which of the following is not a constructor of JTree	1	N	R	1	JTree(int x)
236	Which of the following is not a swing class?	1	N	R	1	Canvas
237	Which of the following is not active control	1	N	R	1	labels
238	Which of the following is not an AWT component	1	N	R	1	Applet
239	Which of the following is not true about Dialog Boxes?	1	N	R	1	Dialog boxes contains menu bars.
240	Which of the following is not true about Swing Components?	1	N	R	1	Heavy weight components
241	Which of the following is not valid alignment constant for Label?	1	N	R	1	MIDDLE
242	Which of the following is not valid constructor for JCheckBox?	1	N	R	1	JCheckBox(String text, boolean selected, CheckboxGroup group)
243	Which of the following is not valid style constant for Font?	1	N	R	1	NORMAL
244	Which of the following is passive AWT control?	1	N	R	1	Label
245	Which of the following is the immediate superclass of the MenuComponent class?	1	N	R	1	Object
246	Which of the following is true about AWT and Swing Component?	1	N	R	1	AWT Components create a process where as Swing Component create a thread
247	Which of the following is used to interpret and execute Java Applet Classes hosted by HTML ?	1	N	R	1	Appletviewer
248	Which of the following layout managers need to create a Panel?	1	N	R	1	CardLayout
249	Which of the following may a menu contain?	1	N	R	1	menu
250	Which of the following may contain a menu bar?	1	N	R	1	frame
251	Which of the following method is use to add a button "b" to the south of the applet using BorderLayout?	1	N	R	1	add(b,BorderLayout.SOUTH);
252	Which of the following method is used to change the Label caption?	1	N	R	1	setText(String s)

253	Which of the following method is used to retrive icon of JButton	1	N	R	1	Icon getIcon()
254	Which of the following methods are invoked by the AWT to support paint and repaint operations?	1	N	R	1	repaint( )
255	Which of the following methods can be used to change the size of a java.awt.Component object?	1	N	R	1	setSize()
256	Which of the following methods can be used to remove java.awt component object from display?	1	N	R	1	remove()
257	Which of the following statements about GUI components is wrong ?	1	N	R	1	The AWT classes are deprecated
258	Which of the following statements is for placing the frames upper left corner to (200,100)?	1	N	R	1	frame.setLocation(200,100)
259	Which of the following swing components donot have an Icon parameter in its constructor?	1	N	R	1	JTextField
260	Which of the follwing is constructor of Jtable?	1	N	R	1	JTable(Object data[][], Object colHeads[])
261	Which of the method can be used to output a string in an applet?	1	N	R	1	drawString()
262	Which of the method Choice class returns a string containing the name of the item.	1	N	R	1	String getSelectedItem()
263	Which of the subclasses of java.awt.component?	1	N	R	1	Container classes
264	Which Of these Compenent can be added to frame?	1	N	R	1	All of the Above
265	Which of these following is not a component of swing	1	N	R	1	List
266	Which of these method cannot be called on JLabel object?	1	N	R	1	setBorderLayout()
267	Which of these methods can be used to obtain the reference to the container that generated a ContainerEvent?	1	N	R	1	getContainer()
268	Which of these methods can be used to output a string in an applet?	1	N	R	1	drawString()
269	Which of these methods cannot be called on JLabel object?	1	N	R	1	setBorderLayout()
270	Which of these methods cannot be called on TextArea?	1	N	R	1	String getItem(int index)
271	Which of these methods is used to setting the winwods dimension	1	N	R	1	void setSize(Dimension new_size)
272	which of these methods use in cardlayout	1	N	R	1	add(String s, Component c)
273	Which of these package is used for graphical user interface ?	1	N	R	1	java.awt
274	Which of these packages contains all the classes and methods required for event handling in Java?	1	N	R	1	java.awt.event
275	Which one is the valid constructor of JCheckBox.	1	N	R	1	JCheckBox(Sting s, Icon I, Boolean State)
276	Which one method is used to set the visibility of the frame?	1	N	R	1	setVisible(true)
277	Which package use for import the swing components?	1	N	R	1	javax.swing.*;
278	Which TextComponent method is used to set a TextComponent to the read-only state?	1	N	R	1	setEditable
279	which type of button is belongs to a group such that only one button in the group may be selected at one time?	1	N	R	1	CheckboxGroup
280	Which of these events is generated when a button is pressed?	1	N	R	1	B.) ActionEvent

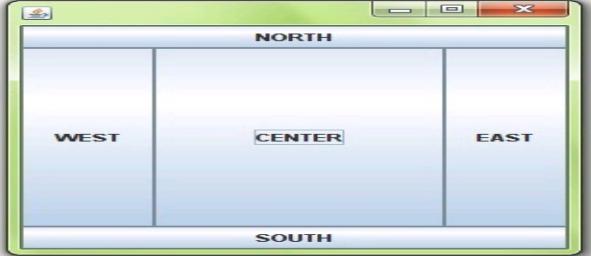

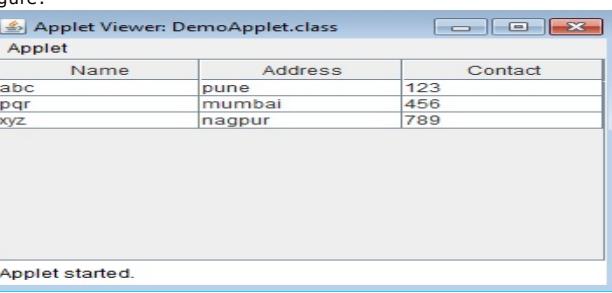

281	Why are swing component termed as lightweight ?	1	N	R	1	they do not depend on native platform
282	Why we use Applet?	1	N	R	1	Option A) and B) FROM this
283	Window is super class of _____	1	N	R	1	Frame
284	Window, frame and dialog use _____ as their default layout.	1	N	R	1	BorderLayout
285	You can construct a JTabbedPane using _____.	1	N	R	1	new JTabbedPane()
286	You Can set the alignment of the string within the label by calling _____	1	N	R	1	setAlignment()
287	You want to construct a text area that is 80 character-widths wide and 10 character-heights tall. What code do you use ?	1	N	R	1	new TextArea( 10,80)
288	_____ class used to create node in tree.	1	N	R	1	DefaultMutableTreeNode
289	_____ dialog box is active input is directed to it until it is closed.	1	N	R	1	Modal
290	_____ is the Superclass of TextField and the TextArea classes:	1	N	R	1	TextComponent
291	_____ Positions are the components into five regions east, west, north , south, center:	1	N	R	1	BorderLayout
292	_____ is a Swing class that allows the user to enter a single line of text.	1	N	R	1	JTextField
293	_____ is a Swing layout manager that arranges components in a row or a column.	1	N	R	1	GridLayout
294	_____ method is used to add items in Combobox.	1	N	R	1	addItem()
295	_____ method is used to add the menubar on frame window.	1	N	R	1	setMenuBar()
296	_____ method returns currently selected item in choice.	1	N	R	1	getSelectedItem( )
297	_____ can be used to enter and display a string	1	N	R	1	A TextField
298	_____ class is used to create set of mutually exclusive checkboxes.	1	N	R	1	CheckboxGroup
299	_____ Layout lays components in a Two Dimensional Grid	1	N	R	1	GridLayout
300	_____ arranges the component in rows and columns	1	N	R	1	GridLayout
301	_____ creates a dropdown list of textual entries	1	N	R	1	Choice
302	_____ this is constructor of List control	1	N	R	1	List(int numRows, boolean multipleSelect)
303	_____ controls are platform dependant	1	N	R	1	AWT
304	_____ lays out components in a two dimensional grid	1	N	R	1	GridLayout
305	_____ AWT component is used to create popup list of string items from which only one can be selected at a time.	1	N	R	1	Choice
306	_____ class is used to display hierarchical data.	1	N	R	1	JTree
307	_____ class creates blank semantics free window	1	N	R	1	Canvas
308	_____ is not a Swing Component	1	N	R	1	CheckboxGroup
309	_____ is the default layout manager for APPLET.	1	N	R	1	FlowLayout
310	_____ class encapsulates AWT events.	1	N	R	1	AWTEvent

311	Constructs a new scroll bar with the specified orientation.	1	N	R	1	Scrollbar(int)
312	component may have different size rows may have different number of columns.	1	N	R	1	GridLayout
313	method is used to append the string str to end of the current text.	1	N	R	1	append ()
314	method is used to add a tab to the pane.	1	N	R	1	addTab ()
315	.....are responsible for placing components on a window	1	N	R	1	LayoutManagers
316	..... method is used to lock text box components.	1	N	R	1	setEditable(boolean flag)
317	A checkbox is a control that consist of a :	1	N	R	1	Both a & b
318	Most Swing components are _____ components because they are rendered and drawn entirely by Java code.	1	N	R	1	lightweight
319	Figure:- 	1	Y1	A	2	public class HelloSwing { public HelloSwing() { JLabel l1 = new JLabel("User Name"); JLabel l2 = new JLabel("Password"); JTextField t1 = new JTextField(); JTextField t2 = new JTextField(); JButton b1 = new JButton("Submit"); JButton b2 = new JButton("Close"); }
320	The Jtable used to display data in form of?	1	N	U	2	JTable object displays rows and columns of data.
321	Which method is used to display icon on a Button?	1	N	U	2	setIcon(ImageIcon i)
322	//Find out the error. import javax.swing.JFrame; import javax.swing.JTree; import javax.swing.SwingUtilities; import javax.swing.tree.DefaultMutableTreeNode; public class TreeExample extends JApplet { JTree tree; public void init() { DefaultMutableTreeNode root = new DefaultMutableTreeNode("Root"); DefaultMutableTreeNode vegetableNode = new DefaultMutableTreeNode("Vegetables"); DefaultMutableTreeNode fruitNode = new DefaultMutableTreeNode("Fruits"); root.add(vegetableNode); root.add(fruitNode); tree = new JTree(); add(tree); } } /*<applet code="TreeExample" width=300 height=300></applet>*/	1	N	A	2	Error in statement in which JTree is created
323	//Identify the correct output for the given code. import java.awt.*; import java.applet.*; /*<applet code="LabelDemo" width=300 height=200></applet>*/ public class MyApplet extends Applet { public void init() { Label one = new Label("One"); Button submit = new Button("Submit"); TextField enter = new TextField(); add(one); add(submit); add(enter); } }	1	Y2	A	2	
	//Identify the error import java.awt.*; import javax.swing.*; /*<applet code="JTableDemo" width=400 height=200></applet>*/ public class JTableDemo extends JApplet { public void init() { Container contentPane = getContentPane(); contentPane.setLayout(new					

324	<pre>BorderLayout()); final String[] colHeads = { "Roll No", "Name", "Branch" }; final Object[][] data = { { "11", "Mayur", "CO" }, { "22", "Ritesh", "IF" }, { "33", "Rahul", "CM" } }; JTable table = new JTable(data); int v = ScrollPaneConstants.VERTICAL_SCROLLBAR_AS_NEEDED; int h = ScrollPaneConstants.HORIZONTAL_SCROLLBAR_AS_NEEDED; JScrollPane jsp = new JScrollPane(table, v, h); contentPane.add(jsp, BorderLayout.CENTER); } }</pre>	1	N	A	2	Error in statement in which JTable is created
325	<pre>//Select the correct option for the following code. import java.awt.*; import java.applet.*; import java.awt.event.*; /*&lt;applet code=scrolldemo width=200 height=300&gt; &lt;/applet&gt;*/ public class scrolldemo extends Applet implements AdjustmentListener { Scrollbar s1,s2,s3; TextField r,g,b; Color c; public void init() { s1=new Scrollbar(Scrollbar.HORIZONTAL,0,0,256); s2=new Scrollbar(Scrollbar.HORIZONTAL,0,0,256); s3=new Scrollbar(Scrollbar.HORIZONTAL,0,0,256); r=new TextField(5); g=new TextField(5); b=new TextField(5); add(s1); add(r); add(s2); add(g); add(s3); add(b); s1.addAdjustmentListener(this); s2.addAdjustmentListener(this); s3.addAdjustmentListener(this); } public void adjustmentValueChanged(AdjustmentEvent ae) { r.setText(Integer.toString(s1.getValue())); g.setText(Integer.toString(s2.getValue())); b.setText(Integer.toString(s3.getValue())); c=new Color(s1.getValue(),s2.getValue(),s3.getValue()); setBackground(c); } }</pre>	1	N	A	2	background with combination of r,g and b.
326	<p>1. Which components are used in the following output?</p> <p>Figure:-</p>	1	Y1	U	2	Label, TextField, Button
327	<pre>1.import java.awt.*; 2.import java.applet.*; 3.public class sample3 extends Applet 4.{ 5.public void init() 6.{ 7.Choice country=new Choice(); 8.country.add("india"); 9.country.add("america"); 10.country.add("shrilanka",true); 11.country.add("japan"); 12.add(country); 13.} 14.}</pre>	1	N	A	2	Line number 10
	<pre>1.public class sample5 extends Applet 2.{ 3.public void init() 4.{ 5.//CheckboxGroup cg=new CheckboxGroup(); 6.Checkbox c1,c2,c3,c4;</pre>

329	1.Which is missing statement in following program? import java.awt.*; import java.applet.*; import java.util.*; /* <applet code="BorderLayoutDemo" width=400 height=200> </applet> */ public class BorderLayoutDemo extends Applet { public void init() { add(new Button("north"),BorderLayout.NORTH); add(new Button("south"),BorderLayout.SOUTH); add(new Button("Right"),BorderLayout.EAST); add(new Button("Left"), BorderLayout.WEST); String msg = "this is in center"; add(new TextArea(msg),BorderLayout.CENTER); } }	1	N	A	2	setLayout(new BorderLayout())
330	2. Consider the following program. Find which statement contains error.importjava.awt.*; importjavax.swing.*; /* <applet code="JTableDemo" width=400 height=200> </applet> */ public class JTableDemo extends JApplet { public void init() { Container contentPane = getContentPane(); contentPane.setLayout(new BorderLayout()); final Object[][] data = { { "Ramesh", "111", "50000" }, 15 { "Sagar", "222", "52000" }, { "Virag", "333", "40000" }, { "Amit", "444", "62000" }, { "Anil", "555", "60000" }, }; JTable table = new JTable(data,colHeads); int v = ScrollPaneConstants.VERTICAL_SCROLLBAR_AS_NEEDED; int h = ScrollPaneConstants.HORIZONTAL_SCROLLBAR_AS_NEEDED; JScrollPanejsp = new JScrollPane(table, v, h); contentPane.add(jsp, BorderLayout.CENTER); } }	1	N	A	2	A. Error in statement in which JTable is created
331	2. What is the purpose of JTable?	1	N	U	2	JTable object displays rows and columns of data.
332	2.What should be written in blank space. import java.awt.*; import java.awt.event.*; import java.applet.*; /* <applet code="CBGroup" width=250 height=200> </applet> */ public class CBGroup extends Applet { String msg = ""; Checkbox Win98, winNT; CheckboxGroup cbg; public void init() { cbg = new CheckboxGroup(); Win98 = new Checkbox("Windows 98/XP", , true); winNT = new Checkbox("Windows NT/2000", , false); add(Win98); add(winNT); Win98.addItemListener(this); winNT.addItemListener(this); } }	1	N	A	2	cbg
333	3. Observe the following code and find which statement contains error.import java.awt.*; import javax.swing.*; import java.awt.event.*; import java.applet.*; import javax.swing.event.*; public class ttp extends JApplet implements ActionListener { JButton jb=new JButton("click me"); JTextField text=new JTextField(20); public void init() { Container cp=getContentPane(); cp.setLayout(new FlowLayout()); jb.setToolTipText("this is button control"); add(jb); add(text); text.addActionListener(this); } public void actionPerformed(ActionEvent e) { text.setText("hello tyco"); } }	1	N	A	2	C.Error in adding and registering listener to the component.
334	3. Select the proper command to run the following code import java.awt.*; import java.awt.event.*; import javax.swing.*; import java.applet.*; /* <applet code="combodemo11" width=300 height=100> </applet> */ public class combodemo11 extends JApplet { public void init() { Container co = getContentPane(); co.setLayout(new FlowLayout()); JComboBoxjc=new JComboBox(); jc.addItem("cricket"); jc.addItem("football"); jc.addItem("hockey"); jc.addItem("tennis"); co.add(jc); } }	1	N	A	2	appletviewer combodemo11.java
	4.To create a Following output which control is required.					

	Figure:-					
335		1	Y1	U	2	2 Label, 1 Button
336	A JFrame supports three operations when the user closes the window. Which of the choices below is not one of the three:	1	N	U	2	LOWER_ON_CLOSE
337	A menu bar represents	1	N	U	2	A list of menus which can be added to the top of a top-level window
338	A Swing component can be viewed based on what state it's in, how it looks, and what it does. This is known as the model-view- _____ model.	1	N	U	2	Controller
339	A toggle button looks just like a push button, but it acts differently because _____..	1	N	U	2	it has two states: enabled and disabled
340	A user want's to create an Applet with menubar consisting three menu items and one checkable menu item select correct coding?	1	N	A	2	. import java.awt.*; import java.applet.*; /*<applet code="Demo.class" width=200 height=200>*/ public class Demo extends Applet { public void init(){ MenuBar mbr=newMenuBar(); setMenuBar(mbr); Menu m=new Menu("File"); MenuItem i1=new MenuItem("New"); MenuItem i2=new MenuItem("Run"); MenuItem i3=new MenuItem("build"); CheckboxMenuItem i4=new CheckboxMenuItem("hello"); m.add(i1); m.add(i2); m.add(i3); m.add(i4); mbr.add(m); add(mbr); } }
341	All java classes are derived from	1	N	U	2	java.lang.Object
342	An Applet has its Layout Manager set to the default of FlowLayout. What code would be the correct to change to another Layout Manager?	1	N	A	2	setLayout(new GridLayout(2,2));
343	Analyse the following code <pre>import javax.swing.*; Import javax.swing.border.*; Import java.awt.*; Public class Test extends JFrame { Public Test() { Border border=new TitledBorder("My button"); JButton jbt1=new JButton("OK"); JButton jbt2=new JButton("Cancel"); Jbt1.setBorder(border); Jbt2.setBorder(border); Add(jbt1,BorderLayout.NORTH); Add(jbt2,BorderLayout.NORTH); } Public static void main(String[] args){ JFrame frame=new Test(); Frame.setSize(200,100); Frame.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE); Frame.setVisible(true); } }</pre>	1	N	A	2	The program has compile error.
344	Analyse the following code? <pre>import javax.swing.*; import java.awt.*; public class Test extends JFrame { public Test() { setLayout(new FlowLayout()); add(new JButton("Java")); add(new JButton("Java")); add(new JButton("Java")); add(new JButton("Java")); } public static void main(String [] args) { JFrame frame = new Test(); frame.setSize(200,100); frame.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE); frame.setVisible(true); } }</pre>	1	N	A	2	Four buttons are displayed with the same text "Java"
345	Arranges the compents as a deck of cards such that only one	1	N	U	2	B.CardLayout

	component is visible at a time				
346	Below show the figure matches with respect to output Figure:- 	1	Y1	A	2
347	Button control implements following Listener interface?	1	N	A	2
348	By which method You can set or change the text in a Label?	1	N	U	2
349	Choose correct sequence of code for given output Figure:- 	1	Y1	A	2
350	Choose missing statements in following code from given options. import java.awt.*; import java.applet.*; /* <applet code="Ellipses" width=300 height=200> </applet> */ public class Ellipses extends Applet { { g.drawOval(10, 10, 50, 50); g.fillOval(100, 10, 75, 50); g.drawOval(190, 10, 90, 30); g.fillOval(70, 90, 140, 100); } }	1	N	A	2
351	Choose the correct code to display the following output. Figure:- 	1	Y1	A	2

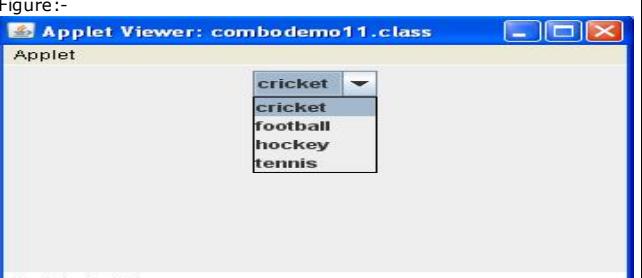

```
import java.awt.*; import java.applet.*; /*<applet code="Border.class"> width=300 height=300</applet> */ public class Border extends Applet{ public void init() { BorderLayout br=new BorderLayout(); setLayout(br); Button b1=new Button("NORTH"); Button b2=new Button("SOUTH"); Button b3=new Button("EAST"); Button b4=new Button("WEST"); Button b5=new Button("CENTER"); add(b1,BrderLayout.NORTH); add(b2,BrderLayout.SOUTH); add(b3,BrderLayout.EAST); add(b4,BrderLayout.WEST); add(b5,BrderLayout.CENTER); } }
```

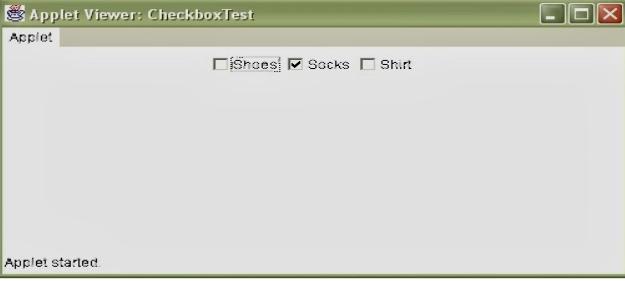

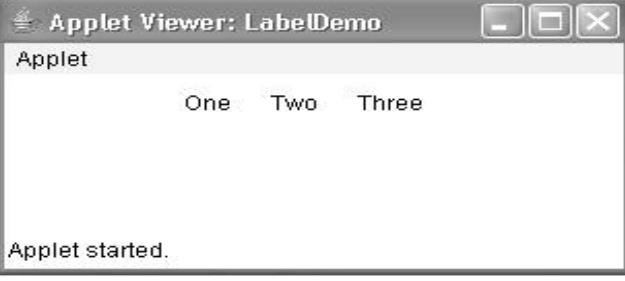

```
import java.awt.*; import java.applet.*; /*<applet code="expe2.class"> width=300 height=300</applet> */ public class expe2 extends Applet { Button l1; Button l11; Button l12; public void init() { setLayout(new FlowLayout(FlowLayout.RIGHT)); l1=new Button("OK"); l11=new Button("Cancel"); l12=new Button("Exit"); add(l1); add(l11); add(l12); } }
```

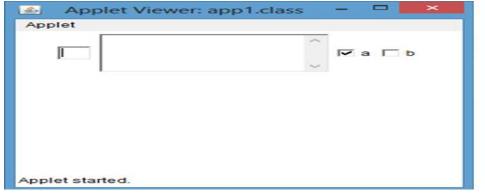

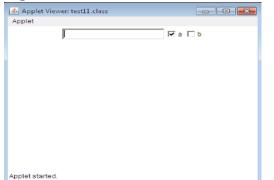

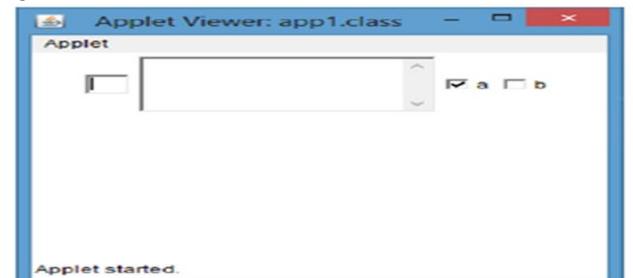

```
public void paint(Graphics g)
```

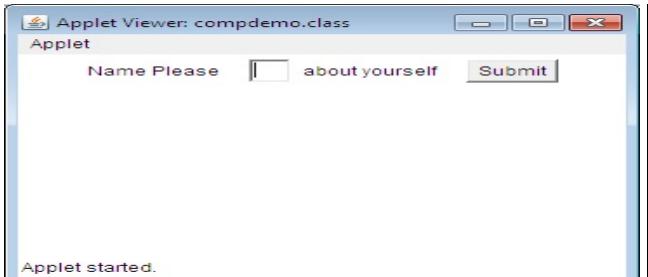

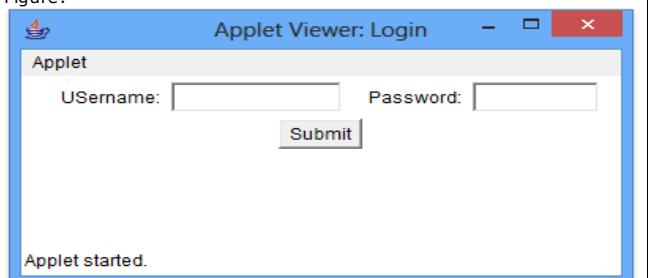

```
import javax.swing.*; import java.awt.*; /*<applet code="DemoApplet.class"> width=300 height=300</applet> */ public class DemoApplet extends JApplet { JScrollPane jsp; JTable table; Container c; public void init() { c = this.getContentPane(); this.setLayout(new BorderLayout()); final String colhead[]={"Name","Address","Contact"}; final Object data[][]={{ "abc","pune","123"}, {"pqr","mumbai","456"}, {"xyz","nagpur","789"} }; table=new JTable(data,colhead); int v=ScrollPaneConstants.VERTICAL_SCROLLBAR_AS_NEEDED; int h=ScrollPaneConstants.HORIZONTAL_SCROLLBAR_AS_NEEDED; jsp=new JScrollPane(table,v,h); c.add(jsp, BorderLayout.CENTER); } }
```

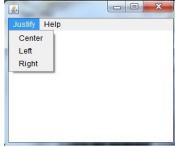

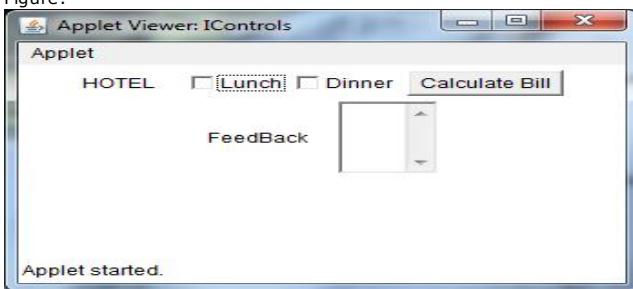

352	Choose the correct missing statement from the given code <pre>import java.awt.*; import java.io.*; import java.awt.event.*; import java.applet.*; class Myframe extends Frame { Myframe(String title) { super(title); } public void paint(Graphics g) { g.drawString("This is frame window",120,150); } } public class Myframeapplet extends Applet //implements windowListener { public void init() { f1=new Myframe("Frame window"); f1.setSize(350,350); //f1.setLocation(450,450); f1.setVisible(true); //f1.addwindowListener(this); } public void start() { f1.setVisible(true); } public void stop() { f1.setVisible(false); } public void paint(Graphics g) { g.drawString("This ia a applet window",10,50); } } /*&lt;applet code="Myframeapplet" width=1000 height=1000&gt; &lt;/applet&gt;*/</pre>	1	N	A	2	Myframe f1;																
353	Choose the correct Program for the following output  Figure:-  <p>The screenshot shows a window titled "Applet Viewer: mytable.class". Inside, there's a table with the following data:</p> <table border="1"> <thead> <tr> <th>Id</th> <th>Name</th> <th>Hourly Rate</th> <th>Part Time</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>John</td> <td>70.0</td> <td>false</td> </tr> <tr> <td>2</td> <td>Mike</td> <td>80.0</td> <td>true</td> </tr> <tr> <td>3</td> <td>David</td> <td>90.0</td> <td>false</td> </tr> </tbody> </table> <p>Below the table, a status bar says "Applet started."</p>	Id	Name	Hourly Rate	Part Time	1	John	70.0	false	2	Mike	80.0	true	3	David	90.0	false	1	Y1	A	2	<pre>import java.applet.Applet; import java.awt.Color; import javax.swing.JFrame; import javax.swing.JScrollPane; import javax.swing.JTable; public class mytable extends Applet { public void init() { String[] columns = new String[] {"Id","Name","Hourly Rate","Part Time"}; }}</pre>
Id	Name	Hourly Rate	Part Time																			
1	John	70.0	false																			
2	Mike	80.0	true																			
3	David	90.0	false																			
354	Choose the correct Program for the following output  Figure:-  <p>The screenshot shows a window titled "Applet Viewer: FontColor.class". Inside, the text "Hello Java" is displayed in a red color and an italic font. Below the text, a status bar says "Applet started."</p>	1	Y1	A	2	<pre>import java.awt.*;import java.applet.*; //&lt;applet code="FontColor"&gt; width=200 height=200&lt;/applet&gt;; public class FontColor extends Applet { Font f=new Font("Times New Roman",Font.ITALIC,14); public void init() { setFont(f); } public void paint(Graphics g) { g.setColor(Color.red); g.drawString("Hello Java",150,100); } }</pre>																
355	Choose the correct Program for the following output  Figure:-	1	Y1	A	2	<pre>import javax.swing.JFrame; import javax.swing.JTree; import javax.swing.SwingUtilities; import javax.swing.tree.DefaultMutableTreeNode; public class TreeExample extends JFrame { private JTree tree; public TreeExample() { //create the root node DefaultMutableTreeNode root = new DefaultMutableTreeNode("Root"); //create the child nodes DefaultMutableTreeNode vegetableNode = new DefaultMutableTreeNode("Vegetables"); DefaultMutableTreeNode fruitNode = new DefaultMutableTreeNode("Fruits"); //add the child nodes to the root node root.add(vegetableNode); root.add(fruitNode); //create the tree by</pre>																

				<pre>passing in the root node tree = new JTree(root); add(tree); this.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE); this.setTitle("JTree Example"); this.pack(); this.setVisible(true); } public static void main(String[] args) { SwingUtilities.invokeLater(new Runnable() { @Override public void run() { new TreeExample(); } }); }</pre>		
356	Choose the correct program to get the following output Figure:- 	1	Y1	A	2	<pre>import java.awt.*; import javax.swing.*; import java.applet.*; /* &lt;applet code="ComboDemo11" width=300 height=100&gt; &lt;/applet&gt; */ public class ComboDemo11 extends JApplet { public void init() { setLayout(null); Container co = getContentPane(); String sports[]={ "cricket","football","hockey","tennis"}; JComboBox cb=new JComboBox(sports); cb.setBounds(50, 50,90,20); co.add(cb); } }</pre>
357	Choose the correct sequence for the following output Figure:- 	1	Y1	U	2	<pre>import java.applet.*; import java.awt.*; public class RadioButton1 { public static void main(String arg[]) { Frame fm=new Frame("RadioButton Group"); Label la=new Label("What is your choice:"); fm.setLayout(new GridLayout(0,1)); CheckboxGroup cg1=new CheckboxGroup(); fm.add(la); Checkbox cb1=new Checkbox("MATH",cg1,true); Checkbox cb2=new Checkbox("PHYSICS",cg1,false); Checkbox cb3=new Checkbox("CHEMISTRY",cg1,false); Checkbox cb4=new Checkbox("ENGLISH",cg1,false); fm.setVisible(true); fm.add(la); fm.add(cb1); fm.add(cb2); fm.add(cb3); fm.add(cb4); } }}</pre>
	Choose the correct sequence for the following output Figure:-					<pre>import java.awt.*; import java.applet.*; /* &lt;applet code="Appl" */ </pre>

358		1	Y1	A	2	<pre>width=200 height=200&amp;gt; &amp;lt;/applet&amp;ampgt*/ public class App1 extends Applet { public void init() { Button b1=new Button("Button 1"); TextField tf = new TextField(); TextArea t1=new TextArea(3,20); Choice ch=new Choice(); ch.add("India"); Checkbox c=new Checkbox("a",true); add(b1); add(tf); add(t1); add(c); add(ch); } }</pre>
359	<p>Choose the correct sequence for the following output  Figure:-</p> 	1	Y1	A	2	<pre>import java.awt.*; import java.applet.*; /* &amp;lt;APPLET&amp;gt; */ Code=""CheckboxTest"; Width=500 Height=200&amp;gt; &amp;lt;/APPLET&amp;gt; */ public class CheckboxTest extends Applet { public void init() { Checkbox cb1=new Checkbox("Shoes"); Checkbox cb2=new Checkbox("Socks",true); Checkbox cb3=new Checkbox("Shirt"); add(cb1); add(cb2); add(cb3); } }</pre>
360	<p>Choose the correct sequence for the following output  Figure:-</p> 	1	Y1	A	2	<pre>import java.awt.*; import java.applet.*; /* &amp;lt;applet code="LabelDemo"&amp;gt; width=300 height=300&amp;gt;&amp;lt;/applet&amp;gt; */ public class LabelDemo extends Applet { public void init() { Label one = new Label("One"); Label two = new Label("Two"); Label three = new Label("Three"); add(one);add(two);add(three); } }</pre>
	<p>Choose the correct sequence for the following output  Figure:-</p>					

361	 <p>Applet started.</p>	1	Y1	A	2	<pre>import java.awt.*; import java.applet.*; public class app1 extends Applet { public void init() { TextField tf = new TextField(); TextArea t1=new TextArea(3,20); Checkbox c=new Checkbox("a",true); Checkbox c1=new Checkbox("b",false); add(tf); add(t1); add(c); add(c1); } } /*&lt;applet code="app1" width=300 height=300&gt; &lt;/applet&gt; */</pre>
362	<p>Choose the correct sequence for the following output</p> <p>Figure:-</p>  <p>Applet started.</p>	1	Y1	A	2	<pre>import java.awt.*; import java.applet.*; public class test11 extends Applet { public void init() { TextField t1=new TextField(20); Checkbox c=new Checkbox("a", true); Checkbox c1=new Checkbox("b", false); add(t1); add(c); add(c1); } }</pre>
363	<p>Choose the correct sequence for the following output</p> <p>Figure:-</p>  <p>Applet started.</p>	1	Y1	A	2	<pre>import java.awt.*; import java.applet.*; public class app1 extends Applet { public void init() { TextField tf = new TextField(); TextArea t1=new TextArea(3,20); Checkbox c=new Checkbox("a",true); Checkbox c1=new Checkbox("b",false); add(tf); add(t1); add(c); add(c1); } }</pre>
	<p>Choose the correct sequence for the following output</p> <p>Figure:-</p>					

364		1	Y1	A	2	Label,TextField,Label,Button
365	<p>Choose the correct sequence for the following output.</p> <p>Figure:-</p>  <p>Applet started.</p>	1	Y1	A	2	<pre>import java.awt.*; import java.applet.*; /*&amp;lt;applet code="Login"; width=400 height=200&amp;gt; &amp;lt;/applet&amp;gt;*/ public class Login extends Applet {     TextField nm; TextField psw; public void init() { Label nml = new     Label("Username:", Label.RIGHT); Label pswl =new     Label("Password:", Label.RIGHT); nm=new TextField(12); psw = new     TextField(12); Button b=new Button("Submit"); add(nml); add(nm);     add(pswl); add(psw); add(b); } }</pre>
366	class Fr { public static void main(String ar[]) { JFrame f = new JFrame(); f.setDefaultCloseOperation(JFrame.DISPOSE_ON_CLOSE);}}	1	N	A	2	disposes frame
367	class Frame{ Frame(){ } } class VFrame extends Frame { VFrame(){ super(); } } Which statement are true?	1	N	A	2	Class VFrame's constructor includes a call to super().
368	Components in the frame is add at appropriate place using	1	N	A	2	setBounds(int,int,int,int)
	Consider following output. Find the missing statement in the following program to get above output. import java.awt.*; class AWTMenu extends Frame { public static void main(String args[]) { AWTMenu m=new AWTMenu(); m.setVisible(true); MenuBar mb=new MenuBar(); m.setMenuBar(mb); Menu hmenu= new Menu("Help"); Menu jmenu=new Menu("Justify"); mb.add(hmenu); MenuItem center=new MenuItem("Center"); MenuItem left=new MenuItem("Left"); MenuItem right=new MenuItem("Right"); jmenu.add(center); jmenu.add(left); jmenu.add(right); }}					

	369		1	Y1	U	2	mb.add(jmenu);
	370	Consider following output. Identify controls used. Figure:- 	1	Y1	U	2	Checkbox,TextArea,Button,Label
	371	Consider following program and find the missing statement in the code <pre>import java.awt.event.*; import java.awt.*; import java.applet.*; /*&lt;applet code=exp1.class width=200 height=200&gt; &lt;/applet&gt; */ public class exp1 extends Applet { public void init() { add(new Button("TOP"),BorderLayout.NORTH); add(new Button("BOTTOM"),BorderLayout.SOUTH); add(new Button("RIGHT"),BorderLayout.EAST); add(new Button("LEFT"),BorderLayout.WEST); } }</pre>	1	N	A	2	setLayout(new BorderLayout());
	372	Consider following program and state how many main menu and sub menu displayed in output: <pre>import java.awt.*; public class MenuDemo { public static void main(String args[]) { Frame f=new Frame("My Frame"); f.setVisible(true); MenuBar mbr= new MenuBar(); f.setMenuBar(mbr); Menu filemenu=new Menu("File"); Menu editmenu=new Menu("Edit"); Menu viewmenu=new Menu("View"); mbr.add(filemenu); mbr.add(editmenu); mbr.add(viewmenu); MenuItem new1=new MenuItem("New"); MenuItem open1=new MenuItem("Open"); filemenu.add(new1); filemenu.add(open1); new1.setEnabled(false); CheckboxMenuItem wordwrap=new CheckboxMenuItem("WordWrap"); editmenu.add(wordwrap); }}</pre>	1	N	A	2	3 Main, 3 Sub menu
		Consider following program. Select the missing statement from options. <pre>import javax.swing.*; import java.awt.*; /*&lt;applet code="TableDemo"</pre>					

	width=200 height=200 */ public class TableDemo extends JApplet { public void init() { Container cp=getContentPane(); cp.setLayout(new BorderLayout()); String data[][] = {{ {"Neeta", "CO", "A"}, {"Mahesh", "CE", "B"}, {"Akanksha", "IF", "C"}}, {"Neha", "ME", "A"} }; String col[] = {"Name", "Branch", "Grade"}; int v=ScrollPaneConstants.VERTICAL_SCROLLBAR_AS_NEEDED; int h=ScrollPaneConstants.HORIZONTAL_SCROLLBAR_ALWAYS; JScrollPane jsp=new JScrollPane(table,v,h); cp.add(jsp,BorderLayout.CENTER); } }	1	N	A	2	Table table = new JTable(data,col);
373	Consider the following program What will be displayed in the output? import java.awt.*; import javax.swing.*; /* <applet code="JTabbedPaneDemo" width=300 height=100> </applet> */ public class JTabbedPaneDemo extends JApplet { public void init() { JTabbedPane jtp=new JTabbedPane(); jtp.addTab("Fruit",new FruitPanel()); jtp.addTab("Color",new ColorPanel()); jtp.addTab("Vegetables",new VegitablePanel()); getContentPane().add(jtp); jtp.removeAll(); } } class FruitPanel extends JPanel { public FruitPanel() { JButton b1=new JButton("Apple"); add(b1); JButton b2=new JButton("Mango"); add(b2); JButton b3=new JButton("Banana"); add(b3); } } class ColorPanel extends JPanel { public ColorPanel() { JButton b1=new JButton("Red"); add(b1); JButton b2=new JButton("Blue"); add(b2); JButton b3=new JButton("Green"); add(b3); } } class VegitablePanel extends JPanel { public VegitablePanel() { JButton b1=new JButton("Potato"); add(b1); JButton b2=new JButton("Brinjal"); add(b2); JButton b3=new JButton("Tomato"); add(b3); } }	1	N	A	2	Applet without any controls.
374	Consider the following program Which statemetn is prepare for blank space import java.applet.*; import java.awt.*; public class gridlayout extends Applet { int n=1; public void init() { setFont(new Font("SansSerif",Font.BOLD,24)); for(int i=0;i<5;i++) { for(int j=0;j<5;j++) { _____ n++; } } } }	1	N	A	2	add(new Button("n")); _____
375	Consider the following program. What should be the correction done in the program to get correct output? import java.awt.*; import java.swing.*; /* <applet code="JComboBoxDemo" width=300 height=100> </applet> */ public class JComboBoxDemo extends JApplet { JComboBox jcb; String flags[] = { "France", "Germany", "Italy", "Japan" }; public void init() { jcb = new JComboBox(flags); add(jcb); } }	1	N	A	2	package not imported correctly
376	Consider the following program. Find the error. import java.awt.*; import java.applet.*; import java.awt.event.*; /* <applet code=demo width=100 height=100> </applet> */ public class demo extends Applet { public void init() { firstlabel =new Label("Label 1"); secondlabel =new Label("Label 2"); b1=new Button("Enter"); add(l1); add(l2); add(b1); } }	1	N	A	2	All of above
377	Consider the following program. Find which missing statement. import java.awt.*; import javax.swing.*; import javax.swing.tree.*; /* <applet code="JTreeDemo.class" width=400 height=300> </applet> */ public class JTreeDemo extends JApplet { public void init(){ Container contentPane = getContentPane(); contentPane.setLayout(new BorderLayout()); DefaultMutableTreeNode a = new DefaultMutableTreeNode("CO5G"); top.add(a); DefaultMutableTreeNode a1 = new DefaultMutableTreeNode("JPR"); a.add(a1); DefaultMutableTreeNode a2 = new					DefaultMutableTreeNode top = new DefaultMutableTreeNode ("Third Year")

	378	DefaultMutableTreeNode("SWE"); a.add(a2); DefaultMutableTreeNode b = new DefaultMutableTreeNode("CO6G"); top.add(b); DefaultMutableTreeNode b1 = new DefaultMutableTreeNode("AJP"); b.add(b1); DefaultMutableTreeNode b2 = new DefaultMutableTreeNode("MAN"); b.add(b2); JTree tree = new JTree(top); int v = ScrollPaneConstants.VERTICAL_SCROLLBAR_ALWAYS; int h = ScrollPaneConstants.HORIZONTAL_SCROLLBAR_ALWAYS; JScrollPane jsp = new JScrollPane(tree, v, h); contentPane.add(jsp, BorderLayout.CENTER); } }	1	N	A	2	Computer Engineering&quot;);
	379	Consider the following program. Find which statement contains error. import java.awt.*; import java.applet.*; /* <applet code="CheckboxDemo" width=250 height=200> </applet> */ class CheckboxDemo extends Applet { Checkbox winXP, winVista, solaris, mac; public void init() { winXP = new Checkbox("Windows XP", null, true); winVista = new Checkbox("Windows Vista"); solaris = new Checkbox("Solaris"); mac = new Checkbox("Mac OS"); add(winXP); add(winVista); add(solaris); add(mac); } }	1	N	A	2	Class should not be public.
	380	Consider the following program. Find which statement contains error. import java.awt.*; import javax.swing.*; public class Demo { public static void main(String args[]) { JFrame f =new JFrame("Toggle Button Sample"); f.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE); Container c=f.getContentPane(); c.add(new JToggleButton("North"),BorderLayout.NORTH); c.add(new JToggleButton("North"),BorderLayout.EAST); c.add(new JToggleButton("North"),BorderLayout.WEST); c.add(new JToggleButton("North"),BorderLayout.SOUTH); c.add(new JToggleButton("North"),BorderLayout.CENTER); f.setSize(300,300); f.setVisible(true); } }	1	N	A	2	No error.
	381	Consider the following program. Find which statement contains error. import java.awt.*; import javax.swing.*; /* <applet code="JTableDemo" width=400 height=200> </applet> */ public class JTableDemo extends JApplet { public void init() { Container contentPane = getContentPane(); contentPane.setLayout(new BorderLayout()); final String[] colHeads = { "emp_Name", "emp_id", "emp_salary" }; final Object[][] data = { { "Ramesh", "111", "50000" }, { "Sagar", "222", "52000" }, { "Virag", "333", "40000" }, { "Amit", "444", "62000" }, { "Anil", "555", "60000" }, }; JTable table = new JTable(data); int v = ScrollPaneConstants.VERTICAL_SCROLLBAR_AS_NEEDED; int h = ScrollPaneConstants.HORIZONTAL_SCROLLBAR_AS_NEEDED; JScrollPanejsp = new JScrollPane(table, v, h); contentPane.add(jsp, BorderLayout.CENTER); } }	1	N	A	2	Error in statement in which JTable is created
	382	Consider the following program. Find which statement contains error. import java.applet.Applet; import java.awt.*; public class ButtonTest2 extends Applet { public void init() { String[] labelPrefixes = { "Start", "Stop", "Pause", "Resume" }; Panel p1 = new Panel(); for (int i=0; i<4; i++) { p1.add(new Button(labelPrefixes[i] + " Thread1")); } Panel p2 = Panel(); for (int i=0; i<4; i++) { p2.add(new Button(labelPrefixes[i] + " Thread2")); } add(p1); add(p2); } }	1	N	A	2	Error in the statement creating panel object
		Consider the following code. Select the proper scrollbar constant for blank line in code . import javax.swing.*; import java.applet.*; import java.awt.*; /* <applet code="ScrollDemo" width=300 height=100>					

	</applet> */ public class ScrollDemo extends JApplet { public void init() { Container cp=getContentPane(); cp.setLayout(new BorderLayout()); JTextArea ja=new JTextArea(); int v=ScrollPaneConstants.VERTICAL_SCROLLBAR_AS_NEEDED; int h=ScrollPaneConstants.HORIZONTAL_SCROLLBAR_ALWAYS; JScrollPane jsp=new JScrollPane(ja,v,h); cp.add(jsp,BorderLayout.CENTER); } }	1	N	U	2	Both I and ii
384	Debug the following code and find out which statement contains error. import java.awt.*; import java.awt.event.*; public class MenuDemo extends Frame { MenuBar mb; Menu m1,m2; MenuItem i1,i2,i3,i4,i5,i6; MenuDemo(String s) { super(s); mb=new MenuBar(); setMenuBar(); m1=new Menu("File"); m2=new Menu("Edit"); i1=new MenuItem("New"); i2=new MenuItem("Open"); i3=new MenuItem("Exit"); i4=new MenuItem("Cut"); i5=new MenuItem("Copy"); i6=new MenuItem("Paste"); m1.add(i1); m1.add(i2); m1.add(i3); m2.add(i4); m2.add(i5); m2.add(i6); mb.add(m1); mb.add(m2); setSize(500,500); } public static void main(String args[]) { MenuDemo m=new MenuDemo("MenuFrame"); m.setVisible(true); } }	1	N	A	2	statement where setMenuBar() method is invoked

481	Steps for Adding TabbedPane Control	1	N	U	2	1. Create a JTabbedPane object 2. Call addTab() to Add a tab to the pane 3.Repeat Step 2 for each Tab 4. Add the Tabbed Pane to the conte
482	Suppose a Panel is added to a Frame and a Button is added to the Panel. If the Frame's font is set to 12-point TimesRoman, the Panel's font is set to 10-point TimesRoman, and the Button's font is not set, what font will be used to display the Button's label?	1	N	U	2	10-point TimesRoman
483	Swing components are light weight because:	1	N	A	2	Swing components are platform independent.
484	Swing provides a combo box (a combination of a text field and a drop-down list) through the JComboBox class, which extends _____.	1	N	U	2	Jcomponent
485	TabbedPane Layout can be changed using:	1	N	U	2	Mentioning layout in constructor only.
486	The code Code will produce how many buttons: public class JScrollPaneDemo extends JApplet { public void init() { // Get content pane Container contentPane = getContentPane(); contentPane.setLayout(new BorderLayout()); JPanel jp = new JPanel(); jp.setLayout(new GridLayout(20, 20)); int b = 0; for(int i = 0; i < 20; i++) { for(int j = 0; j < 20; j++) { jp.add(new JButton("Button " + b)); ++b; } } // Add panel to a scroll pane int v = ScrollPaneConstants.VERTICAL_SCROLLBAR_AS_NEEDED; int h = ScrollPaneConstants.HORIZONTAL_SCROLLBAR_AS_NEEDED; JScrollPane jsp = new JScrollPane(jp, v, h); // Add scroll pane to the content pane contentPane.add(jsp, BorderLayout.CENTER); } }	1	N	A	2	400 Buttons
487	The constructor JCheckBox(true, "YES") suggests that -	1	N	U	2	Checkbox is selected and displays the string "YES" on it.
488	The default horizontal and vertical gap in FlowLayout is.....	1	N	U	2	5 Pixel
	The following constructors are required in the program to get output Figure:-					

489		1	Y1	U	2	Cellphones=new List(4,true) Companies=new List(4,false)
490	The following is an example of which layout? Figure:- 	1	Y1	U	2	BorderLayout
491	The following is an example of which layout? Figure:- 	1	Y1	U	2	CardLayout
492	The JComboBox is having following constructor	1	N	U	2	JComboBox(Vector v)
493	The layout manager that shows how words flow in a text editor? Use	1	N	U	2	Flow
494	The main difference between model and models dialog box is	1	N	U	2	When box is active input focus can not be directed to another window
495	The method _____ assigns the name Result to the Text of variable jlbl.	1	N	A	2	jlbl.setText("Result")
496	The method _____ separates menu items in a menu mu.	1	N	A	2	mu.addSeparator()
497	To construct a text area that is 80 character-widths wide and 10	1	N	U	2	new TextArea(10, 80)

	character-heights tall, select appropriate code.				
498	To creat panel of borderlayout use_____	1	N	A	2 Jpanel p=new JPanel(new BorderLayout())
499	To create a compact,multiple-choice,scrolling selection list,Use?	1	N	U	2 List
500	To create group of check boxes ,Use?	1	N	U	2 CheckBoxGroup
501	To get the depth of a JTree jTree, invoke _____	1	N	A	2 jTree.getRoot().getDepth()
502	To implement a single -line text area entry area, Use?	1	N	A	2 TextField
503	To place any component in AWT/Swing which method will be used	1	N	U	2 setBounds(int x,int y,int height,int width)
504	To position components in an applet window? Use	1	N	U	2 Layout Manager
505	<p>To produce following output in given program which statement should be placed to change the background color of applet import javax.swing.*; import java.awt.*; import java.awt.event.*; /* &lt;applet code=JRadioButtonDemo.class width=500 height=500&gt; &lt;/applet&gt; */ public class JRadioButtonDemo extends JApplet implements ItemListener { JRadioButton r,g,b; ButtonGroup bg; Container cp; public void init() { r=new JRadioButton("RED"); g=new JRadioButton("GREEN"); b=new JRadioButton("BLUE"); cp= getContentPane(); cp.setLayout(new FlowLayout()); cp.add(r); cp.add(g); cp.add(b); bg=new ButtonGroup(); bg.add(r); bg.add(g); bg.add(b); r.addItemListener(this); g.addItemListener(this); b.addItemListener(this); } public void itemStateChanged(ItemEvent ie) { ..... ..... ..... } }</p> <p>Figure:-</p> 	1	Y1	A	2 if(ie.getItemSelectable()==r) cp.setBackground(Color.RED); if(ie.getItemSelectable()==g) cp.setBackground(Color.GREEN); if(ie.getItemSelectable()==b) cp.setBackground(Color.BLUE);
506	<p>To set new font object with size 48 , name: Serif , Style PLAIN, what will be the statement from the following</p> <p>Figure:-</p>	1	Y1	U	2 new Font("Serif", Font.PLAIN, 48)

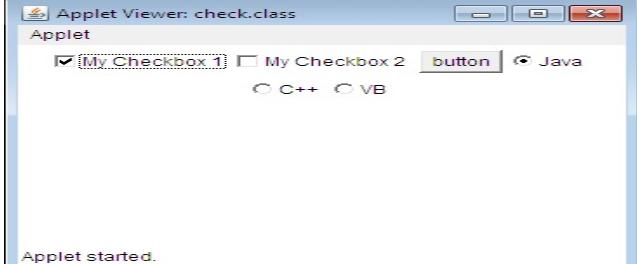

507	To set password as '*****' which command should be added in the following code import java.awt.*; import java.awt.event.*; import java.applet.*; public class textfield extends Applet implements ActionListener { TextField nm,psw; public void init() { Label nm1=new Label("name:",Label.RIGHT); Label psw=new Label("Password:",Label.RIGHT); nm=new TextField(12); psw=new TextField(8); add(nm1); add(nm); add(psw1); add(psw); nm.addActionListener(this); psw.addActionListener(this); } public void actionPerformed(ActionEvent ae) { repaint(); } public void paint(Graphics g) {g.drawString("name:"+nm.getText(),6,80); g.drawString("Selected text in name:"+nm.getSelectedText(),6,100); g.drawString("password:"+psw.getText(),6,120); } } /* <applet code="textfield.class" width=200 height=200> </applet> */	1	N	A	2	psw.setEchoChar('*');
508	What AWT classes (components) will be needed to get following output? Figure:- 	1	Y1	U	2	Label, Checkbox, checkboxGroup, FlowLayout
	What code should be added so that we can get following Code? import java.awt.*; import java.applet.*; import java.awt.event.*; /*<applet code=SignIn.class width=400 height=400></applet>*/ public class SignIn extends Applet implements ActionListener { TextField t1,t2; Button b1; Label l; public void init() { t1=new TextField(20); t2=new TextField(20); b1=new Button("Sign In"); l=new Label(""); add(t1); add(t2); add(b1); add(l); } public void actionPerformed(ActionEvent ae) { if(ae.getSource()==b1) { String msg=t1.getText(); String msg1=t2.getText();					

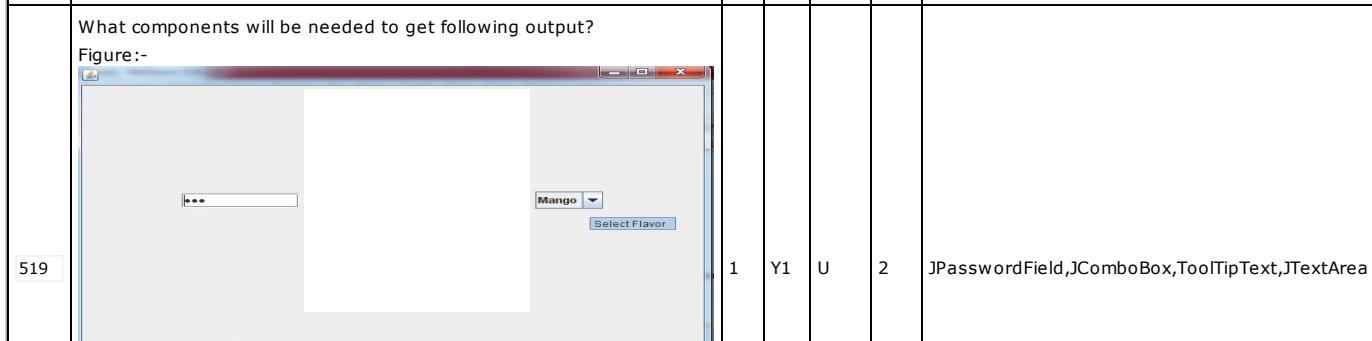

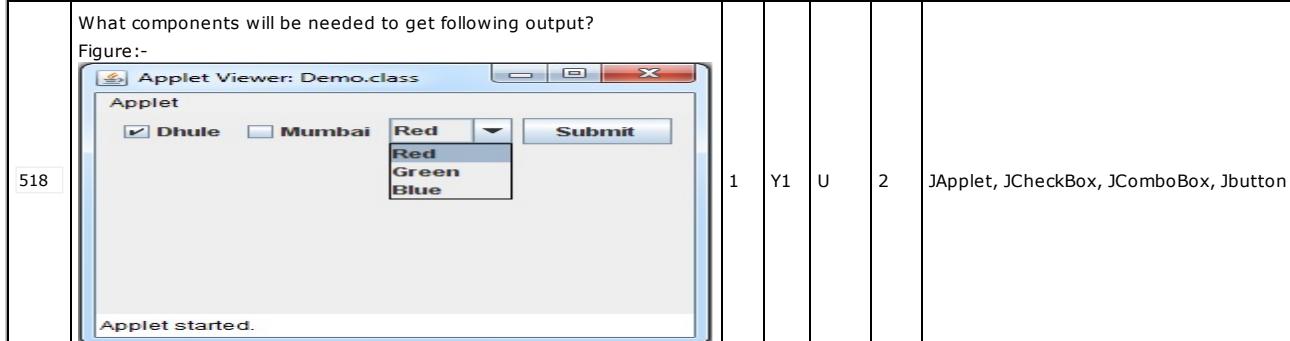

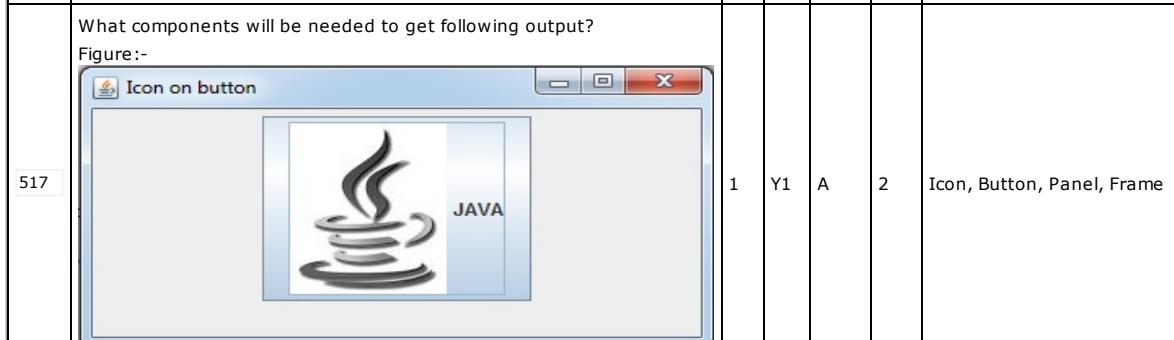

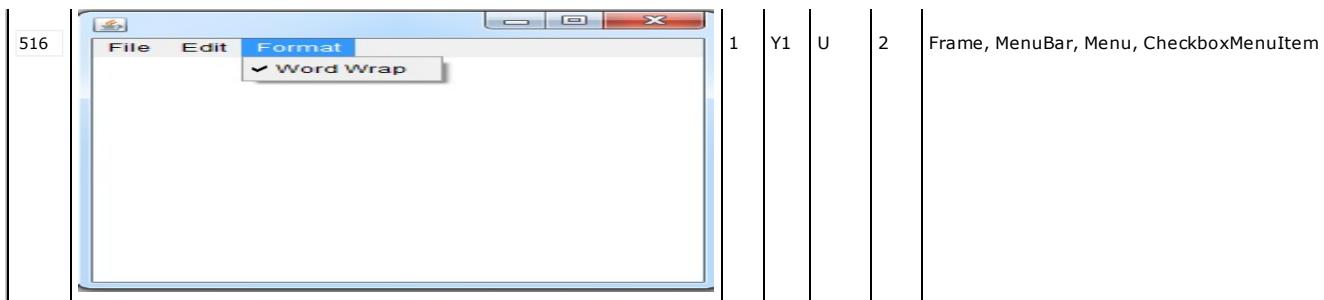

509	<pre>if(msg.equals("Admin")&amp;&amp;msg1.equals("Admin")) { l.setText("Correct Password"); } else { l.setText("Incorrect Password"); } } }</pre> <p>Figure:-</p>	1	Y1	A	2	Both A & B
510	<pre>import java.awt.*; import java.awt.event.*; class WindowCloseDemo extends Frame { Button exit; WindowCloseDemo() { exit=new Button("Exit"); add(exit); WindowClose w=new WindowClose(); addWindowListener(w); setTitle("Window"); setSize(400,300); setVisible(true); } public static void main(String []cd) { WindowCloseDemo wcd=new WindowCloseDemo(); } } class WindowClose extends WindowAdapter { public void windowClosing(WindowEvent we) { System.exit(1); } }</pre> <p>Figure:-</p>	1	Y1	A	2	setLayout(new FlowLayout());
511	What code would you use to construct a 24-point bold Calibri font?	1	N	U	2	new Font("Calibri", Font.BOLD, 24);
512	<pre>import java.awt.*; import java.applet.*; /* &lt;applet code="Mydemo25" width=300 height=100&gt; &lt;/applet&gt; */ public class Mydemo25 extends Applet { public void init() { TextField jt=new TextField(30); add(jt); add(new Button("OK")); } }</pre>	1	N	A	2	TextBox and Button
513	<p>What component will be needed to get following output?</p> <p>Figure:-</p>	1	Y1	U	2	D) JPanel, JTextField, JScrollPane and Constants related to scrollbars

527	<p>What is output of following programming statement?</p> <pre>import java.awt.*; import javax.swing.*; public class MyGridLayout { JFrame f; MyGridLayout(){ f=new JFrame(); JButton b1=new JButton("1"); JButton b2=new JButton("2"); JButton b3=new JButton("3"); JButton b4=new JButton("4"); JButton b5=new JButton("5"); JButton b6=new JButton("6"); JButton b7=new JButton("7"); JButton b8=new JButton("8"); JButton b9=new JButton("9"); f.add(b1);f.add(b2);f.add(b3);f.add(b4);f.add(b5); f.add(b6);f.add(b7);f.add(b8);f.add(b9); f.setLayout(new GridLayout(3,3)); f.setSize(300,300); f.setVisible(true); } public static void main(String[] args) { new MyGridLayout(); } }</pre> <p>Figure:-</p> 	1	Y1	A	2	Buttons are displayed in 3 rows and 3 columns
528	What is an event in delegation event model used by Java programming language?	1	N	U	2	An event is an object that describes a state change in processing.
529	<p>What is missing statement in following code?</p> <pre>import java.awt.Container; import java.awt.Font; import java.awt.GridLayout; import javax.swing.JButton; import javax.swing.JFrame; public class GridSizeTest extends JFrame { public static void main(String[] args) { GridSizeTest gst = new GridSizeTest(); gst.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE); gst.pack(); } public GridSizeTest() { Container pane = getContentPane(); pane.setLayout(new GridLayout(2, 2)); JButton button = new JButton("First"); pane.add(button); button = new JButton("Hi"); button.setFont(new Font("Courier", Font.PLAIN, 36)); pane.add(button); button = new JButton("There"); } }</pre>	1	N	U	2	Both a & b
530	<p>What is output of following program?</p> <pre>import javax.swing.*; import java.awt.*; import java.awt.event.*; import java.awt.*; class Login extends JFrame { JLabel lblName, lblPass; JTextField txtName; JButton btnOk; JPasswordField txtPass; Login() { setTitle("Login"); setLayout(null); lblName=new JLabel("UserName"); lblPass=new JLabel("Password"); lblName.setForeground(new Color(255,0,0)); lblName.setForeground(new Color(255,0,0)); txtName=new JTextField(); txtPass=new JPasswordField(); setLocation(250,80); setSize(500,250); lblName.setBounds(10,10,200,50); lblPass.setBounds(10,100,200,50); txtName.setBounds(220,10,200,50); txtPass.setBounds(220,100,200,50); lblName.setFont(new Font("Times</pre>	1	Y2	A	2	

	<pre>New Roman",Font.BOLD,20)); lblPass.setFont(new Font("Times New Roman",Font.BOLD,20)); txtName.setFont(new Font("Times New Roman",Font.BOLD,20)); txtPass.setFont(new Font("Times New Roman",Font.BOLD,20)); add(lblName); add(lblPass); add(txtName); add(txtPass); btnOk=new JButton("Ok"); btnOk.setFont(new Font("Times New Roman",Font.BOLD,20)); btnOk.setBounds(100,160,80,50); add(btnOk); lblPass.setForeground(new Color(0,255,0)); lblName.setForeground(new Color(0,255,0)); } public static void main(String args[]) { new Login().setVisible(true); } }</pre>					
531	What is Purpose of Jtree ?	1	N	U	2	A tree is a component that presents a hierarchical view of data
532	What is purpose of default constructor of Scrollbar( ) class?	1	N	U	2	To create vertical Scrollbar
533	what is Runnable from following?	1	N	U	2	interface
534	<p>What is the code for following output S1Q27.jpg Figure:-</p>	1	Y1	U	2	<pre>import java.applet.Applet; import java.awt.Button; /* &amp;lt;applet code="CreateAWTButtonExample" width=200 height=200&amp;gt; &amp;lt;/applet&amp;gt; */ public class CreateAWTButtonExample extends Applet { public void init() { Button b = new Button(); b.setLabel("My Button 1"); add(b); }}</pre>
535	<p>What is the correct code for given output? Figure:-</p>	1	Y1	A	2	<pre>import javax.swing.JFrame; import javax.swing.JLabel; public class HelloWorldFrame extends JFrame { public static void main(String args[]) { HelloWorldFrame hw = new HelloWorldFrame(); hw.setVisible(true); } HelloWorldFrame() { JLabel jlbHelloWorld = new JLabel("Hello World"); hw.add(jlbHelloWorld); this.setSi }}</pre>
536	What is the correct code to get the ouput shown in figure? Figure:-	1	Y1	A	2	<pre>import java.awt.*; import java.applet.Applet; public class buttonDir extends Applet { public void init() { setLayout(new BorderLayout()); add("North", new Button("North")); add("South", new Button("South")); add("East", new Button("East")); add("West", new Button("West")); add("Center", new Button("Center")); }}</pre>

					
537	What is the effect of issuing a wait() method on an object ?	1	N	A	2
538	What is the layout of the given output Figure:- 	1	Y1	U	2
539	What is the length of the application box made by this program? import java.awt.*; import java.applet.*; public class myapplet extends Applet { Graphic g; g.drawString("A Simple Applet", 20, 20); }	1	N	A	2
540	What is the output of following program: import java.awt.*; import java.awt.event.*; import java.applet.*; public class app3 extends Frame { public static void main(String m[]) { Frame f=new Frame("BUTTON FRAME"); Button b=new Button("save"); f.add(b); f.setSize(100,200); f.setLayout(new FlowLayout()); f.setVisible(false); } }	1	N	A	2
541	What is the output of the following code: import java.awt.*; import java.applet.*; /* <applet code="GridLayoutDemo" width=300 height=200> </applet> */ public class GridLayoutDemo extends Applet { int n = 4; public void init() { setLayout(new GridLayout(n,n,10,10)); for(int i = 0; i <n; i++) { for(int j = 0; j <n; j++) { add(new Button("k")); } } }	1	Y2	A	2
542	What is the output of this program? Figure:-	1	Y1	A	2
					Two coincided lines

	<pre>public void paint(Graphics g) {     g.setColor(Color.red );     g.drawLine(10, 10, 200, 200);     g.setColor(Color.green);     g.drawLine(200, 200, 10, 10); }</pre>					
543	<p>What is the output of this program?</p> <p>Figure:-</p> <pre>import java.awt.*; import java.awt.event.*; public class ListTest extends Frame {     public ListTest()     {         List l=new List();         l.add("Item 1");         l.add("Item 2");         setLayout(new FlowLayout());         setVisible(true);         setSize(400,400);         Panel p1=new Panel();         add(p1);         p1.add(l);     }     public static void main(String args[])     {         ListTest l=new ListTest();     } }</pre>	1	Y1	A	2	Will display list
544	<p>What is the output of this program?</p> <p>Figure:-</p> <pre>import java.awt.*; import java.awt.event.*; public class ChoiceTest extends Frame {     public ChoiceTest()     {         Choice c=new Choice();         c.add("Item 1");         c.add("Item 2");         setLayout(new FlowLayout());         setVisible(true);         setSize(400,400);         Panel p1=new Panel();         add(p1);         p1.add(c);     }     public static void main(String args[])     {         ChoiceTest l;     } }</pre>	1	Y1	A	2	will not display any output
545	What is the purpose of following code? JTextField jtf=new JTextField(15)	1	N	U	2	Defining Textfield
546	What is the purpose of JTabbedPane?	1	N	U	2	JTabbedPane manages a set of components of linking them with tabs.
547	What is the purpose of ScrollPane	1	N	U	2	ScrollPane Displays component in a rectangular area
548	What is the purpose of TextArea	1	N	U	2	To handle multiline text input
549	What is the purpose of ToggleButton?	1	N	U	2	On or Off Switch

550	What is the result of executing the following Java class: import java.awt.*; public class FrameTest extends Frame { public Frame Test() { add (new Button("First")); add ( new Button( "Second")); add (new Button ("Third")); pack(); setVisible(true); } public static void main ( String args [] { new Frame Test ();}}}	1	N	A	2	Only the third button is displayed .
551	What is the use of panel in the program given below import java.awt.*; import java.applet.*; public class Demo5 extends Applet { public void init() { setLayout(new BorderLayout()); Panel p1=new Panel(); Panel p2=new Panel(); p1.setLayout(new FlowLayout()); p1.add(new TextField(20)); p1.add(new TextField(20)); p2.setLayout(new GridLayout(5,3)); p2.add(new Button("OK")); p2.add(new Button("Submit")); add(p1,BorderLayout.EAST); add(p2,BorderLayout.WEST); } /*<applet code=Demo5.class width=300 height=400> </applet> */	1	N	U	2	The appletviewer window is divided into two parts using two panels so that different layouts can be assigned to the two parts.
552	What is the use of setEchoChar() method?	1	N	U	2	to create password in symbol form
553	What is the use of setLayout() method	1	N	U	2	To install a new layout manager
554	What is the use of String getActionCommand( ) method of ActionEvent class?	1	N	U	2	To obtain the label(caption) of Button
555	What is use of GridLayout Manager ?	1	N	U	2	lays out components in a two-dimensional grid
556	What layout manager should you use so that every component occupies the same size in the container?	1	N	A	2	GridLayout
557	What pattern does the FlowLayout layout manager use to add components to container?	1	N	U	2	Left to right, top to bottom
558	what should you use to position a button within an application Frame so that the size of Button is NOT affected by frame size?	1	N	U	2	FlowLayout
559	What will be output for following program: import java.awt.*; import javax.swing.*; import javax.swing.tree.*; public class fee extends JApplet { JTree t1; DefaultMutableTreeNode d1,d2,d3; public void init() { d1=new DefaultMutableTreeNode("FY"); d2=new DefaultMutableTreeNode("SY"); d3=new DefaultMutableTreeNode("TY"); t1=new JTree(d2); d2.add(d3); d3.add(d1); add(t1); } } /* <applet code="feee.java" width=200 height=100> </applet> */	1	Y2	A	2	S1Q44O3
560	What will be output of following code. Import javax.swing>; Public class Test { Public static void main(String[] args) { JButtonjbtOK=new JButton("OK"); System.out.print(jbtOK.isVisible()) + ","; JFrame frame =new JFrame(); System.out.println(frame.isVisible()); } }	1	N	A	2	true,false
561	What will be the error in following code? import java.awt.*; import java.applet.*; public class Demo extends Applet { List l; public void init(){ l=new List(2); l.add("Satara"); l.add("Akola"); l.add("Pune",2); int x=getItem(2); } }	1	N	A	2	the return type of method getItem () is not match
562	What will be the correct code for following output? Figure:-	1	Y1	A	2	import java.awt.*; import java.awt.event.*; class ChoiceAction extends Frame { Choice c; Label l; public ChoiceAction() { // Set frame properties setTitle("Choice with ItemListener Demo"); setSize(400,400); setLayout(new FlowLayout()); setLocationRelativeTo(null); setVisible(true); // Create choice c=new Choice(); // Create label l=new Label(); // Add items c.add("Window98"); c.add("Window NT"); c.add("Solaris"); c.add("Maco"); // Add choice add(c); // Add label add(l); // Add item listener

						c.addItemListener(new ItemListener(){ public void itemStateChanged(ItemEvent ie) { l.setText("You selected "+c.getSelectedItem()); } }); } public static void main(String args[]) { new ChoiceAction(); } }
563	What will be the order of four items added Choice c1 = new Choice(); c1.addItem("First"); c1.addItem("Second"); c1.addItem("Third"); c1.insert("Lastadded",2);	1	N	U	2	First,Second,Lastadded,Third
564	When the size of component is change _____ event is generated.	1	N	A	2	ComponentEvent
565	When there is a switching condition like on or off, which control is used of following?	1	N	U	2	toggle button
566	When we create a Dialog box using the Constructor Dialog (Frame f,true) the dialog box is of which type ?	1	N	U	2	Modal
567	When we invoke repaint() for a java.awt.Component object, the AWT invokes the method:	1	N	U	2	update()
568	Where g is a graphics instance what will the following code draw on the screen? fillArc(45,90,50,50,90,180);	1	N	A	2	An arc bounded by a box of height 50, width 50, with a centre point of 45,90 starting at an angle of 90 degrees traversing through 180 degrees clockwise
569	Where the panel add on frame? import java.awt.*; public class CompLay extends Frame{ CompLay(){ Panel p = new Panel(); p.add(new Button("One")); p.add(new Button("Two")); p.add(new Button("Three")); add("South",p); setLayout(new FlowLayout()); setSize(300,300); setVisible(true); } public static void main(String argv[]){ CompLay cl = new CompLay(); } }	1	N	A	2	A.On left side of Frame
570	Whether the code is correct to generate the given output? /*<applet code="MyJRadioButton" width=900 height=900> </applet>*/ import java.awt.*; import javax.swing.*; public class MyJRadioButton extends JApplet { public void init() { Container c=getContentPane(); c.setLayout(new FlowLayout()); JRadioButton r1=new JRadioButton("A"); c.add(r1); JRadioButton r2=new JRadioButton("B"); c.add(r2); JRadioButton r3=new JRadioButton("C"); c.add(r3); add(r1); add(r2); add(r3); } } Figure:- 	1	Y1	A	2	Yes
571	which abstract class is the super class of all menu related classes?	1	N	U	2	MenuComponent

572	Which among the below is not the method applicable for Button in swing	1	N	U	2	setDisableIcon()
573	Which among the following is not correct regarding dialog?	1	N	U	2	Use of Dialog effects the working of Application
574	Which among the following is the feature of Jtable	1	N	U	2	all of these
575	Which are the valid ways to create DataInputStream streams?	1	N	A	2	new DataInputStream(new FileInputStream("in.dat"));
576	Which are true about the Container class?	1	N	U	2	All of the above
577	which AWT components are used to produce given output?	1	N	U	2	Button, Label, TextField, TextArea
578	Which AWT control is used to produce given output Figure:- 	1	Y1	U	2	GridLayout, Label, TextField, Button
579	Which checkbox will be selected in the following code ( Assume with main and added to a Frame) Frame myFrame = new Frame("Test"); CheckboxGroup cbg = new CheckboxGroup(); Checkbox cb1 = new Checkbox("First",true,cbg); Checkbox cb2 = new Checkbox("Second",true,cbg); Checkbox cb3 = new Checkbox("Third",false,cbg); cbg.setSelectedCheckbox(cb3); myFrame.add(cb1); myFrame.add(cb2); myFrame.add(cb3);	1	N	U	2	cb3
580	Which class can be used to represent a checkbox with a textual label that can appear in a menu?	1	N	U	2	Checkbox MenuItem
581	which class provides method for accessing a font's properties?	1	N	U	2	FontMetrics
582	Which classes are used to generate following output as shown in figure. Figure:-	1	Y1	U	2	Both options i and iii correct.

Which code is correct to generate the following output?

Figure:-

583

1

Y1

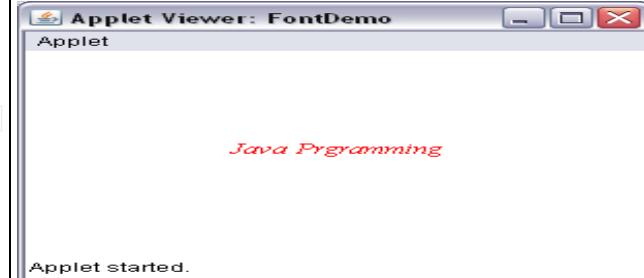

A

2

a) Scrollbar vert = new Scrollbar(Scrollbar.VERTICAL,0, 1, 0, 100); Scrollbar horz = new Scrollbar(Scrollbar.HORIZONTAL, 0, 1, 0, 100);

Which code will produce the out shown in figure

Figure:-

629	<p>Which layout manager can be used to get the following output?</p> <p>Figure:-</p>	1	Y1	U	2	BorderLayout

Which layout manager can be used to get the following output?

Figure:-

630

1 Y1 U 2 GridLayout

Which layout manager is shown in the output?

Figure:-

631

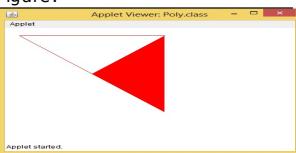

1 Y1 U 2 GridLayout

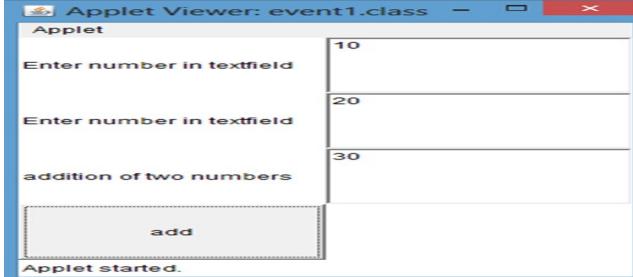

632 Which Layout Manager places component in one of the five region NORTH,SOUTH,WEST,EAST,CENTER.

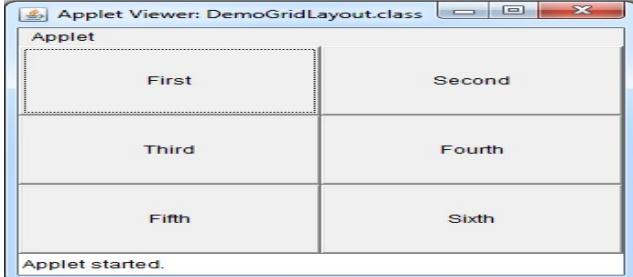

1 N A 2 BorderLayout

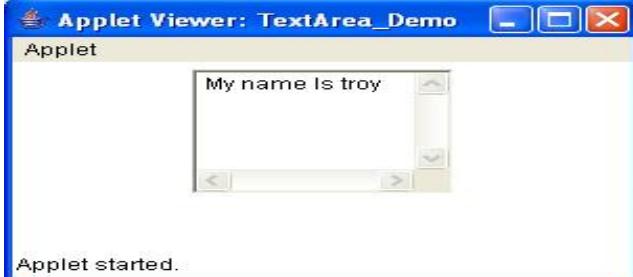

633 Which method executes only once?

1 N U 2 init()

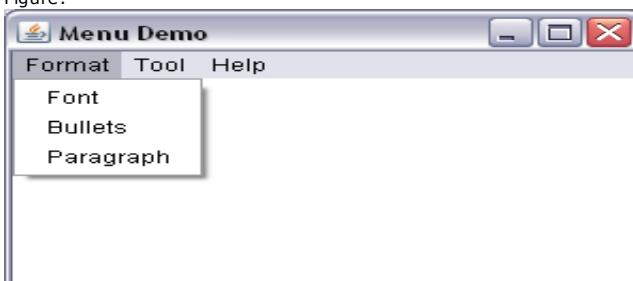

634	Which method is incorrect while creating menubar	1	N	U	2	MenuItem.addItem(MenuItem)
635	Which method is used to display title on titlebar of Frame?	1	N	U	2	setTitle(String title)
636	Which method is used to processes mouse click?	1	N	U	2	MouseClicked()
637	Which method is used to translate a mouse click on a specific point of the tree to a tree?	1	N	U	2	getPathForLocation()
638	Which method of Graphics class is to display "HelloWorld" on the Applet shown in figure. Figure:- 	1	Y1	U	2	drawString("HelloWorld",30,30)
639	Which method of the component class is used to set the position and the size of a component?	1	N	U	2	setBounds()
640	Which method shows the complete process in percent on the progress bar?	1	N	U	2	setStringPainted(boolean)
641	Which method specifies that the text and icon are horizontally aligned to the right in the button jbt.	1	N	U	2	jbt.setHorizontalTextPosition(JButton.RIGHT)
642	Which methods are used to draw the following output? Figure:- 	1	Y1	U	2	a)drawPolygon(),fillPolygon()
643	Which of following is true?	1	N	U	2	All the methods in the JButton class are inherited from the javax.swing.AbstractButton class
644	Which of the following applet tags is legal to embed an applet class named Test into a Web Pages ? <applet>Test</applet> width = 200 height = 100 >	1	N	A	2	B.<applet>Test</applet> Class width = 200 height = 100
	Which of the following are container classes? Figure:-					

						
645		1	Y1	U	2	Frame and Panel
646	Which of the following commands will set a layout manager that divides the container into 3 Columns & 4 Rows?	1	N	U	2	<code>setLayout( new GridLayout(4, 3) )</code>
647	Which of the following constructor creates a Checkbox?	1	N	U	2	<code>Checkbox(String str, boolean s, null)</code>
648	Which of the following create a list with five visible items and multiple selection enabled?	1	N	U	2	<code>new List(5,true)</code>
649	Which of the following creates a List with 3 visible items and multiple mode selection disabled?	1	N	U	2	<code>new List(3,false)</code>
650	Which of the following is not a AWT control	1	N	U	2	Panel
651	Which of the following is not a constructor of FileDialog?	1	N	U	2	<code>FileDialog()</code>
652	Which of the following is not a constructor of Jtree?	1	N	U	2	<code>JTree(int x)</code>
653	Which of the following layout mangers honours the preferred size of component( Multiple)	1	N	U	2	FlowLayout
654	Which of the following method adds item "I" to the List with deprecation warnings at the end of List?	1	N	U	2	<code>addItem("I")</code>
655	Which of the following method use to check whether the JCheckBox jchk is selected?	1	N	U	2	<code>jchk.isSelected()</code>
656	Which of the following method use to get the text or caption of the button jbt?	1	N	U	2	<code>jbt.getText()</code>
657	Which of the following methods can be used to change the size of a java.awt.Component object? (A) dimension() (B) setSize() (C) area() (D) size() (E) resize()	1	N	A	2	(B) & (E)
658	Which of the following methods can be used to change the size of a java.awt.Component object?	1	N	U	2	<code>setSize()</code>
659	Which of the following methods create a LineBorder?	1	N	U	2	B AND C
660	Which of the following options is correct about Layout Manager	1	N	U	2	Both B and C
661	Which of the following statement is for placing the frames upper left corner to (200,100)	1	N	A	2	<code>frame.setLocation(200,100)</code>
	Which of the following statement is used to create GridLayout in the output shown below? Figure:-					

662		1	Y1	U	2	GridLayout g=new GridLayout(3,2);
663	Which of the following statements are true i) Scrollbar is a component but not a Container ii)ScrollPane is a Container and performs its own scrolling	1	N	U	2	i and ii both are true
664	Which of the following statements are true?	1	N	A	2	ALL
665	Which of the follwing is true about FlowLayout	1	N	U	2	both A and B
666	Which of these classes can be added to any Container class, using the add method defined in Container class ?	1	N	U	2	Button
667	Which of these events will be notified if scroll bar is manipulated?	1	N	U	2	AdjustmentEvent
668	Which of these is not a constructor of the FileDialog?	1	N	U	2	FileDialog(Frame parent,int how)
669	Which of these methods are used to register a keyboard event listener?	1	N	U	2	addKeyListener()
670	Which of these methods can be used to determine the type of event?	1	N	U	2	getID()
671	Which of these methods can be used to know which key is pressed	1	N	U	2	getModifier()
672	Which of these methods returns the class of the object?	1	N	U	2	getClass()
673	Which one is not the Layout Manager	1	N	A	2	setLayout
674	Which one is the constructor of the Jtable?	1	N	U	2	JTable(Object data[ ][ ], Object colHeads[ ])
675	Which option is correct to adding Jtree in an Applet?	1	N	U	2	Create a Jtree Object, Create a JScrollPane object, Add the tree to the scrollpane and Add the scroll pane to the content pane of the applet.
676	which package contains color class?	1	N	U	2	java.awt
677	Which package is used to add progress bar in an application?	1	N	U	2	javax.swing.JProgressBar
678	Which part of program Below will show an error: import java.awt.*; import java.applet.*; import java.awt.event.*; public class Button1 extends Applet { MyButton b1; static int i=0; public void init() { b1=new MyButton("My Button "); add(b1); } class MyButton extends Button { public MyButton(String label) { super(); enableEvents(AWTEvent.ACTION_EVENT_MASK); } protected void processActionEvent(ActionEvent ae) { showStatus("Action Event :" + i++); super.processActionEvent(ae); } } }	1	N	A	2	super();
	which statement is required for following output? import java.awt.*; import java.applet.*; public class TextArea_Demo extends Applet { TextArea ta1; public void init() { ta1=new TextArea("My name Is troy",25,25); ta1.append(" name is khan "); } }					
	Figure:-					

			1	Y1	A	2	add(ta1)
679							
680		Which Statement is required to obtain given output by using following code <pre>public class fdemo extends Frame{ fdemo() { Button b1=new Button("Save"); Label l1=new Label("Name"); TextField t1=new TextField(10); add(l1); add(t1); add(b1); //Statement required here setSize(new Dimension(500,500)); setTitle("FlowLayout"); setVisible(true); } public static void main(String arg[]) { fdemo f=new fdemo(); } }</pre> <p>Figure:-</p> 	1	Y1	A	2	setLayout(new FlowLayout());
681		Which statement should be added to display button. <pre>import java.awt.*; import javax.swing.*; /* &lt;applet code="JButtonDemo" width=250 height=300&gt; &lt;/applet&gt; */ public class JButtonDemo extends JApplet { public void init() { Container contentPane = getContentPane(); contentPane.setLayout(new FlowLayout()); ImageIcon img = new ImageIcon("jpgIcon.jpg"); JButton jb = new JButton(img); } }</pre>	1	N	A	2	contentPane.add(jb);
		Which statements are missing in following program to get the output as shown in fig /*<applet code="GridBagDemo width=300 height=300> </applet>*/ import java.awt.*; import java.applet.*; public class GridBagDemo extends Applet { GridBagLayout gdb=new GridBagLayout(); GridBagConstraints c <pre>_____ : Button b1=new Button("One"); Button b2=new Button("Two"); Button b3=new Button("Three"); Button b4=new Button("Four"); Button b5=new Button("Five"); public void init() { _____ c.gridx=0;c.gridy=0;c.weightx=0.5; c.weighty=0.5; gdb.setConstraints(b1,c); c.gridx=1;c.gridy=0; gdb.setConstraints(b2,c); c.gridx=2;c.gridy=0; gdb.setConstraints(b3,c); c.gridx=0;c.gridy=1;c.gridwidth=3; c.ipady=20; c.fill=GridBagConstraints.BOTH; gdb.setConstraints(b4,c);</pre>

Q No	Question	To pic	Fig ure	Q Type	Mar ks	Answer
1	-----Is super class of all the events	2	N	R	1	EventObject
2	1. Which of these packages contains all the classes and methods required for even handling in Java?	2	N	R	1	java.awt.event
3	2. Which of these events is generated when the a window is closed?	2	N	R	1	WindowEvent
4	3 _____ method are used to register a keyboard event listener	2	N	R	1	addKeyListener()
5	3. Which of these methods can be used to know the degree of adjustment made by the user?	2	N	R	1	getValue()
6	A MenuItem object can generate _____ events.	2	N	R	1	ActionEvent
7	A source generates an event and sends it to _____ listeners that can handle the event	2	N	R	1	One or more
8	A _____ is an object that is notified when an event occurs	2	N	R	1	Listener
9	A _____ is generated when a component is added to or removed from a container.	2	N	R	1	ContainerEvent
10	ActionEvent Class is used for Which Controll ?	2	N	R	1	Button , List ,MenuItem
11	Adapter class belongs to the package	2	N	R	1	java.awt.event
12	Adapter Class provides_____	2	N	R	1	Empty implementation of all methods of a listener
13	An event is generated when the internal state of the event source is _____.	2	N	R	1	Changed
14	An object that would like to be notified of and respond to an event is	2	N	R	1	EventListener
15	At the root of the Java event class hierarchy is _____ which is the superclass for all events.	2	N	R	1	EventObject
16	Change in the state of an object is known as _____	2	N	R	1	Event
17	CheckBox implements following Listener Interface	2	N	R	1	ItemListener
18	ComponenetEvent is the superclass of _____.	2	N	R	1	All of the above
19	Event class is defined in which of these libraries?	2	N	R	1	java.awt.event
20	Event Listeners are_____	2	N	R	1	Interfaces
21	EventObject class present in_____ package.	2	N	R	1	java.util
22	EventObject contains two important methods:_____ and_____	2	N	R	1	getSource() and toString()
23	Events are supported by the _____	2	N	R	1	java.awt.event
24	Focus events are fired whenever a component _____ the focus	2	N	R	1	gains or loses
25	FocusEvent is subclass of which of these calssses ?	2	N	R	1	ComponenEvent
26	Generated when a window is activated, de-activated, closed, de-activated,de-iconified, iconified, opened or quit	2	N	R	1	WindowEvent

27	getID() method is provided by _____ class.	2	N	R	1	AWTEvent
28	getKeyChar( ) and getKeyCode( ) methods belongs to which event class?	2	N	R	1	KeyEvent
29	getSource() is method of which class	2	N	R	1	EventObject
30	How many types of component events are in Java?	2	N	R	1	4
31	How to obtain the command name for invoking ActionEvent?	2	N	R	1	Using getActionCommand( ) method.
32	How to remove the event listener?	2	N	R	1	Using removeTypeListener( ) method.
33	If a class extends the ActionListener interface, it must contain a method called. _____.	2	N	R	1	actionPerformed()
34	If scroll bar is manipulated..... event will be notified.	2	N	R	1	AdjustmentEvent
35	If we close an applet's window _____ event will be generated.	2	N	R	1	WindowEvent
36	If _____ is manipulated AdjustmentEvent event will be notified .	2	N	R	1	ScrollBar
37	In EventObject, which method is used to determine the type of event?	2	N	R	1	getSource()
38	In java an event is an _____ which specifies the change of state in the source.	2	N	R	1	Object
39	In Java, events are all the activities that occur between	2	N	R	1	A and B
40	In which package class AWTEvent defined	2	N	R	1	java.awt package;
41	In which package the methods for receiving and processing events are defined	2	N	R	1	java.awt.event
42	In which places can put the event handling code	2	N	R	1	All mentioned above
43	Interface used to handle menu events is	2	N	R	1	ActionListner
44	ItemListener event defines this method...	2	N	R	1	itemStateChanged()
45	KeyEvent is a subclass of _____	2	N	R	1	InputEvent
46	KeyListener interface has got _____ methods	2	N	R	1	3
47	mouseDragged() method present in which listener	2	N	R	1	MouseMotionListener
48	MouseEvent is subclass of which of these classes?	2	N	R	1	InputEvent
49	Name the event that gets generated when a button is clicked.	2	N	R	1	ActionEvent
50	Name the method defined in EventObject class that returns the Object generated from the event.select the one correct answer.	2	N	R	1	getSource()
51	On which awt component event listener can not be aplied	2	N	R	1	Label
52	public void mouseMoved(MouseEvent me) is method of _____	2	N	R	1	MouseMotionListener
53	Scrollbar control generates ..... Event.	2	N	R	1	AdjustmentEvent
54	Select the proper constructor of EventObject class	2	N	R	1	EventObject(Object src)
55	Some of the event listener interfaces are_____	2	N	R	1	All of these
56	Source object can register only one listener	2	N	R	1	False
57	Text changed ( ) method is used for_____.	2	N	R	1	when there is changes in text occurs
58	TextEvent defines the following integer constatnt:	2	N	R	1	TEXT_VALUE_CHANGED
59	TextField generates which events	2	N	R	1	ActionEvent,TextEvent
60	The constructor which the Text Event class defines.	2	N	R	1	TextEvent(Object source, int event_type)
61	The default layout of the contentPane of a JApplet is _____.	2	N	R	1	BorderLayout

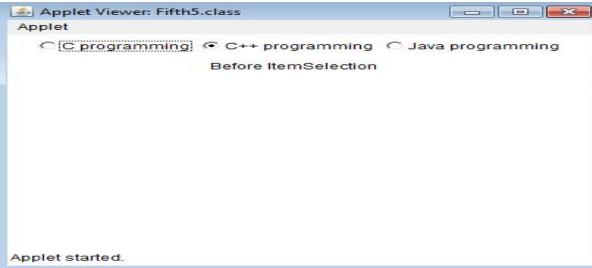

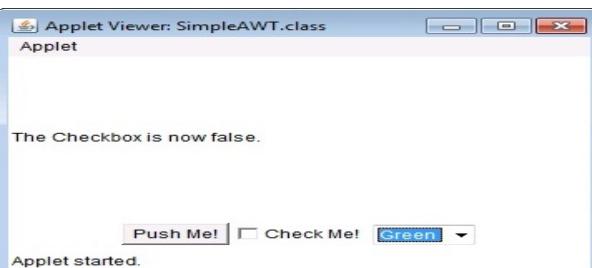

62	The delegation Event model is based on the concept of	2	N	R	1	Both A and B
63	The delegation model is used as a standard for	2	N	R	1	Event Listeneing
64	The Following are event classes	2	N	R	1	Action Event,FocusEvent ,Container Event
65	The Following are method of mouse event class	2	N	R	1	getClickCount ( )
66	The following method is an abstract method of TextListener interface.	2	N	R	1	textChanged(TextEvent obj)
67	The following method must be overriden in order to handle KeyEvent.	2	N	R	1	All of the mentioned
68	The method in the ActionEvent _____ returns the action command of the button	2	N	R	1	getActionCommand()
69	The method that is used for registering keyboard event is knows as _____.	2	N	R	1	addKeyListener ()
70	The MouseEvent class does not defines the _____ integer constant.	2	N	R	1	MOUSE_WHEELMOVE
71	The MouseListener interface is used to make mouse handling	2	N	R	1	True
72	The MouseListener's _____ method is called after mouse button is released	2	N	R	1	public void mouseClicked(MouseEvent e)
73	The MouseMotionListener Interface has _____ method.	2	N	R	1	void mouseDragged(MouseEvent me)
74	The signature for the registration method for an ActionEvent should be	2	N	R	1	public void addActionListener(ActionListener l)
75	The superclass of ContainerEvent, FocusEvent and WindowEvent is _____ .	2	N	R	1	ComponentEvent
76	The _____ interface is used to handle button events:	2	N	R	1	ActionListener
77	The _____ interface handles list events:	2	N	R	1	ItemListener,ActionListener
78	The _____ interface handles choice events.	2	N	R	1	ItemListener
79	Till now two models have been introduced in java for:	2	N	R	1	Receiving and processing events
80	To write event driven programs using AWT or Swings, Use?	2	N	R	1	Option A and B
81	What is a listener in context to event handling?	2	N	R	1	A listener is a object that is notified when an event occurs.
82	What is a listener in the context to event handling?	2	N	R	1	A listener is an object that notified when event had occurred.
83	What is an event in Delegation Event model ?	2	N	R	1	An event is an object that describes a state change in a source.
84	What is event handling?	2	N	R	1	Controlling Event
85	What is use of MouseMotion Listener Interface?	2	N	R	1	mouseDragged()
86	What kind of event is fired when the user selects an item from a menu?	2	N	R	1	an ActionEvent
87	When a component obtains keyboard focus, which method is invoked?	2	N	R	1	void focusGained(FocusEvent fe)
88	When component is added or a removed from container,..... generated?	2	N	R	1	ContainerEvent
89	When key is pressed which event is occurred	2	N	R	1	Both A and B
90	When list item is double clicked, which event is generated?	2	N	R	1	ActionEvent
91	When the size of component is changed ,----- event is generated	2	N	R	1	ComponentEvent
92	When two or more objects are added as listeners for the same event, which listener is first invoked to handle the event?	2	N	R	1	There is no way to determine which listener will be invoked first.
93	when we need to use check boxes or item from the list or use a checkable menu,an _____ is generated.	2	N	R	1	ItemEvent
94	Which of the following are true	2	N	R	1	The event - inheritance model is more efficient than the event - delegation model.
95	Which among the following is not an AWT Event	2	N	R	1	AdjustEvent
96	Which among the following is true for Adaptor Classes?	2	N	R	1	Adaptor classes reduce Complexity of event Listener.

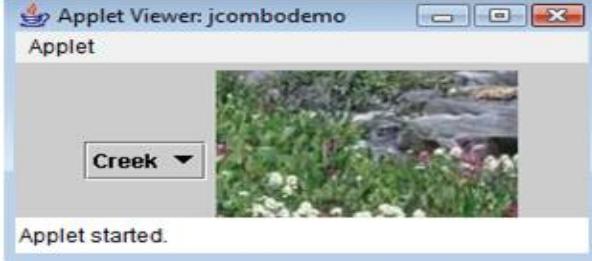

97	Which are various methods of WindowListener interface from following?	2	N	R	1	All above
98	Which are WindowEvent class defines integer constants ?	2	N	R	1	All The Above
99	Which class is at the root in Java event class hierarchy?	2	N	R	1	EventObject
100	Which class is used for this Processing Method processActionEvent( )?	2	N	R	1	Button,List,MenuItem
101	Which event is generated by List	2	N	R	1	Both A and B
102	Which Event is generated by Scrollbar class?	2	N	R	1	AdjustmentEvent
103	Which is a method of the MouseMotionListener Interface?	2	N	R	1	public void mouseDragged(MouseEvent )
104	Which is not the correct listener	2	N	R	1	TextAreaListener
105	Which is the interface of MouseEvent class ?	2	N	R	1	MouseListener
106	Which Listener handles all List related Events	2	N	R	1	ItemListener
107	Which method does display the message whenever there is an item selection or deselection of the CheckboxMenuItem menu?	2	N	R	1	itemStateChanged method.
108	Which method is applicable if alphanumeric key is pressed.	2	N	R	1	keyTyped
109	Which method is defined when action event is occurs?	2	N	R	1	actionPerformed()
110	Which Method Is used to register a mouse Motion Listner	2	N	R	1	addMouseMotionListener()
111	Which method used for return for mouse co-ordinate ?	2	N	R	1	getX() ,getY()
112	Which methods are defined by ComponentListener	2	N	R	1	void componentHidden(ComponentEvent obj)
113	Which of the following are correct event handling methods	2	N	R	1	mousePressed(MouseEvent e){}
114	Which of the following are true?	2	N	R	1	Both A and B
115	Which of the following componant generate ActionEvent?	2	N	R	1	none
116	Which of the following component can generate ItemEvent?	2	N	R	1	CheckBoxMenuItem
117	Which of the following is not event class is Java?	2	N	R	1	ClickEvent
118	Which of the following is the highest class in the event delegation class hierarchy?	2	N	R	1	java.util.EventObject
119	Which of the following is the legal adapter classes in java.	2	N	R	1	MouseAdapter
120	Which of the following Listeners have their Adapter class	2	N	R	1	WindowListener
121	Which of the following method is used to register a listener to a button ?	2	N	R	1	addActionListener(ActionListener obj)
122	Which of these event is generated when a button is pressed?	2	N	R	1	ActionEvent
123	Which of these methods can be used to obtain the command name for invoking ActionEvent object?	2	N	R	1	getActionCommand()
124	Which of these a AdapterClass	2	N	R	1	KeyAdapter class
125	Which of these adapter class from follwing?	2	N	R	1	MouseAdapter
126	Which of these are constants defined in Window Event class	2	N	R	1	All the Above
127	Which of these constant value will change when the button at the end of scroll bar was clicked to increase its value?	2	N	R	1	UNIT_INCREMENT
128	Which of these event is generated when computer gains or loses input focus?	2	N	R	1	FocusEvent
129	which of these event will be notified if scrollbar is manipulated?	2	N	R	1	AdjustmentEvent()
130	Which of these events is generated when a window is minimized?	2	N	R	1	Both a and b

131	Which of these events is generated when the component is added or removed?	2	N	R	1	ContainerEvent
132	Which of these events will be generated if we close an Frame's window?	2	N	R	1	WindowEvent
133	Which of these interfaces define a method actionPerformed()?	2	N	R	1	ActionListener
134	Which of these is super class of WindowEvent class?	2	N	R	1	ComponentEvent
135	Which of these is superclass of all Adapter classes?	2	N	R	1	Applet
136	Which of these methods are used to determine the type of adjustment event?	2	N	R	1	getAdjustmentType()
137	Which of these methods are used to register a mouse motion listener?	2	N	R	1	addMouseMotionListener().
138	Which of these methods can be used to know the degree of adjustment made by the user?	2	N	R	1	getValue()
139	Which of these methods is defined in MouseMotionAdapter class?	2	N	R	1	mouseDragged()
140	Which of these methods is used to get x coordinate of the mouse	2	N	R	1	getX()
141	Which of these methods is used to get Y coordinate of the mouse?	2	N	R	1	getY()
142	Which of these methods is used to know the full URL of an URL object?	2	N	R	1	getH0st()
143	Which of these methods is used to obtain the object that generated a ComponentEvent.	2	N	R	1	getContainer()
144	Which of these methods is used to obtain the object that generated a WindowEvent?	2	N	R	1	getWindow()
145	Which of these methods will be invoked if a character is generated?	2	N	R	1	keyTyped()
146	Which of these methods will respond when you click any button by mouse?	2	N	R	1	All of the mentioned
147	Which of these methods will respond when you click any button by mouse?	2	N	R	1	All of these
148	Which of these not a constants defined in ComponentEvent class?	2	N	R	1	COMPONENT_SIZED
149	Which two parameters are required for JTable constructor to create a table?	2	N	R	1	Data array and Column Headings
150	windowEvent is a subclass of _____	2	N	R	1	ComponentEvent()
151	_____ generates action events when an item is double-clicked.	2	N	R	1	List
152	_____ is generated when checkbox is clicked, list item is clicked, choice selection is made or checkable menu item is selected or deselected.	2	N	R	1	ItemEvent
153	_____ class provides an empty implementation of all methods in an Event Listener interface?	2	N	R	1	Adapter
154	_____ generates an event and sends it to one or more listeners.	2	N	R	1	Event Source
155	ActionEvent: It indicates the component-defined events occurred b)MouseEvent: Events generated during the mouse operation for the object c) FocusEvent: This class indicates about the focus where the focus has gained or lost by the object. d) KeyEvent: It is generated When key is pressed	2	Y2	U	2	All a,b,c and d are correct
156	For the following code select the method that can be used to handle event. <pre>importjava.awt.event.*; import java.awt.*; importjava.applet.*; public class checkbackg extends Applet implements ItemListener { Checkbox m1,m2,m3; public void init() { m1=new Checkbox("A"); m2=new Checkbox("B"); m3=new Checkbox("C"); add(m1); add(m2); add(m3); m1.addItemListener(this); m2.addItemListener(this); } public void _____(ItemEvent ie) { if(ie.getSource()==m1) setBackground(Color.red); if(ie.getSource()==m2) setBackground(Color.green); } } /*&lt;applet code=checkbackg.class height=150 width=150&gt; &lt;/applet&gt;*/</pre>	2	N	A	2	itemStateChanged(ItemEvent ie)
157	1)For Key events, KeyEvent class is used 2)For Mouse motion events, MouseEvent class is used 3)For Component events, ComponentEvent class is used 4)For Window events, WindowEvent class is used	2	N	A	2	1,2,3 are true
	1. What will be the output of the following code? import java.awt.*; import java.applet.*; import					

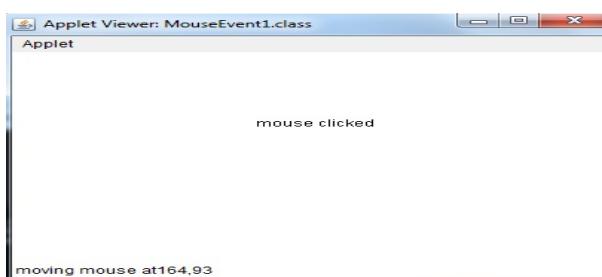

158	<pre>java.awt.event.*; public class adm extends Applet { public void init() { addMouseMotionListener(new mma1(this)); } } class mma1 extends MouseAdapter { adm a; public mma1(adm a) { this.a=a; } public void mouseDragged(MouseEvent me) { a.showStatus("mouse dragged"); } } /*&lt;applet code="adm" width=500 height=500&gt;&lt;/applet&gt;*/</pre>	2	Y2	U	2	S1-chapter2(Q1.C).jpg
159	<pre>1.Which line of code is missing in following code and error statement code line import java.awt.*; import java.awt.event.*; import java.applet.*; /*&lt;applet code="KeyEventDemo.class" width=400 height=400&gt; &lt;/applet&gt;*/ public class KeyEventDemo extends Applet implements _____ { String msg=""; public void init() { addKeyListener(this); } public void keyPressed(KeyEvent e) { showStatus("Key Down"); int key=e.getKeyCode(); repaint(); } public void keyTyped(KeyEvent e) { msg+=e.getKeyChar(); repaint(); } public void paint(Graphics g) { g.drawString(msg,10,20); } }</pre>	2	N	A	2	KeyListener and public void keyReleased(KeyEvent e) { showStatus("Key up"); }
160	<pre>4. What will happen when you attempt to compile and run the following code? import java.awt.*; import java.awt.event.*; public class mouseClick extends Frame implements MouseListener{ public static void main(String argv[]){ mouseClick s = new MClick(); } MClick(){ this.addMouseListener(this); } public void mouseClicked(MouseEvent e){ System.out.println(e.getWhen()); } }</pre>	2	N	A	2	Error not override MouseListener methods ,class name not found
161	<pre>5. Which statement is incorrect or missing in the following code import java.awt.*; import java.awt.event*; import javax.swing.*; public class radio extends JApplet implements ActionListener { public void init() { c.setLayout(new FlowLayout()); JRadioButton b1=new JRadioButton("Red"); b1.addActionListener(this); c.add(b1); JRadioButton b2=new JRadioButton("Green"); b2.addActionListener(this); c.add(b2); JRadioButton b3=new JRadioButton("Blue"); b3.addActionListener(this); c.add(b3); ButtonGroup bg=new ButtonGroup(); bg.add(b1); bg.add(b2); bg.add(b3); } public void actionPerformed(ActionEvent e){ setBackground(e.getActionCommand()); } }</pre>	2	N	A	2	Container c=getContentPane();
162	<p>A Frame's background color is set to Color.Yellow, and a Button's background color is to Color.Blue. Suppose the Button is added to a Panel, which is added to the Frame. What background color will be used with the Panel?</p>	2	N	A	2	Color.Yellow.
163	<p>A Java exception is an instance of _____.</p>	2	N	U	2	Throwable
164	<p>Abstract Methods of MouseMotion Listener Interface.</p>	2	N	A	2	mouseMoved(MouseEvent) mouseDragged(MouseEvent)
165	<p>Action event is applied on</p>	2	N	U	2	Button, TextField, List, Menu
166	<p>Adapter classes are similar to EventListener interfaces?</p>	2	N	A	2	True
167	<pre>Add the missing statement.. import java.awt.*; import java.awt.event.*; import java.applet.*; /*&lt;applet code="ButtonDemo" width=250 height=150&gt; &lt;/applet&gt; */ public class ButtonDemo extends Applet implements ActionListener { String msg = ""; Button yes, no, maybe; public void init() { yes = new Button("Yes"); maybe = new Button("Undecided"); add(yes); add(no); add(maybe); yes.addActionListener(this); no.addActionListener(this); maybe.addActionListener(this); } public void actionPerformed(ActionEvent ae) { String str = ae.getActionCommand(); if(str.equals("Yes")) { msg = "You pressed Yes.";} else if(str.equals("No")) { msg = "You pressed No.";} else { msg = "You pressed Undecided.";} repaint(); } public void paint(Graphics g) { g.drawString(msg, 6, 100); } }</pre>	2	N	A	2	no=new Button("NO")
168	<pre>After inserting which statement in following program, output window will be closed when close button is clicked import java.awt.event.*; import java.awt.*; class Demo extends Frame { Demo() { setSize(500,500); setVisible(true); setTitle("My Window"); } public static void main(String args[]) { new Demo(); } } class AdapterDemo extends WindowAdapter { Demo d1; AdapterDemo(Demo d) { d1=d; } public void windowClosing(WindowEvent we) { d1.dispose(); } }</pre>	2	N	A	2	addWindowListener(AdapterDemo(this));
169	<p>An event adapter can be implemented using _____.</p>	2	N	U	2	All of Above
170	<p>An event is generated when internal state of event source is _____</p>	2	N	A	2	changed
	<p>Analyse the following code and Find out errors. import java.awt.*; import java.applet.*; import java.awt.event.*; /*&lt;applet code="Demo" width=200 height=80&gt; &lt;/applet&gt;*/ public class Demo extends Applet implements ItemListener { public void init() { Label jl1=new Label("</p>					

171	Select Color."); Choice ch=new Choice(); ch.addItem("Red"); ch.addItem("Green"); ch.addItem("Blue"); TextField jtf1=new TextField(12); add(jlb1); add(ch); add(jtf1); ch.addItemListener(this); } public void itemStateChanged(ItemEvent ie) { String s=(String)ie.getItem(); jtf1.setText(s); } }	2	N	A	2	Error is in the statement String s=(String)ie.getItem();

501	Which Event is /are handled on List Component	2	N	A	2 Any of one depends on single click and double click
502	Which Event is generated when a component is added to or removed from a container	2	N	U	2 ContainerEvent
503	Which Event is generated when applet window is closed by user?	2	N	U	2 WindowEvent
504	Which event is generated when the position of scrollbar is changed. Select the correct answer.	2	N	A	2 AdjustmentEvent
505	which Event is required in to minimize and close the object drawn by the following code <pre>import java.awt.*; import java.awt.event.*; /*&lt;applet code = "Application window " height = 300 width = 200&gt; &lt;/applet&gt;*/ public class ApplicationFrame extends Frame { public ApplicationFrame () { super ("Application Window"); setSize(200,200); } public static void main (String [] args) { Application frame aw = new public Application Frame (); aw. set Visiible (true); } }</pre>	2	N	A	2 C. Window listener
506	Which import statement is used for following program. /* <applet code=exp1.class width=200 height=200> </applet> */ public class exp1 extends Applet { public void init() { setLayout(new BorderLayout()); add(new Button("TOP"),BorderLayout.NORTH); add(new Button("BOTTOM"),BorderLayout.SOUTH); add(new Button("RIGHT"),BorderLayout.EAST); add(new Button("LEFT"),BorderLayout.WEST); } }	2	N	A	2 import java.awt.event.*; import java.awt.*; import java.applet.*;
507	Which is missing statement in the following code <pre>import java.awt.*; import java.awt.event.*; import javax.swing.*; import java.applet.*; /*&lt;applet code="JRadio1" width=300 height=100&gt; &lt;/applet&gt;*/ public class JRadio1 extends JApplet implements ActionListener { Container ContentPane=getContentPane(); JTextField tf; public void init() { ContentPane.setLayout(new FlowLayout()); JRadioButton r1=new JRadioButton("Red"); r1.addActionListener(this); ContentPane.add(r1); JRadioButton g1=new JRadioButton("Green"); ContentPane.add(g1); JRadioButton b1=new JRadioButton("Blue"); b1.addActionListener(this); ContentPane.add(b1); ButtonGroup bg=new ButtonGroup(); bg.add(r1); bg.add(g1); bg.add(b1); tf=new JTextField(5); ContentPane.add(tf); } public void actionPerformed(ActionEvent ae) { String s; s=ae.getActionCommand(); if(s=="Red") ContentPane.setBackground(Color.red); else if(s=="Green") ContentPane.setBackground(Color.green); else if(s=="Blue") ContentPane.setBackground(Color.blue); } }</pre>	2	N	A	2 g1.addActionListener(this);
508	Which is the method of keyListener Interface?	2	N	U	2 All of above
509	Which line of code is missing in following code <pre>import java.awt.*; import java.awt.event.*; import java.applet.*; /*&lt;applet code="KeyEventDemo.class" width=400 height=400&gt; &lt;/applet&gt;*/ public class KeyEventDemo extends Applet implements KeyListener { String msg=""; public void init() { addKeyListener(this); } public void keyPressed(KeyEvent e) { showStatus("Key Down"); int key=e.getKeyCode(); repaint(); } public void keyTyped(KeyEvent e) { msg+=e.getKeyChar(); repaint(); } public void paint(Graphics g) { g.drawString(msg,10,20); } }</pre>	2	N	A	2 public void keyReleased(KeyEvent e) { showStatus("Key up"); }
510	Which line of code is missing in following code and error statement code line <pre>import java.awt.*; import java.awt.event.*; import java.applet.*; /*&lt;applet code="KeyEventDemo.class" width=400 height=400&gt; &lt;/applet&gt;*/ public class KeyEventDemo extends Applet implements KeyListener { String msg=""; public void init() { addKeyListener(this); } public void keyPressed(KeyEvent e) { showStatus("Key Down"); int key=e.getKeyCode(); repaint(); } public void keyTyped(KeyEvent e) { msg+=e.getKeyChar(); repaint(); } public void paint(Graphics g) { g.drawString(msg,10,20); } }</pre>	2	N	A	2 KeyListener public void keyReleased(KeyEvent e) { showStatus("Key up"); }
	which listener is missing in following code.? import java.awt.*; import java.awt.event.*; import				

511	<pre>java.applet.*; public class TextField_Demo extends Applet implements ActionListener { Label l1,l2; TextField t1,t2; String msg; public void init() { l1=new Label("Name :"); l2=new Label("Pass :"); t1=new TextField(20); t2=new TextField(20); t2.setEchoChar('*'); add(l1); add(t1); add(l2); add(t2); t1.addActionListener(this); t2.addActionListener(this); } public void actionPerformed(ActionEvent ae) { repaint(); } public void paint(Graphics g) { msg="Name : "; msg+=t1.getText(); g.drawString(msg,6,100); msg="Selected text : "; msg+=t1.getSelectedText(); g.drawString(msg,6,200); msg="Pass : "; msg+=t2.getText(); g.drawString(msg,6,300); }</pre>	2	N	A	2	ActionListener
512	<p>Which Listener is required here to handle current event Figure:-</p> 	2	Y1	A	2	itemListener
513	<p>Which Listener is required to handle event Figure:-</p> 	2	Y1	A	2	ActionListener
514	<p>which Listeners are required for following output. Figure:-</p> 	2	Y1	A	2	MouseListener, MouseMotionListener
515	<p>Which method is missing in the code given below :import java.awt.*; import java.awt.event.*; class Aevent extends Frame implements ActionListener{ TextField tf; Aevent (){ tf=new TextField (); tf.setBounds(60,50,170,20); Button b = new Button ("click me " ) b.setBounds</p>	2	N	A	2	b.addActionListener()

	(100,120,80,30); add ( b);add(tf); setSize(3600,300); setLayout(null); setVisible (true); } public void actionPerformed (ActionEvent e ) { tf.setText("Welcome"); } public static void main ( String args [] ) { new AEvent(); } }					
516	Which method ***** is missing in following program. import java.awt.*; import java.awt.event.*; class FrameDemo extends Frame { FrameDemo() { addWindowListener(new MyWindowAdapter()); } public static void main(String args[]) { FrameDemo f=new FrameDemo(); f.setSize(100,200); f.setTitle("Frame window"); f.setVisible(true); } public void paint(Graphics g) { g.drawString("this is a frame",100,200); } class MyWindowAdapter extends WindowAdapter { public void ***** (WindowEvent we) { System.exit(0); } } }	2	N	A	2	windowClosing()
517	Which method identifies the type of an event generated. Select the one correct answer.	2	N	U	2	getID()
518	Which method is Applicable for ItemListener interface ?	2	N	R	2	itemStateChanged(ItemEvent e)
519	Which method is missing in following program. import java.awt.*; import java.awt.event.*; import java.applet.*; /* <applet code="MouseEventsapp" width=300 height=100> </applet> */ public class MouseEventsapp extends Applet implements MouseMotionListener { String msg = ""; int mouseX = 0, mouseY = 0; public void init() { addMouseMotionListener(this); } public void mouseDragged(MouseEvent me) { mouseX = me.getX(); mouseY = me.getY(); msg = "*"; showStatus("Dragging mouse at " + mouseX + ", " + mouseY); repaint(); } public void paint(Graphics g) { g.drawString(msg, mouseX, mouseY); } }	2	N	A	2	mouseMoved()
520	Which method is missing in following program. import java.awt.*; import java.awt.event.*; import java.applet.*; /* <applet code="MouseEventsapp" width=300 height=100> </applet> */ public class MouseEventsapp extends Applet implements MouseListener { String msg = ""; int mouseX = 0, mouseY = 0; // coordinates of mouse public void init() { addMouseListener(this); } public void mouseClicked(MouseEvent me) { mouseX = 0; mouseY = 10; msg = "Mouse clicked."; repaint(); } public void mouseEntered(MouseEvent me) { mouseX = 0; mouseY = 10; msg = "Mouse entered."; repaint(); } public void mouseExited(MouseEvent me) { // save coordinates mouseX = 0; mouseY = 10; msg = "Mouse exited."; repaint(); } public void mousePressed(MouseEvent me) { msg = "Down"; repaint(); } public void paint(Graphics g) { g.drawString(msg, mouseX, mouseY); } }	2	N	A	2	mouseReleased()
521	which method is required to register mouse listener to awt components	2	N	A	2	addMouseListener
522	which method is required to handle the button event as shown in following image ? //Experiment no.05 //Program for Handling Events import java.awt.*; import java.applet.*; import java.awt.event.*; public class DemoEvent extends Applet implements ActionListener { TextField t1,t2,t3; Label l1,l2,l3; Button b1,b2,b3,b4; public void init() // Applet Initialized { t1 = new TextField(5); t2 = new TextField(5); t3= new TextField(5) l1 = new Label ("First NO"); l2 = new Label ("Second No") l3 = new Label ("Add/Sub/Div/Mul is :"); b1.addActionListener(this); b2.addActionListener(this) b3.addActionListener(this); b4.addActionListener(this); GridLayout g= new GridLayout(5,2); Set Layout (g); add (l1)add(t1);add(l2);add(t2); add (l3)add(t3);add(b1);add(b2); add(b3); add(b4); } //expected here { if (e.getSource() ==b1) int n1=Integer.parseInt(t1.getText()); int n2=Integer.parseInt(t2.getText()); int n3 =n1+n2; l3.setText("Addition is:"); t3.setText(Integer.toString(n3)); } if (e.getSource() ==b2) int n1=Integer.parseInt(t1.getText()); int n2=Integer.parseInt(t2.getText()); int n3 =n1-n2; l3.setText("Subtraction is:"); t3.setText(Integer.toString(n3)); } if (e.getSource() ==b3) int n1=Integer.parseInt(t1.getText()); int n2=Integer.parseInt(t2.getText()); int n3 =n1*n2; l3.setText("Multiplication is:"); t3.setText(Integer.toString(n3)); } if (e.getSource() ==b4) int n1=Integer.parseInt(t1.getText()); int n2=Integer.parseInt(t2.getText()); int n3 =n1/n2; l3.setText("Division is:"); t3.setText(Integer.toString(n3)); } } /* <Applet code ="DesmoEvent.class" height="150" width ="250"> */	2	N	A	2	D. public void actionPerformed (ActionEvent event )
523	Which method is used to display icon on a component?	2	N	U	2	setIcon(ImageIcon i)
524	Which of the following are valid return types, for listener methods ?	2	N	A	2	void
525	Which of the constant(s) from following constants is defined in WindowEvent class?	2	N	U	2	ALL ABOVE

526	Which of the following are true?	2	N	U	2	A and C
527	Which of the following are true?	2	N	U	2	Button object may generate an ActionEvent
528	Which of the following code is required to display output in table format.	2	N	U	2	Container c1=getContentPane(); c1.setLayout(new GridLayout());
529	which of the following components generate item event	2	N	A	2	Button
530	Which of the following does NOT generate GUI events?	2	N	U	2	Displaying the text in a label.
531	Which of the following does not have its default Layout as BorderLayout	2	N	U	2	Panel
532	Which of the following event of KeyEvent class is generated when a character is pressed?	2	N	U	2	All of above
533	Which of the following generates action event?	2	N	U	2	Button
534	Which of the following handles event in Event Delegation Model?	2	N	U	2	Listener
535	Which of the following integer constants are defined by AdjustmentEvent class that can be used to identify adjustment events? 1. BLOCK_DECREMENT 2. BLOCK_INCREMENT 3. TRACK 4. UNIT_DECREMENT 5. UNIT_INCREMENT	2	N	A	2	All are defined
536	which of the following is not type of KeyEvent class	2	N	U	2	KEY_DOWN
537	Which of the following is the highest class in the event delegation class hierarchy? Figure:- 	2	N	U	2	java.util.EventObject
538	Which of the following methods of ItemListener must be overridden in order to handle ItemEvent?	2	N	U	2	public void itemStateChanged(ItemEvent obj)
539	Which of the following MouseMotionListener interface methods?	2	N	U	2	mouseDragged(MouseEvent me), mouseMoved(MouseEvent me)
540	Which of the following statements are true? A. All events will be processed in the order, the listener were added. B. Using the adapter approach to event handling means creating blank method bodies for all event methods. C. A component may have multiple listeners associated with it. D. Listeners may be removed once added.	2	N	U	2	C and D
541	Which of the following statements are true?	2	N	A	2	JButton has a constructor new JButton(Action) that enables you to associate an instance of Action to the menu.
542	Which of the following statements is true about MouseMotionListener?	2	N	U	2	All of the mentioned
543	Which of the following statements registers a panel object p as a listener for a button variable jbt?	2	N	U	2	jbt.addActionListener(p)
544	Which of the following component cannot be registered with actionPerformed() method of ActionListener?	2	N	U	2	CheckBox
545	Which of these are constants defined in WindowEvent class?	2	N	U	2	All of the mentioned
546	Which of these are integer constants defined in ActionEvent class?	2	N	A	2	ALL of the mentioned
547	Which of these are integer constants of TextEvent class?	2	N	U	2	TEXT_VALUE_CHANGED
548	Which of these are integer constants of ComponentEvent class?	2	N	A	2	All of the mentioned
549	Which of these constant values will change when the button at the end of scroll bar was clicked to increase its value?	2	N	U	2	UNIT_INCREMENT

550	Which of these event will be generated if we close an applet window?	2	N	U	2	WindowEvent
551	Which of these events are notified by List?	2	N	U	2	both a and b
552	Which of these events is generated when a button is pressed ?	2	N	U	2	ActionEvent
553	Which of these events is generated when the component is added or removed?	2	N	U	2	ContainerEvent
554	which of these events will be generated if we close an applet's window?	2	N	A	2	WindowEvent
555	Which of these Events will be notified if scroll bar is manipulated	2	N	U	2	AdjustmentEvent
556	which of these Integer Constant Are defined in ActionEventClass	2	N	A	2	all of the these
557	which of these interfaces define a method actionPerformed()?	2	N	U	2	ActionListener
558	Which of these interfaces handles the event when a component is added to a container?	2	N	U	2	ContainerListener
559	Which of these is superclass of WindowEvent class?	2	N	U	2	ComponentEvent
560	Which of these methods are used to register a keyboard event listener?	2	N	U	2	addKeyListener()
561	which of these methods are used to register a mouse motion listener?	2	N	A	2	addMouseMotionListener()
562	Which of these methods can be used to obtain the coordinates of a mouse?	2	N	U	2	getPoint()
563	Which of these methods can be used to obtain the reference to the container that generated a ContainerEvent?	2	N	U	2	getContainerEvent()
564	Which of these methods is defined in MouseMotionAdapter class?	2	N	A	2	A. mouseDragged()
565	Which of these methods is defined in MouseMotionAdapter class?	2	N	A	2	mouseMoved()
566	Which of these methods will respond when you click any button of mouse?	2	N	U	2	all of this
567	Which package contains all classes & methods required for Event Handling in Java?	2	N	U	2	java.awt.event
568	Which package should be added in the following program to get the proper output: public class JCheckBoxDemo extends JApplet implements ItemListener { JTextField jtf; public void init() { Container c = getContentPane(); c.setLayout(new FlowLayout()); ImageIcon img1 = new ImageIcon("jpgIcon.jpg"); ImageIcon img2= new ImageIcon("Winter.jpg"); ImageIcon img3 = new ImageIcon("Sunset.jpg"); JCheckBox cb = new JCheckBox("C", img1); cb.setRolloverIcon(img2); cb.setSelectedIcon(img3); cb.addItemListener(this); c.add(cb); cb = new JCheckBox("C++",img1); cb.setRolloverIcon(img2); cb.setSelectedIcon(img3); cb.addItemListener(this); c.add(cb); jtf = new JTextField(15); c.add(jtf); } public void itemStateChanged(ItemEvent ie) { JCheckBox cb = (JCheckBox)ie.getItem(); jtf.setText(cb.getText()); } }	2	N	A	2	All of these
569	Which program segment will generate the following output. Figure:- 	2	Y1	A	2	Which program segment will generate the following output. import javax.swing.*; import java.awt.*; import java.awt.event.*; public class DemoFrame extends JFrame implements ItemListener { JComboBox cb; Container c; public DemoFrame() { this.setLayout(new

570	Which statement allows the button named click to react to a mouse click?	2	N	U	2
571	Which statement among the following is not true related to Event?	2	N	U	2
572	which statement is correct? 1)MouseClicked() is defined in MouseMotionListener 2)MouseEntered() is defined in MouseMotionListener 3)MouseMoved() is defined in MouseMotionListener 4)MouseReleased() is defined in MouseListener	2	N	A	2
573	Which statement is incorrect or missing in the following code import java.awt.*; import java.awt.event*; import javax.swing.*; public class radio extends JApplet implements _____ { public void init() { c.setLayout(new FlowLayout()); JRadioButton b1=new JRadioButton("Red"); b1.addActionListener(this); c.add(b1); JRadioButton b2=new JRadioButton("Green"); b2.addActionListener(this); c.add(b2); JRadioButton b3=new JRadioButton("Blue"); b3.addActionListener(this); c.add(b3); ButtonGroup bg=_____ ; bg.add(b1); bg.add(b2); bg.add(b3); } public void actionPerformed(ActionEvent e){ setBackground(e.getActionCommand()); } }	2	N	A	2
574	Which statement is missing in following code : import java.awt.*; import javax.swing.*; import java.applet.*; import java.awt.event.*; /* <applet code="Square" width=300 height=300> </applet> */ public class Square extends Applet implements ActionListener { Button b1; Label l1,l2; TextField t1,t2; public void init() { l1=new Label("Enter the number"); l2=new Label("Square of number"); t1=new TextField(); t2=new TextField(); b1=new Button("Square"); setLayout(new GridLayout(3,2)); add(l1); add(t1); add(l2); add(t2); add(b1); } public void actionPerformed(ActionEvent ae) { if(ae.getSource()==b1) { float a=Float.parseFloat(t1.getText()); float c=a*a; t2.setText(Float.toString(c)); } } }	2	N	A	2
575	Which statement is true about the code fragment listed below? class MyListener extends MouseAdapter implements MouseListener { public void mouseEntered(MouseEvent mev) { System.out.println("Mouse entered."); } }	2	N	A	2
576	Which Statement with respect to inner class is true A)It is a way of logically grouping classes that are only used in one place: B)It increases encapsulation C) It can lead to more readable and maintainable code:	2	N	U	2
577	Which statements are missing in following program /*<applet code=ScrollRGB width=300 height=300></applet>*/ import java.awt.*; import java.awt.event.*; import java.applet.*; public class ScrollRGB extends Applet implements AdjustmentListener { Color bkColor; Scrollbar red=new Scrollbar(Scrollbar.VERTICAL,0,1,0,255); Scrollbar green=new Scrollbar(Scrollbar.VERTICAL,0,1,0,255); Scrollbar blue=new Scrollbar(Scrollbar.VERTICAL,0,1,0,255); int i,j,k; public void init() { add(red); add(green); green.addAdjustmentListener(this); blue.addAdjustmentListener(this); } public void adjustmentValueChanged(AdjustmentEvent e) { if(e.getSource()==red  e.getSource()==green  e.getSource()==blue) { i=red.getValue(); j=green.getValue(); k=blue.getValue(); } repaint(); } public void paint(Graphics g) { bkColor=new Color(i,j,k); setBackground(bkColor); } }	2	N	A	2
578	Which statements should we add inorder to following code to handle events for MenuItems import java.awt.*; import java.awt.event.*; public class MenuDemo extends Frame implements _____ { Label l; MenuDemo() { MenuBar mbr = new MenuBar(); setMenuBar(mbr); Menu filmenu = new Menu("File"); mbr.add(filmenu); MenuItem new1 = new MenuItem("New"); filmenu.add(new1); new1._____ l=new Label(); add(l); } public static void main(String args[]) { MenuDemo m = new MenuDemo(); m.setSize(200,200); m.setLocation(10,10); m.setVisible(true); } public void _____ { l.setText("New Clicked"); } }	2	N	A	2
	Which swing control is used for following output? Figure:-				

579			2	Y1	U
			2		JButton,JscrollPane
580		Which type of the following program : import java.awt.event.ActionEvent; import java.awt.event.ActionListener; import javax.swing.*; public class OuterClass extends JFrame { public static void main(String[] args) { OuterClass outer = new OuterClass(); JButton button = new JButton("Don't click me!"); button.addActionListener(new ActionListener () { public void actionPerformed(ActionEvent event) { System.out.println("Ouch !"); } }); outer.add(button); outer.pack(); outer.setVisible(true); } }	2	N	U
581		Which values are defined in InputEvent class to represent modifiers?	2	N	U
		2	2	All the above	
582		Which will be the correct code for the following output Figure:- 	2	Y1	A
		2	2	import java.awt.*; import java.awt.event.*; import java.applet.*; public class EventDemo extends Applet implements MouseListener { public void init() { addMouseListener(this); } public void mouseClicked(MouseEvent me) { showStatus("Mouse clicked"); } }	
583		Which will be the layout of the output window Figure:- 	2	Y1	A
		2	2	GridLayout	
584		Window is type of	2	N	U
		2	2	All of this	
		Write the missing statement import java.applet.Applet; import java.awt.Checkbox; import java.awt.Graphics; import java.awt.event.ItemEvent; ----- /* <applet code="HandleCheckboxEvent" width=200 height=200> </applet> */ public class HandleCheckboxEvent extends Applet implements ItemListener{ Checkbox java = null; Checkbox vb = null; Checkbox c = null; public void init(){ java = new Checkbox("Java"); vb = new			

	<pre> Checkbox("Visual Basic"); c = new Checkbox("C"); add(java); add(vb); add(c); java.addItemListener(this); vb.addItemListener(this); c.addItemListener(this); } public void paint(Graphics g){ g.drawString("Java: " + java.getState(),10,80); g.drawString("VB: " + vb.getState(), 10, 100); g.drawString("C: " + c.getState(), 10, 120); } public void itemStateChanged(ItemEvent ie) { repaint(); } } </pre> <p>Figure:-</p>				
585		2	Y1	A	2 import java.awt.event.ItemListener;
586	You have created a simple Frame and overridden the paint method as follows public void paint(Graphics g) { g.drawString("Dolly",50,10); } What will be the result when you attempt to compile and run the program?	2	N	A	2 The lower part of the word Dolly will be seen at the top of the form, v the top hidden
587	_____ is used to obtained the object that generate Window event	2	N	A	2 getWindow()
588	_____ method can be used to know the degree of adjustment made by user with ScrollBar?	2	N	U	2 getValue()
589	_____ method can be used to change location of event	2	N	A	2 TranslatePoint()
590	.....method can be used to obtain refrence to the container that generate ContainerEvent.	2	N	A	2 getContainerEvent()

### e-Exam Manage Questions for Advanced Java Programming (17625) for topic 3 [Go Back to Subjects](#)

Q No	Question	To pic	Fig ure	Q Type	Mar ks	Answer	Edit	Delete
1	Calling ServerSocket() constructor with port value 'zero' means _____.	3	N	U	1	use a port number that is automatically allocated.	<a href="#">Edit</a>	<a href="#">Delete</a>
2	TCP/IP reserves the _____ ports for specific protocols	3	N	R	1	lower 1024	<a href="#">Edit</a>	<a href="#">Delete</a>
3	Which of these package contains classes and interfaces for networking?	3	N	R	1	java.net	<a href="#">Edit</a>	<a href="#">Delete</a>
4	A ServerSocket can connect to _____ clients.	3	N	R	1	multiple	<a href="#">Edit</a>	<a href="#">Delete</a>
5	A set of rules that governs data communication.	3	N	R	1	protocol	<a href="#">Edit</a>	<a href="#">Delete</a>
6	A socket identifies _____ in network.	3	N	R	1	a communication end point	<a href="#">Edit</a>	<a href="#">Delete</a>
7	A socket is combination of	3	N	R	1	Both A and B	<a href="#">Edit</a>	<a href="#">Delete</a>
8	A socket is _____ of a two-way communication link between two programs running on two hosts in the network.	3	N	R	1	one end-point	<a href="#">Edit</a>	<a href="#">Delete</a>
9	Access control does not deals with	3	N	R	1	Authentication	<a href="#">Edit</a>	<a href="#">Delete</a>
10	A _____ is responsible for determining whether code executing in the Java runtime environment has permission to perform a security-sensitive operation.	3	N	R	1	policy object	<a href="#">Edit</a>	<a href="#">Delete</a>
11	byte[] getData() method of DatagramPacket class returns _____	3	N	R	1	Byte array of data contained in datagram	<a href="#">Edit</a>	<a href="#">Delete</a>
12	Class URL represents _____, a pointer to a "resource" on the World Wide Web	3	N	R	1	Uniform Resource Locator	<a href="#">Edit</a>	<a href="#">Delete</a>
13	Communication using TCP protocol is _____ and _____	3	N	R	1	connection-oriented, concurrent	<a href="#">Edit</a>	<a href="#">Delete</a>
14	Connection oriented communication is possible using _____ classes of Java.	3	N	R	1	Socket and ServerSocket	<a href="#">Edit</a>	<a href="#">Delete</a>
15	How many bits are in a single IPv4 address?	3	N	R	1	32	<a href="#">Edit</a>	<a href="#">Delete</a>
16	How many bytes are required to represent an IPv4 address?	3	N	R	1	4	<a href="#">Edit</a>	<a href="#">Delete</a>
17	In InetAddress class which method returns the host name of the IP Address?	3	N	R	1	public String getHostName()	<a href="#">Edit</a>	<a href="#">Delete</a>
18	In the format for defining the URL what is the last part?	3	N	R	1	File path	<a href="#">Edit</a>	<a href="#">Delete</a>

19	In the URL, http://www.osborne.com:80/index.htm, 80 represents	3	N	R	1	Port number	<a href="#">Edit</a>	<a href="#">Delete</a>
20	In UDP send() and receive() methods belong to which class?	3	N	R	1	DatagramSocket	<a href="#">Edit</a>	<a href="#">Delete</a>
21	In which class the constructors are not visible	3	N	R	1	InetAddress class	<a href="#">Edit</a>	<a href="#">Delete</a>
22	Inet Address class encapsulates_____	3	N	R	1	Both A and B	<a href="#">Edit</a>	<a href="#">Delete</a>
23	IP Stands for _____	3	N	R	1	Internet Protocol	<a href="#">Edit</a>	<a href="#">Delete</a>
24	Java.net package include following classes.	3	N	R	1	URLConnection, Socket, InetAddress	<a href="#">Edit</a>	<a href="#">Delete</a>
25	Name the class which is used to create a port where the server will listen?	3	N	R	1	ServerSocket	<a href="#">Edit</a>	<a href="#">Delete</a>
26	Permission class of java.security package is _____ class	3	N	R	1	abstract	<a href="#">Edit</a>	<a href="#">Delete</a>
27	Permission class belongs to which package?	3	N	R	1	java.security	<a href="#">Edit</a>	<a href="#">Delete</a>
28	Port Number for FTP is	3	N	R	1	21	<a href="#">Edit</a>	<a href="#">Delete</a>
29	Port number of Email is _____.	3	N	R	1	25	<a href="#">Edit</a>	<a href="#">Delete</a>
30	Pretty Good Privacy (PGP) is used in security of	3	N	R	1	Email	<a href="#">Edit</a>	<a href="#">Delete</a>
31	Reserved port no of HTTP	3	N	R	1	80	<a href="#">Edit</a>	<a href="#">Delete</a>
32	Resolver in DNS sysytem maps	3	N	R	1	Domain name to ip address	<a href="#">Edit</a>	<a href="#">Delete</a>
33	Select the proper constructor of ServerSocket class	3	N	R	1	All of above	<a href="#">Edit</a>	<a href="#">Delete</a>
34	Select the proper constructor of URL class	3	N	R	1	All of the above	<a href="#">Edit</a>	<a href="#">Delete</a>
35	TCP is Which Type of Protocol ?	3	N	R	1	Connection oriented protocol	<a href="#">Edit</a>	<a href="#">Delete</a>
36	TCP is _____oriented protocol	3	N	R	1	stream	<a href="#">Edit</a>	<a href="#">Delete</a>
37	TCP Stands for _____	3	N	R	1	Transmission Control Protocol	<a href="#">Edit</a>	<a href="#">Delete</a>
38	TCP/IP sockets are used to impelement _____ connections.	3	N	R	1	All of the above	<a href="#">Edit</a>	<a href="#">Delete</a>
39	The class which encapsulates both the numerical IP address and the domain name for that address.	3	N	R	1	InetAddress	<a href="#">Edit</a>	<a href="#">Delete</a>
40	The constructor which is used in ServerSocket may be_____.	3	N	R	1	ServerSocket (int port).	<a href="#">Edit</a>	<a href="#">Delete</a>
41	The constructor which is used to create client socket is _____.	3	N	R	1	Socket(InetAddress IPAddress, int port).	<a href="#">Edit</a>	<a href="#">Delete</a>
42	The factory method for retrieving objects of InetAddress is _____.	3	N	R	1	All of the mentioned	<a href="#">Edit</a>	<a href="#">Delete</a>
43	The factory method which returns an array of InetAddresses that represent all of the addresses that a particular host name resolves to.	3	N	R	1	getAllByName( )	<a href="#">Edit</a>	<a href="#">Delete</a>
44	The java.net.InetAddress class provides methods to get the_____	3	N	R	1	IP of any host name	<a href="#">Edit</a>	<a href="#">Delete</a>
45	The method int getPort( ) of Socket class returns_____	3	N	R	1	remote port to which this Socket object is connected.	<a href="#">Edit</a>	<a href="#">Delete</a>
46	The number 80 in following URL specifies?	3	N	R	1	Port number	<a href="#">Edit</a>	<a href="#">Delete</a>

	http://www.rediff.com:80/index.htm/							
47	The openConnection() is the method of which Class?	3	N	R	1	URLConnection		Edit Delete
48	The openConnection() method of URL class return _____ Object.	3	N	R	1	URLConnection		Edit Delete
49	The return type of getHostAddress() method is _____	3	N	R	1	string		Edit Delete
50	The server listens for a connection request from a client using the following statement:	3	N	R	1	Socket s = ServerSocket.accept()		Edit Delete
51	The valid sequence for URL format is _____	3	N	R	1	protocol, Hostname, portnumber, filepath		Edit Delete
52	The _____ method in the InetAddress class returns the IP address.	3	N	R	1	getHostAddress()		Edit Delete
53	The _____ class is used to create TCP server.	3	N	R	1	ServerSocket		Edit Delete
54	To create an InputStream on a Socket s, you use _____.	3	N	R	1	InputStream in = s.getInputStream();		Edit Delete
55	To obtain an ObjectOutputStream from a socket,use_____	3	N	R	1	new ObjectOutputStream(socket.getOutputStream())		Edit Delete
56	To return an instance of InetAddress class you have to use	3	N	R	1	Factory Methods of InetAddress class		Edit Delete
57	To return the currently intalled policy object_____ method is used.	3	N	R	1	public static Policy getPolicy()		Edit Delete
58	UDP is not _____ oriented protocol.	3	N	R	1	Connection		Edit Delete
59	UDP Packets are known as _____	3	N	R	1	Datagram		Edit Delete
60	UDP Protocol uses following classes for communication	3	N	R	1	DatagramPacket and DatagramSocket		Edit Delete
61	UDP Stands for _____	3	N	R	1	User Datagram Protocol		Edit Delete
62	URL class has several constructors; each can throw a _____.	3	N	R	1	MalformedURLException		Edit Delete
63	What does the openConnection() method of java.net.* return?	3	N	R	1	Object of URLConnection class		Edit Delete
64	What does URL stands for?	3	N	R	1	Uniform Resource Locator		Edit Delete
65	What is return type of getAddress() method of InetAddress class?	3	N	R	1	byte[]		Edit Delete
66	What is Second part of URL address	3	N	R	1	Hostname		Edit Delete
67	What is Socket?	3	N	R	1	All of these		Edit Delete
68	What is the first part of URL address?	3	N	R	1	Protocol		Edit Delete
69	What is the optional part of URL Address	3	N	R	1	Port Number		Edit Delete
70	What is the return type of the method getAllByName( ) of InetAddress class?	3	N	R	1	InetAddress[ ]		Edit Delete
71	What will be displayed in the output? import java.net.*; class myAddress { public static void main (String args[]) { try { InetAddress address = InetAddress.getLocalHost(); System.out.println(address); } catch (UnknownHostException e) { System.out.println("Could not find	3	N	R	1	The internet address of the host		Edit Delete

	this computer's address."); } } }							
72	When a socket object is created _____	3	N	R	1	It implicitly establishes a connection between the client & server	<a href="#">Edit</a>	<a href="#">Delete</a>
73	When a URL object is created _____	3	N	R	1	a connection is automatically established with that URL	<a href="#">Edit</a>	<a href="#">Delete</a>
74	Which class defines following methods. 1. int getContent Length() 2. long getDate() 3. long getExpiration()	3	N	R	1	URLConnection	<a href="#">Edit</a>	<a href="#">Delete</a>
75	Which class is used to access actual bits or content information of a URL?	3	N	R	1	URLConnection	<a href="#">Edit</a>	<a href="#">Delete</a>
76	Which class is used to create client in TCP/IP?	3	N	R	1	Socket	<a href="#">Edit</a>	<a href="#">Delete</a>
77	Which class is used to designed to be a "listener" which waits for client to connect before doing anything.	3	N	R	1	ServerSocket	<a href="#">Edit</a>	<a href="#">Delete</a>
78	Which class is used to implement datagrams with UDP protocol.	3	N	R	1	DatagramSocket	<a href="#">Edit</a>	<a href="#">Delete</a>
79	Which class of java.net package can be used to find the host name and IP address of the client.	3	N	R	1	The InetAddress class	<a href="#">Edit</a>	<a href="#">Delete</a>
80	Which classes are used for connection-oriented socket programming	3	N	R	1	Both A and B	<a href="#">Edit</a>	<a href="#">Delete</a>
81	Which constructor of DatagramSocket class is used to create a datagram socket and bind it with the given port number?	3	N	R	1	DatagramSocket(int port)	<a href="#">Edit</a>	<a href="#">Delete</a>
82	Which datagram method returns the byte array of data contained in the datagram?	3	N	R	1	byte[] getData()	<a href="#">Edit</a>	<a href="#">Delete</a>
83	Which exception indicate that the IP address of a host could not be determined	3	N	R	1	UnknownHostException	<a href="#">Edit</a>	<a href="#">Delete</a>
84	Which is connection less protocol	3	N	R	1	UDP	<a href="#">Edit</a>	<a href="#">Delete</a>
85	Which is not a method of URL Connection?	3	N	R	1	Date getLastModified( )	<a href="#">Edit</a>	<a href="#">Delete</a>
86	Which is not valid method of URL class?	3	N	R	1	getUrl()	<a href="#">Edit</a>	<a href="#">Delete</a>
87	Which is the correct syntax from given?	3	N	R	1	byte[] getAddress()	<a href="#">Edit</a>	<a href="#">Delete</a>
88	Which is the reliable protocol of networking ?	3	N	R	1	TCP	<a href="#">Edit</a>	<a href="#">Delete</a>
89	Which method is used to know the full URL of an URL object?	3	N	R	1	toExternalForm()	<a href="#">Edit</a>	<a href="#">Delete</a>
90	Which method is used to retrieve the host name associated with URL	3	N	R	1	getHost()	<a href="#">Edit</a>	<a href="#">Delete</a>
91	Which method is used to return the IPAddress of local machine	3	N	R	1	static InetAddress getLocalHost( )	<a href="#">Edit</a>	<a href="#">Delete</a>
92	Which method of ServerSocket will wait for a client to initiate communications and then communicate with the client	3	N	R	1	accept()	<a href="#">Edit</a>	<a href="#">Delete</a>
93	Which method of URL class is used to create object of URLConnection?	3	N	R	1	openConnection	<a href="#">Edit</a>	<a href="#">Delete</a>
94	Which of the following are Factory Methods of InetAddress class	3	N	R	1	All the Above	<a href="#">Edit</a>	<a href="#">Delete</a>
95	Which of the following class defines accept() method?	3	N	R	1	ServerSocket	<a href="#">Edit</a>	<a href="#">Delete</a>
96	Which of the following constructor of InetAddress is generally used?	3	N	R	1	InetAddress class does not contain any visible constructor.	<a href="#">Edit</a>	<a href="#">Delete</a>

97	Which of the following is a connection oriented protocol?	3	N	R	1	TCP	<a href="#">Edit</a>	<a href="#">Delete</a>
98	Which of the following is mediator between real web server and client application	3	N	R	1	Proxy	<a href="#">Edit</a>	<a href="#">Delete</a>
99	Which of the following is not a constructor of DatagramSocket	3	N	R	1	DatagramSocket(InetAddress address)	<a href="#">Edit</a>	<a href="#">Delete</a>
100	Which of the following is not a Factory method of an InetAddress Class?	3	N	R	1	String getHostAddress()	<a href="#">Edit</a>	<a href="#">Delete</a>
101	Which of the following is not true about TCP Socket?	3	N	R	1	Socket is not used to create connection between client and server	<a href="#">Edit</a>	<a href="#">Delete</a>
102	Which of the following is true about UDP?	3	N	R	1	No retransmission of lost packets.	<a href="#">Edit</a>	<a href="#">Delete</a>
103	Which of the following is true for TCP ?	3	N	R	1	TCP is reliable and connection oriented	<a href="#">Edit</a>	<a href="#">Delete</a>
104	Which of the following is true for UDP ?	3	N	R	1	UDP is unreliable and connection less	<a href="#">Edit</a>	<a href="#">Delete</a>
105	Which of the following method is used to obtain remote port to which Socket object is connected.	3	N	R	1	getPort()	<a href="#">Edit</a>	<a href="#">Delete</a>
106	Which of the following methods of InetAddress class returns the IP Address?	3	N	R	1	getHostAddress()	<a href="#">Edit</a>	<a href="#">Delete</a>
107	Which of the ServerSocket method listens to client requests for connection?	3	N	R	1	accept()	<a href="#">Edit</a>	<a href="#">Delete</a>
108	Which of these classes is necessary to implement datagrams?	3	N	R	1	Both of these	<a href="#">Edit</a>	<a href="#">Delete</a>
109	Which of these classes is used to create servers that listen for either local or remote client programs?	3	N	R	1	ServerSockets	<a href="#">Edit</a>	<a href="#">Delete</a>
110	Which of these classes is used to encapsulate IP address and DNS?	3	N	R	1	InetAddress	<a href="#">Edit</a>	<a href="#">Delete</a>
111	Which of these classes must be used to send datagram packets over a connection?	3	N	R	1	All of the mentioned	<a href="#">Edit</a>	<a href="#">Delete</a>
112	Which of these is a bundle of information passed between machines?	3	N	R	1	Datagram	<a href="#">Edit</a>	<a href="#">Delete</a>
113	Which of these is a factory method?	3	N	R	1	getLocalHost()	<a href="#">Edit</a>	<a href="#">Delete</a>
114	Which of these is not a factory method of InetAddress class?	3	N	R	1	static InetAddress getAllByName(String hostName)	<a href="#">Edit</a>	<a href="#">Delete</a>
115	Which of these is a protocol for breaking and sending packets to an address across a network?	3	N	R	1	TCP/IP	<a href="#">Edit</a>	<a href="#">Delete</a>
116	Which of these is a return type of getAddress method of DatagramPacket class?	3	N	R	1	InetAddress	<a href="#">Edit</a>	<a href="#">Delete</a>
117	Which of these is a return type of getData() method of DatagramPacket class?	3	N	R	1	byte	<a href="#">Edit</a>	<a href="#">Delete</a>
118	Which of these methods does not belong to DatagramPacket class?	3	N	R	1	getAddress()	<a href="#">Edit</a>	<a href="#">Delete</a>
119	Which of these methods of DatagramPacket is used to find the length of byte array?	3	N	R	1	getLength()	<a href="#">Edit</a>	<a href="#">Delete</a>
120	Which of these methods of DatagramPacket is used to find the port number?	3	N	R	1	getPort()	<a href="#">Edit</a>	<a href="#">Delete</a>

121	Which of these method of DatagramPacket is used to obtain the byte array of data contained in a datagram?	3	N	R	1	getData()	<a href="#">Edit</a>	<a href="#">Delete</a>
122	Which of these methods is used to know the full URL of an URL object?	3	N	R	1	toExternalForm()	<a href="#">Edit</a>	<a href="#">Delete</a>
123	Which of these methods is used to know the type of content used in the URL?	3	N	R	1	getContentType()	<a href="#">Edit</a>	<a href="#">Delete</a>
124	Which of these methods is used to know when was the URL last modified?	3	N	R	1	getLastModified()	<a href="#">Edit</a>	<a href="#">Delete</a>
125	Which package is used for handling security related issue?	3	N	R	1	java.security	<a href="#">Edit</a>	<a href="#">Delete</a>
126	Which socket class can send packets unreliably?	3	N	R	1	java.net.DatagramSocket()	<a href="#">Edit</a>	<a href="#">Delete</a>
127	Which type of exception is throw by InetAddress class Factory methods?	3	N	R	1	UnknownHostException	<a href="#">Edit</a>	<a href="#">Delete</a>
128	You can invoke _____ on a Socket object, say socket, to obtain an InetAddress object.	3	N	R	1	socket.getInetAddress();	<a href="#">Edit</a>	<a href="#">Delete</a>
129	You can obtain the server's hostname by invoking _____ on an applet.	3	N	R	1	getCodeBase().getHost()	<a href="#">Edit</a>	<a href="#">Delete</a>
130	_____ is networking protocol for hypermedia, collaborative & distributed information system.	3	N	R	1	HTTP	<a href="#">Edit</a>	<a href="#">Delete</a>
131	_____ is a low level routing protocol that breaks data into smaller packets.	3	N	R	1	Internet protocol.	<a href="#">Edit</a>	<a href="#">Delete</a>
132	_____ class is used for accessing the attribute of a remote resource.	3	N	R	1	URLConnection Class	<a href="#">Edit</a>	<a href="#">Delete</a>
133	_____ is a factory method which returns an array of addresses.	3	N	R	1	getAllByName.	<a href="#">Edit</a>	<a href="#">Delete</a>
134	_____ is used to implement reliable, bidirectional, persistent point to point stream based connection.	3	N	R	1	TCP/IP client and server socket.	<a href="#">Edit</a>	<a href="#">Delete</a>
135	_____ method is used to examine the address and port information by the socket.	3	N	R	1	getInetAddress()	<a href="#">Edit</a>	<a href="#">Delete</a>
136	_____ method of URL class is used to obtained file path from given URL.	3	N	R	1	getFile()	<a href="#">Edit</a>	<a href="#">Delete</a>
137	_____ acts as a mediator between a client program and an external servers to filter request , improve performance & share connections.	3	N	R	1	Proxy server	<a href="#">Edit</a>	<a href="#">Delete</a>
138	_____ port number is reserved for Http protocol.	3	N	R	1	80	<a href="#">Edit</a>	<a href="#">Delete</a>
139	_____ protocol supports fast point to point datagram oriented model.	3	N	R	1	UDP	<a href="#">Edit</a>	<a href="#">Delete</a>
140	_____ class is used to access the attributes of a remote host.	3	N	R	1	URLConnection	<a href="#">Edit</a>	<a href="#">Delete</a>
141	_____ is abstract class for representing access to a system resource.	3	N	R	1	Permission	<a href="#">Edit</a>	<a href="#">Delete</a>

142	method of DatagramSocket class is used to receive DatagramPacket.	3	N	R	1	receive(DatagramPacket packet)	<a href="#">Edit</a>	<a href="#">Delete</a>
143	A _____ is responsible for determining whether code executing in the java runtime environment has permission to perform a security-sensitive operation.	3	N	U	2	Policy Object	<a href="#">Edit</a>	<a href="#">Delete</a>
144	Arrange the following code segment in proper order that represent TCP server a) creating serverSocket object. server=new ServerSocket(4000, 2); System.out.println("Socket open"); b) //receive inputs from client receive=new DataInputStream(client.getInputStream()); String data=null; while(true) { data=receive.readUTF(); System.out.println(data); } c) //accept() method listens for a connection to be made to this socket and accepts it. client=server.accept(); System.out.println("Client connected");	3	N	U	2	a,c,b	<a href="#">Edit</a>	<a href="#">Delete</a>
145	Choose the class name to be used instead of A_Class to get correct output. import java.net.*; class Sample { public static void main(String[] args)throws UnknownHostException { try { A_Class address=A_Class.getByName("google.com"); System.out.println(address); }catch(UnknownHostException e) { System.out.println("Caught : "+e); } }	3	N	A	2	InetAddress	<a href="#">Edit</a>	<a href="#">Delete</a>
146	Choose the correct output import java.net.*; class myURL2 { public static void main(String args[]) throws MalformedURLException { URL u=new URL("http://www.msbte.com"); System.out.println("Protocol="+u.getProtocol()); System.out.println("Host Name="+u.getHost()); System.out.println("Port Number="+u.getPort()); System.out.println("File Name="+u.getFile()); } }	3	N	A	2	a) Protocol=http Host Name=www.msbte.com Port Number=-1 File Name=	<a href="#">Edit</a>	<a href="#">Delete</a>
147	Choose the correct output import java.net.*; class networking { public static void main(String args[])throws UnknownHostException { InetAddress obj1 =InetAddress.getByName("msbte.com"); InetAddress obj2 =InetAddress.getByName("msbte.com"); boolean x = obj1.equals(obj2); System.out.print(x); } }	3	N	A	2	true	<a href="#">Edit</a>	<a href="#">Delete</a>
148	Consider the following program what will happen after execution. import java.net.*; class sample { public static void main(String[] args) throws Exception { URL obj = new URL("http://www.msbte.com"); URLConnection obj1 = obj.openConnection(); int len = obj1.getContentLength(); System.out.print(len); } }	3	N	A	2	84	<a href="#">Edit</a>	<a href="#">Delete</a>
149	Find Error in following program. import java.awt.*; class URLDemo { public static void main(String args[]) throws urlexception { URL hp = new URL("http://www.Abc.com/downloads"); System.out.println("Protocol: " + hp.getProtocol()); System.out.println("Port: " + hp.getPort()); System.out.println("Host: " + hp.getHost()); } }	3	N	A	2	both a and b	<a href="#">Edit</a>	<a href="#">Delete</a>
	For the following client side code of TCP implementation of sockets, what should be the server side code in order to establish connection between both the machines? import java.io.IOException; import java.net.*; public class Server { public static void main(String[] args) throws IOException {					import java.io.IOException; import java.net.*; public class Server { public static void main(String[] args) throws IOException {		

150	java.net.*; public class Client { public static void main(String[] args) throws UnknownHostException, IOException { Socket sock=new Socket("127.0.0.1",2000); } }	3	N	A	2	ServerSocket ss=new ServerSocket(2000); Socket sock=ss.accept(); System.out.println("Connection Established"); } }	<a href="#">Edit</a>	<a href="#">Delete</a>
151	From given list which address is called as loopback address ?	3	N	U	2	127.0.0.0	<a href="#">Edit</a>	<a href="#">Delete</a>
152	getByname() method returns	3	N	U	2	host name	<a href="#">Edit</a>	<a href="#">Delete</a>
153	getLocalHost() method is present in which package	3	N	U	2	java.net	<a href="#">Edit</a>	<a href="#">Delete</a>
154	getPort() method of socket class return	3	N	A	2	Returns the port number on which the socket is connected	<a href="#">Edit</a>	<a href="#">Delete</a>
155	Give line numbers containing errors in following program: import java.Net.*; import java.io.*; import java.util.*; public class HeaderViewer {public static void main(String args[]) {try {URL u = new URL("http://www.rediffmail.com/index.html"); URLconnection uc = u.openConnection( ); System.out.println("Content-type: "+uc.getContentType( )); System.out.println("Content-encoding: "+uc.getContentEncoding( )); System.out.println("Date: " + new Date(uc.getDate( ))); System.out.println("Last modified: " + new Date(uc.getLastModified( ))); System.out.println("Expiration date: " + new Date(uc.getExpiration( ))); System.out.println("Content-length: "+uC.getLength( )); } catch (MalformedURLException ex) {System.out.println("I can't understand this URL...");} } }	3	N	A	2	Line No.: 1,7,8,10,12,14,16	<a href="#">Edit</a>	<a href="#">Delete</a>
156	Given Statement may throws which exception? InetAddress address =InetAddress.getByName("www.xyz.com");	3	N	U	2	UnknownHostException	<a href="#">Edit</a>	<a href="#">Delete</a>
157	Given the following lines from a Java program segment: byte[] dataOut = new byte [512]; String userInput = "Java Programming"; dataOut = userInput.getBytes(); Which of the following lines of code could be used to create a new UDP datagram packet to send the data that was provided by the user to a host identified by the InetAddress object IPAddress?	3	N	A	2	DatagramPacket packet = new DatagramPacket(dataOut, userInput.length, InetAddress, 9876)	<a href="#">Edit</a>	<a href="#">Delete</a>
158	Http is which type of Protocol	3	N	U	2	Stateless	<a href="#">Edit</a>	<a href="#">Delete</a>
159	Identify the valid method of URL class.	3	N	U	2	All of the mentioned	<a href="#">Edit</a>	<a href="#">Delete</a>
160	Identify the valid ServerSocket constructor.	3	N	U	2	public ServerSocket(int portno)	<a href="#">Edit</a>	<a href="#">Delete</a>
161	If port number is not specified in the URL, getPort() method returns _____	3	N	U	2	-1	<a href="#">Edit</a>	<a href="#">Delete</a>
162	If we create the datagram packet wit following constructor: DatagramPacket(byte data[],int offset, int size, InetAddress ipaddress, int port) What "size" parameter specifies?	3	N	U	2	size of the packet	<a href="#">Edit</a>	<a href="#">Delete</a>
163	If you use either Telnet or FTP, which is the highest layer you are using to transmit data?	3	N	U	2	Application	<a href="#">Edit</a>	<a href="#">Delete</a>
164	import java.net.*; public class URLDemo{ public static void main(String args[])throws MalformedURLException{ URL hp = new URL("http://www.javajazzup.com"); System.out.println("Protocol:" + hp.getProtocol()); System.out.println("Port:" + hp.getPort()); System.out.println("Host:" + hp.getHost()); System.out.println("File:" +	3	N	U	2	Protocol:http Port:-1 Host:www.javajazzup.com File: Ext:http://www.javajazzup.com	<a href="#">Edit</a>	<a href="#">Delete</a>

	hp.getFile()); System.out.println("Ext:" + hp.toExternalForm()); } } What will be the output of above code?							
165	import java.io.*; import java.net.*; class exp7_1{ public static void main(String args[]) throws MalformedURLException{ URL a=new URL("http://www.msbte.com/index.html"); System.out.println("port :" +a.getPort()); } }	3	N	A	2	-1		Edit Delete
166	import java.io.*; import java.net.*; class PwdClient { public static void main(String args []) { try { Socket so =new Socket("localhost",3642); DataInputStream d =new DataInputStream(System.in); System.out.println("Enter a Password"); String passwd =d.readLine(); PrintStream p = new PrintStream(so.getOutputStream()); p.println(passwd); DataInputStream d1 =new DataInputStream(so.getInputStream()); String r =d1.readLine(); System.out.println(r); so.close(); } catch( Exception e) { System.out.println("Msg from client: "+e); } } }	3	N	U	2	client side		Edit Delete
167	import java.net.*; class networking { public static void main(String[] args) throws MalformedURLException { URL obj = new URL("http://www.sanfoundry.com/javamcq"); System.out.print(obj.toExternalForm()); } }	3	N	U	2	http://www.sanfoundry.com/javamcq		Edit Delete

267	What is the use of writeUTF( ) method?	3	N	U	2	This method writes a string into underlying output stream		Edit Delete
268	What method is used to establish a port where a server waits for requests?	3	N	U	2	ServerSocket()		Edit Delete
269	What statement is needed to get the output as shown in fig. in bellow program import java.net.*; import java.io.*; import java.awt.event.*; import javax.swing.*; import java.awt.*; class urlconn extends JFrame implements ActionListener { JTextField f=new JTextField(); JTextArea a=new JTextArea(); String s=""; public urlconn() { getContentPane().add(f, BorderLayout.NORTH); getContentPane().add(a, BorderLayout.CENTER); f.addActionListener(this); setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE); setSize(400,400); } public void actionPerformed(ActionEvent e) { if(e.getSource()==f) { try { URL u=new URL(f.getText()); URLConnection con=u.openConnection(); BufferedReader br=new BufferedReader(new InputStreamReader(con.getInputStream())); int len=con.getContentLength(); if(len!=0) { while((s=br.readLine())!=null) a.append("\n"+s); br.close(); } else a.append("\n"+"content unavailable"); }catch(Exception ae){} } } public static void main(String ar[])throws Exception { urlconn c; c.setVisible(true); } }  Figure:- 	3	Y1	A	2	c=new urlconn(); in main method		Edit Delete
270	What the method getDate() of URLConnection class returns?	3	N	U	2	returns time and date of response in terms of millisecond		Edit Delete
	What the index.html specifies in following URL?							

271	Http://www.rediff.com:80/index.html	3	N	U	2	File name	<a href="#">Edit</a>	<a href="#">Delete</a>
272	What type of exception might be thrown by Socket class.	3	N	U	2	UnknownHostException	<a href="#">Edit</a>	<a href="#">Delete</a>
273	What will be displayed in the output import java.net.*; class InetAddressTest { public static void main(String args[]) throws UnknownHostException { InetAddress SW[] = InetAddress.getAllByName("www.nba.com"); for (int i=0; i<SW.length; i++) System.out.println(SW[i]); } }	3	N	U	2	The array of internet address	<a href="#">Edit</a>	<a href="#">Delete</a>
274	What will be displayed in the output? import java.net.*; class myAddress { public static void main (String args[]) { try { InetAddress address = InetAddress.getLocalHost(); System.out.println(address); } catch (UnknownHostException e) { System.out.println("Could not find this computer's address."); } } }	3	N	U	2	The internet address of the host	<a href="#">Edit</a>	<a href="#">Delete</a>
275	When client and server is communicating using TCP protocol then communication is _____	3	N	U	2	connection-oriented, concurrent	<a href="#">Edit</a>	<a href="#">Delete</a>
276	when creating a client on a server port that is already in use _____	3	N	U	2	client can connect to the server regardless of whether the port is in use	<a href="#">Edit</a>	<a href="#">Delete</a>
277	When UnknownHostException is thrown, that indicates	3	N	U	2	The IP address of a host could not be determined	<a href="#">Edit</a>	<a href="#">Delete</a>
278	Which Datagram method returns the byte array of data contained in the datagram?	3	N	U	2	byte[] getData ()	<a href="#">Edit</a>	<a href="#">Delete</a>
279	Which is correct client code for following server code? import java.net.*; import java.io.*; class tcpip_server { public static void main(String args[]) throws IOException { ServerSocket n1=null; try { n1=new ServerSocket(98); } catch(IOException e) { System.err.println("Port 98 could not be found"); System.exit(1); } Socket c=null; try { c=n1.accept(); System.out.println("Connection from "+c); } catch(IOException e) { System.out.println("Accept failed"); System.exit(1); } PrintWriter out=new PrintWriter(c.getOutputStream(),true); BufferedReader in=new BufferedReader(new InputStreamReader(c.getInputStream())); String n; BufferedReader sin=new BufferedReader(new InputStreamReader(System.in)); System.out.println("Ready to type now"); while((n=sin.readLine())!=null) { out.println(n); } out.close(); c.close(); n1.close(); } }	3	N	A	2	import java.net.*; import java.io.*; class tcpip_client { public static void main(String args[]) throws IOException { Socket s=null; BufferedReader b=null; try { s=new Socket(InetAddress.getLocalHost(),98); b=new BufferedReader(new InputStreamReader(s.getInputStream())); } catch(UnknownHostException u) { System.err.println("I don't know host"); System.exit(0); } String inp; while((inp=b.readLine())!=null) { System.out.println(inp); } b.close(); s.close(); } }	<a href="#">Edit</a>	<a href="#">Delete</a>
280	Which Statement is missing in following code import java.net.*; public class InetAddressExample { public static void main(String arg[]) { try { System.out.println("CTE:"+ad); System.out.println("CTE:"+ad.getHostAddress()); System.out.println("CTE:"+ad.getHostName()); } catch(UnknownHostException e) {} } }	3	N	A	2	InetAddress ad=InetAddress.getByName("localhost");	<a href="#">Edit</a>	<a href="#">Delete</a>
281	Which class can be used to create a server socket. This object is used to establish communication with the clients ?	3	N	U	2	Both A & B	<a href="#">Edit</a>	<a href="#">Delete</a>
282	Which code segment listens for a socket connection?	3	N	U	2	Socket socket = HttpURLConnection.open(8080);	<a href="#">Edit</a>	<a href="#">Delete</a>
283	Which constructor is used to create ServerSocket connected to port no	3	N	U	2	ServerSocket(1254)	<a href="#">Edit</a>	<a href="#">Delete</a>

	1254 and maxq length as 50.							
284	Which constructors of DatagramPacket class are used for receiving purpose?	3	N	U	2	All		Edit Delete
285	Which Exception is thrown by DatagramSocket class constructor	3	N	U	2	SocketException		Edit Delete
286	Which five parameters uniquely identify a Connection ?	3	N	U	2	Local IP, Remote IP, Local MAC, Remote MAC and Protocol		Edit Delete
287	Which ip address is multicast ip address	3	N	U	2	235.55.45.2		Edit Delete
288	Which is correct sequence of steps for establishing TCP Connection between client and server ? A)client instantiates a Socket object with server name and port. B) the server give call to accpet method form ServerSoccket class C)server opens a ServerSocket object with port number D)an accept method on server side returns reference to new Socket which connected to client	3	N	U	2	a,c,b,d		Edit Delete
289	Which is Factory method?	3	N	U	2	All of above		Edit Delete
290	which is not the constructor of URL? 1) public URL()throws MalformedURLException 2) public URL(String Protocol,String Host,int Port,String File) throws MalformedURLException 3) public URL(String URL) throws MalformedURLException. 4) public URL(URL Context,String Url)throws MalformedURLException	3	N	U	2	1		Edit Delete
291	which is not the method of security class? 1) SocketPermission() 2) FilePermission() 3) DataPermission() 4) Non Of Above	3	N	U	2	3		Edit Delete
292	Which is reserved port of HTTP & FTP	3	N	U	2	80 & 21		Edit Delete
293	Which is responsible for determining whether code executing in Java runtime environment has permission to perform a security_sensitive operation	3	N	U	2	security class		Edit Delete
294	Which is the class present in java.net package used to create packet from byte array and destination address?	3	N	U	2	DatagramPacket		Edit Delete
295	Which method is used to obtain the Portno of client in Client Program	3	N	U	2	getLocalPort()		Edit Delete
296	Which method Returns the output stream of the URL connection ?	3	N	U	2	getOutputStream()		Edit Delete
297	Which methods are commonly used in ServerSoccket class ?	3	N	U	2	public Socket accept()		Edit Delete
298	Which minimum package statements are missing? class InetDemo { public static void main(String args[]) { try { Socket s=new Socket("127.0.0.1",1234); InputStream ip=s.getInputStream(); OutputStream op=s.getOutputStream(); Date d=new Date(); String datemsg=String.valueOf(d); op.write(datemsg.getBytes()); op.close(); } catch(Exception e) { System.out.println(e); } } }	3	N	U	2	import java.net.*; import java.util.*; import java.io.*;		Edit Delete
299	Which of the following is not a factory method of InetAddress class	3	N	U	2	static InetAddress getAllLocalHost() throws UnknownHostException		Edit Delete
	Which of the following statement is missing in following code: import java.io.*; import java.net.*; public class demo { public static void main(String args[]) throws Exception { ServerSocket ss = new							

300	<pre>ServerSocket(8); DataInputStream in = new DataInputStream(so.getInputStream()); String pass1 = in.readLine(); if(pass1.equals("hi")) { System.out.print("\nPassword Is Correct"); PrintStream p1 = new PrintStream(so.getOutputStream()); p1.println("Welcome"); } else { System.out.print("\nWrong Password Entered"); } } }</pre>	3	N	U	2	Socket so = ss.accept();	<a href="#">Edit</a>	<a href="#">Delete</a>
301	Which of these are correct constructor/s of URL class?	3	N	U	2	All of above	<a href="#">Edit</a>	<a href="#">Delete</a>
302	Which of these class is used to encapsulate IP address and DNS?	3	N	U	2	InetAddress	<a href="#">Edit</a>	<a href="#">Delete</a>
303	Which of these methods is used to know host of an URL?	3	N	U	2	getHost()	<a href="#">Edit</a>	<a href="#">Delete</a>
304	which of this class is not related to input and output stream in terms of functioning?	3	N	A	2	Reader	<a href="#">Edit</a>	<a href="#">Delete</a>
305	<pre>Which protocol will be used/printed in the following example import java.net.*; public class URLDemo { public static void main(String args[]) throws MalformedURLException { URL hp = new URL("http://www.mskte.com/downloads"); System.out.println("Protocol: " + hp.getProtocol()); System.out.println("Port: " + hp.getPort()); System.out.println("Host: " + hp.getHost()); System.out.println("File: " + hp.getFile()); System.out.println("Ext: " + hp.toExternalForm()); } }</pre>	3	N	A	2	HTTP	<a href="#">Edit</a>	<a href="#">Delete</a>
306	<pre>Which Statement gives an error import java.net.*; import java.io.*; public class URLTest { public static void main(String args[]) throws MalformedURLException { URL url1 = new URL(); URLConnection hp = openConnection("http://www.mskte.com/download"); System.out.println("Protocol:" + url1.getProtocol()); System.out.println("Port:" + url1.getPort()); System.out.println("Host:" + url1.getHost()); System.out.println("File:" + url1.getFile()); } }</pre>	3	N	A	2	C.Both A and B	<a href="#">Edit</a>	<a href="#">Delete</a>
307	<pre>Which statement is missing from the code import java.net.*; import java. io.*; class Demo { public static void main(String args[]) { URL url=new URL("http://www.yahho.com/context/current/news.html"); System.out.println("{Protocol :" +url. ); } }</pre>	3	N	A	2	getProtocol()	<a href="#">Edit</a>	<a href="#">Delete</a>
308	<pre>Write a syntax to prepare DatagramPacket Object as sendPacket by using other parameter as following. InetAddress IPAddress = InetAddress.getByName("127.0.0.1"); byte[] sendData = new byte[1024]; int port=9876; String sentence = inFromUser.readLine(); sendData = sentence.getBytes();</pre>	3	N	A	2	DatagramPacket sendPacket=DatagramPacket(sendData, sendData.length, IPAddress, port);	<a href="#">Edit</a>	<a href="#">Delete</a>
309	You can invoke _____ on a Socket object, say socket, to obtain an InetAddress object.	3	N	A	2	socket.getInetAddress();	<a href="#">Edit</a>	<a href="#">Delete</a>
310	You can obtain the server's hostname by invoking _____ on an applet.	3	N	U	2	getCodeBase().getHost()	<a href="#">Edit</a>	<a href="#">Delete</a>
311	_____ method is used to examine the address and port information by the socket.	3	N	U	2	getInetAddress().	<a href="#">Edit</a>	<a href="#">Delete</a>
312	_____ is a protocol for breaking and sending packets to an address across a network?	3	N	U	2	TCP/IP	<a href="#">Edit</a>	<a href="#">Delete</a>

313	_____ are used to implement reliable, bidirectional, persistent point to point stream based connection.	3	N	U	2	TCP/IP	<a href="#">Edit</a>	<a href="#">Delete</a>
314	_____ is a bundle of information passed between machines.	3	N	U	2	Datagram	<a href="#">Edit</a>	<a href="#">Delete</a>
315	_____ is a general-purpose class for accessing the attributes of a remote	3	N	U	2	URLConnection	<a href="#">Edit</a>	<a href="#">Delete</a>
316	_____ server can process multiple request at a time	3	N	U	2	a concurrent	<a href="#">Edit</a>	<a href="#">Delete</a>
317	_____ is a factory method of InetAddress class which returns an array of InetAddress.	3	N	U	2	getAllByName()	<a href="#">Edit</a>	<a href="#">Delete</a>
318	_____ class is necessary to implements Datagram	3	N	U	2	both a and b	<a href="#">Edit</a>	<a href="#">Delete</a>
319	_____ is a mediator used in between Web Server and Client	3	N	U	2	Proxy	<a href="#">Edit</a>	<a href="#">Delete</a>
320	_____ are the instance methods of InetAddress class.	3	N	U	2	All	<a href="#">Edit</a>	<a href="#">Delete</a>
321	..... method is used for testing whether the specified element is a file or not.	3	N	A	2	isFile()	<a href="#">Edit</a>	<a href="#">Delete</a>
322	.....method is used to find the host URL?	3	N	U	2	getHost()	<a href="#">Edit</a>	<a href="#">Delete</a>
323	.....thrown to indicate that IP address of Host could not be Determined	3	N	U	2	UnknownHostException	<a href="#">Edit</a>	<a href="#">Delete</a>
324	.....method of datagram packet is used to find the port number.	3	N	U	2	getPort()	<a href="#">Edit</a>	<a href="#">Delete</a>
325	A technique that creates a subletting effect; one server answers ARP requests for multiple hosts?	3	N	U	2	Proxy Server	<a href="#">Edit</a>	<a href="#">Delete</a>
326	Which client accesses the Web server by using a GET MESSAGE?	3	N	U	2	HTTP	<a href="#">Edit</a>	<a href="#">Delete</a>
327	Which of these is a protocol for breaking and sending packets to an address across a network?	3	N	U	2	TCIP/IP	<a href="#">Edit</a>	<a href="#">Delete</a>

### e-Exam Manage Questions for Advanced Java Programming (17625) for topic 4 Go Back to Subjects

Q No	Question	To pic	Fig ure	Q Type	Mar ks	Answer
1	A Java program cannot directly communicate with an ODBC driver because	4	N	R	1	ODBC written in C language
2	A JDBC technology -based driver ("JDBC driver") makes it possible to do ?	4	N	R	1	All mentioned above
3	Abbreviate the term DSN	4	N	R	1	Data Source Name
4	An API can be created for	4	N	R	1	All of these
5	API stands for	4	N	R	1	application program interface
6	API which controls access to the row result of a given Statement and holds data retrieved from a database after you execute an SQL query using Statement objects.	4	N	R	1	java.sql.ResultSet
7	Application Server used in _____	4	N	R	1	Three-Tier Mode
8	Backbone of JDBC Architecture is _____	4	N	R	1	Driver Manager
9	boolean isLast() method defines _____	4	N	R	1	Determines whether the ResultSet cursor points to the last row of the I
10	Callable Staement used to -----	4	N	R	1	calling procedure
11	Callable statement object in JDBC is used to execute a call to	4	N	R	1	stored procedure
12	CallableStatement is used to execute_____	4	N	R	1	Stored Procedures
13	Choose the correct syntax for getConnection() method	4	N	R	1	public static Connection getConnection(String url, String name, String p SQLException
14	Class.forName("_____")	4	N	R	1	sun.jdbc.odbc.JdbcOdbcDriver
15	class.forName() method throws	4	N	R	1	ClassNotFoundException
16	Connection object can be initialized using the _____ method of the DriverManager Class.	4	N	R	1	getConnection()
17	createStatement() method without any parameter is used to create a statement with _____	4	N	R	1	a forward only and read only ResultSet
18	Database meta data are retrieved through _____.	4	N	R	1	a PreparedStatement object
19	DELETE statement of an SQL is executed by _____.	4	N	R	1	executeUpdate()
20	DriverManager.getConnection(_____,_____,_____) What are the two parameters that are included ?	4	N	R	1	URL or machine name where server runs, User ID, Password
21	DSN stands for	4	N	R	1	Data Source Name
22	Every driver must provide a class that should implement the _____	4	N	R	1	Driver interface
23	execution of delete SQL query in JDBC, ..... method must be used.	4	N	R	1	executeUpdate()
24	Following is return type of executeUpdate( ):	4	N	R	1	int
25	For execution of INSERT SQL query in JDBC, ..... method must be used.	4	N	R	1	executeUpdate()
26	For execution of SELECT SQL query in JDBC, _____ method must be used.	4	N	R	1	executeQuery()

27	forName is a _____ type method	4	N	R	1	static
28	getConnection() method of which class	4	N	R	1	DriverManager
29	getUserName() method is used to _____	4	N	R	1	retrieve name of user
30	How can you execute DML statements (i.e. insert, delete, update) in the database?	4	N	R	1	By invoking the executeUpdate(...) method of a Statement object
31	How can you retrieve information from a ResultSet?	4	N	R	1	By invoking the special getter methods on the ResultSet: getString(...), getInt(...)
32	How many JDBC driver types are available by sun Microsystem?	4	N	R	1	Four
33	How many steps are used to connect any java application with the database using JDBC?	4	N	R	1	5
34	How many transaction isolation levels are defined in java.sql.Connection interface	4	N	R	1	5
35	If a PreparedStatement is a SQL SELECT statement, you execute the statement using _____.	4	N	R	1	PreparedStatement.executeQuery();
36	If you need to use a stored procedure with output parameters, which of the following statement type should be used to call the procedure?	4	N	R	1	CallableStatement
37	In 2-tier architecture , the first tier is generally_____	4	N	R	1	GUI
38	In JDBC _____ imports all java classes concerned with database connectivity.	4	N	R	1	java.sql.*
39	In the following JDBC drivers which is known as partly java driver?	4	N	R	1	Native-API driver
40	In the three tier model the middle tier of the services acts as a mediator between _____ and _____.	4	N	R	1	Java application and databases
41	In which model java application or applet supports for database access?	4	N	R	1	both a and b
42	In which type of driver must Odbc drivers be loaded on client machine?	4	N	R	1	Type 1
43	Invoking Class.forName() method may throw _____.	4	N	R	1	ClassNotFoundException
44	JDBC is a ----- interface, which means that it is used to invoke SQL commands directly.	4	N	R	1	low level
45	JDBC Stands for	4	N	R	1	Java Database Connectivity
46	JDBC stands for:	4	N	R	1	Java Database Connectivity
47	JDBC-ODBC bridge product provide _____ access via _____.	4	N	R	1	JDBC driver, ODBC drivers
48	Methods of ResultSet() throws _____	4	N	R	1	SQLException
49	Microsoft access stores data in a _____ file format	4	N	R	1	.MDB
50	Name the type number belongs to JDBC ODBC Bridge driver?	4	N	R	1	Type 1
51	Native API converts _____ into the _____ used by DBMS.	4	N	R	1	JDBC API, Native API calls
52	Native – protocol pure Java converts ..... in to the ..... used by DBMSs directly.	4	N	R	1	JDBC calls, network protocol
53	ODBC Drivers are platform _____	4	N	R	1	Dependent
54	ODBC is not appropriate for direct use from java because it uses a .....	4	N	R	1	C interface
55	ODBC minimum SQL grammar contains	4	N	R	1	INSERT, UPDATE ,DELETE ONLY
56	ODBC requires configuring _____ which represents the target database.	4	N	R	1	Data Source Name
57	ODBC stands for	4	N	R	1	open database connectivity
58	Prepared statement object in JDBC is used to execute_____Queries	4	N	R	1	parameterized

59	PreparedStatements are used for calling_____	4	N	R	1	precompile Statement
60	prepareStatement method is from which class	4	N	R	1	Connection Class
61	return type of execute() method is	4	N	R	1	boolean
62	SQL stands for _____ .	4	N	R	1	Structured Query Language
63	Statement is_____.	4	N	R	1	interface
64	The JDBC -ODBC Bridge is_____	4	N	R	1	Multitreaded
65	The -----method executes a simple query and returns a single Result Set object	4	N	R	1	executeQuery()
66	The ..... object provides you with methods to access data from the table.	4	N	R	1	ResultSet
67	The ..... method sets the query parameters of the PreparedStatement Object.	4	N	R	1	setString()
68	The ..... object allows you to execute parameterized queries.	4	N	R	1	PreparedStatement
69	The ..... method executes an SQL statement that may return multiple results.	4	N	R	1	execute()
70	The ..... package contains classes that help in connecting to a database, sending SQL statements to the database, and processing the query results.	4	N	R	1	java.sql
71	The command to remove all the rows from a table 'CUSTOMER' is:	4	N	R	1	DELETE FROM CUSTOMER
72	The correct string for loading Jdbc-Odbc bridge driver using Class.forName() method is:	4	N	R	1	sun.jdbc.odbc.JdbcOdbcDriver
73	The First task in JDBC is _____ .	4	N	R	1	register a driver
74	The interface used to execute SQL stored procedures	4	N	R	1	CallableStatement
75	The JDBC API is an application interface of java for connection java as	4	N	R	1	Middle
76	The JDBC API is application interface connecting java as _____	4	N	R	1	Front End
77	The parameters of the PreparedStatement object are ..... when the user clicks on the Query button.	4	N	R	1	initialized
78	The PreparedStatement_____symbol is placeholder that is replaced by the input parameter at seen time.	4	N	R	1	?
79	The ResultSet _____provides methods for retrieving and manipulating the results of executed queries.	4	N	R	1	interface
80	The Type 3 architecture is _____	4	N	R	1	JDBC-Net pure Java
81	The valid constant to represent ResultSet type is _____	4	N	R	1	All of the mentioned
82	The _____ object provides you with methods to access data from the table.	4	N	R	1	ResultSet
83	The _____ package contains classes that help in connecting to a database, sending SQL statements to the database and processing the query results.	4	N	R	1	java.sql.*
84	The _____ interface Provides various methods for getting information about Database.	4	N	R	1	DatabaseMetaData
85	The _____ driver resolves JDBC call and makes equivalent ODBC Call	4	N	R	1	JDBC-ODBC bridge
86	The_____ is the language for interacting with Database.	4	N	R	1	Structured Query Language(SQL)
87	To execute SQL query which method is used.	4	N	R	1	All of these
88	To retrieve a Connection object,..... Method is used.	4	N	R	1	getConnection( )
89	Type 1 driver is also known as	4	N	R	1	JDBC-ODBC Bridge Driver
90	Type 3 driver is also known as_____	4	N	R	1	JDBC-net Pure Java
91	Type II JDBC driver is also known as_____	4	N	R	1	Native API partly Java driver

92	Type IV JDBC driver is also known as _____	4	N	R	1	Native Protocol Pure-Java Driver
93	Type4 driver is also known as:	4	N	R	1	100% Pure Java
94	What is JDBC	4	N	R	1	Java API with databases
95	What maintains a cursor pointing to a particular row of data initially, cursor points to before the first row?	4	N	R	1	ResultSet interface
96	Where the object of ResultSet maintains a cursor?	4	N	R	1	First Row
97	Which among the below is not an interface of java.sql Package	4	N	R	1	ResultSetStatement
98	Which are the JDBC components?	4	N	R	1	All of the above
99	Which class is used to connect java application to JDBC driver	4	N	R	1	DriverManager
100	Which class/ interface is used for an SQL statement that is executed frequently?	4	N	R	1	PreparedStatement
101	Which driver provides JDBC API access via one or more ODBC drivers	4	N	R	1	JDBC-ODBC bridge driver
102	Which driver is called as a thin driver in JDBC?	4	N	R	1	Type-4 Driver
103	Which driver is efficient and always preferable for using JDBC applications?	4	N	R	1	Type-4
104	Which driver is needed to connect to Microsoft database?	4	N	R	1	JDBC-ODBC Bridge Driver
105	Which driver type use middleware server(Application Server)?	4	N	R	1	Type 3
106	which from the below use "middle-tier"	4	N	R	1	All of above
107	Which interface is important from java.sql package in JDBC?	4	N	R	1	Connection
108	Which Interface is used to execute dynamic SQL statements?	4	N	R	1	PreparedStatement
109	Which interface provides methods to execute queries with the database?	4	N	R	1	Statement interface
110	Which is default ResultSet type	4	N	R	1	TYPE_FORWARD_ONLY
111	Which is not a type of JDBC driver	4	N	R	1	JDBC-Native pure java
112	Which is the correct syntax of next( ) method of ResultSet?	4	N	R	1	boolean next( )
113	Which JDBC driver Type (s) can be used in either applet or servelt code?	4	N	R	1	Both Type 3 and Type 4
114	Which JDBC driver Type(s) can you use in a three-tier architecture and if the Web server and the DBMS are running on the same machine?	4	N	R	1	Both Type 3 and 4
115	Which JDBC driver Types are used for over communications networks?	4	N	R	1	Both Type 3 and Type 4
116	Which kind of driver convert JDBC calls into calls on the client API for Oracle, Sybase, Informix, IBM DB@ , or Other DBMS	4	N	R	1	Native-API partly-Java driver
117	Which method is used to obtain count of total rows of ResultSet	4	N	R	1	getRow
118	Which method is used to perform DML statements in JDBC?	4	N	R	1	executeUpdate()
119	Which method is used to send CREATE TABLE queries to database using JDBC?	4	N	R	1	executeUpdate()
120	Which method must be used to execute INSERT, UPDATE, or DELETE statement .	4	N	R	1	executeUpdate()
121	Which method of class is used to register & dynamically load the driver class?	4	N	R	1	forName()
122	Which of the following describes the correct sequence of the steps involved in making a connection with a database. 1. Loading the driver 2. Process the results. 3. Making the connection with the database. 4. Executing the SQL statements.	4	N	R	1	1,3,4,2
123	which of the following function is used to find the column count of the particular ResultSet ?	4	N	R	1	getColumnName()
124	Which of the following invokes functions in sql ?	4	N	R	1	Callable statements

125	Which of the following is interfaces?	4	N	R	1	Statement
126	Which of the following is not valid method of DriverManager class?	4	N	R	1	createStatement()
127	Which of the following is the correct order of keywords for SQL SELECT statements?	4	N	R	1	SELECT, FROM, WHERE
128	Which of the following is used for sending SQL statements?	4	N	R	1	Statement
129	Which of the following method is used to load and register driver ?	4	N	R	1	Class.forName("sun.jdbc.odbc.JdbcOdbcDriver")
130	Which of the following methods are needed for loading a database driver in JDBC?	4	N	R	1	Both A and B
131	Which of the following model is java applet or application directly communicates with data source?	4	N	R	1	Two tier
132	Which of the following model is known as client/server configuration.	4	N	R	1	Two-tier
133	Which of the following package contains all JDBC API's those are required to make connection with database?	4	N	R	1	java.sql.*
134	Which of the following statement is a prepared statements ?	4	N	R	1	Insert into department values(?, ?, ?)
135	Which of the following statements loads the JDBC-ODBC driver?	4	N	R	1	Class.forName("sun.jdbc.odbc.JdbcOdbcDriver")
136	Which of the following translates the socket information in call format required by the DBMS.	4	N	R	1	Middleware Application Server
137	Which of the following statement is false as far as different type of statements is concerned in JDBC?	4	N	R	1	Interim statement
138	Which of these API represents that software programs can follow to communicate with each other?	4	N	R	1	Both A & B
139	Which one of the following will not get the data from the first column of ResultSet rs, returned from executing the following SQL statement: SELECT name, rank, serial_No FROM employee?	4	N	R	1	rs.getString(0)
140	Which package is necessary to import all java classes concerned with database connectivity?	4	N	R	1	java.sql.*
141	Which package need to be imported for establishing connection with database	4	N	R	1	java.sql
142	Which statement is static and synchronized in JDBC.	4	N	R	1	getConnection()
143	Which statements about JDBC are true?	4	N	R	1	Both II and III
144	Which type of driver provides JDBC access one or more ODBC drivers?	4	N	R	1	Type 1 driver
145	Which type of driver converts JDBC calls into the network protocol used by the database management system directly	4	N	R	1	Type 4 Driver
146	Which type of driver is unique in JDBC?	4	N	R	1	JDBC-Native API
147	Which was first most widely used programming interface for accessing relational databases on almost all platforms ?	4	N	R	1	ODBC API
148	Why do we need the JDBC API?	4	N	R	1	All of the above
149	You can add a row using SQL in a database with which of the following?	4	N	R	1	INSERT
150	_____ calls get converted into native C or C++ API calls.	4	N	R	1	JDBC Native API
151	_____ is an interface by which application programs can access and process SQL databases in a DBMS-independent manner.	4	N	R	1	ODBC
152	_____ Interface is important from java.sql package in JDBC	4	N	R	1	Connection
153	_____ interface is used to know the capabilities or information about a database Management system DBMS with JDBC Driver.	4	N	R	1	Database Metadata
154	_____ method of Connection interface is used to create statement	4	N	R	1	createStatement()
155	_____ method of DriverManager class is used to create connection with database.	4	N	R	1	getConnection()

156	_____ interface allows storing results of query?	4	N	R	1	ResultSet
157	_____ is a table of data which represents a data from database	4	N	R	1	ResultSet
158	_____ interface represents the comprehensive information about the database package.	4	N	R	1	DatabaseMetaData
159	What is data in following program: import java.sql.*; public class Selectdbase { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:data"); Statement st=con.createStatement(); ResultSet rs=st.executeQuery("select * from emp"); while(rs.next()) { System.out.println("id:"+rs.getInt("id")); System.out.println("salary:"+rs.getString("salary")); System.out.println("name:"+rs.getString("name1")); } con.close(); } catch(SQLException e) {} catch(Exception e) {} } }	4	N	A	2	data source name
160	'?' symbol is used for _____	4	N	U	2	parameter in prepared statement
161	.Find out error from following code. import java.sql.*; public class Updatedbase { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:data2"); Statement st=con.createStatement(); resultSet rs=st.executeQuery("select * from college"); while(rs.next()) { System.out.println("id:"+rs.getInt("id")) System.out.println("name1:"+rs.getString("name1")); } con.close(); } catch(SQLException e) {} catch(Exception e) {} } }	4	N	A	2	; missing
162	1. Choose the correct option to establish a connection to database named student and display its contents.	4	N	A	2	import java.sql.*; class OracleCon{ public static void main(String args[]) try{ Class.forName("oracle.jdbc.OracleDriver"); Connecti con=DriverManager.getConnection("jdbc:oracle:thin:@localhost:1521:xe");Statement stmt=con.createStatement(); ResultSet rs=stmt.executeQuery("from student"); while(rs.next()) System.out.println(rs.getInt(1)+"&"+rs.getString(2)+"&"+rs.getString(3)); con.close(); } System.out.println(e); } }
163	A benefit of the three-tier architecture is which of the following?	4	N	U	2	New modules can be built to support specific business needs.
164	afterLast() method returns.....	4	N	U	2	Moves cursor to the end of resultset that is after last row
165	All raw data types including binary documents or images should be read and uploaded to the database as an array of ....	4	N	U	2	byte
166	Analyse the following code and fill the appropriate statement in the blanks import java.sql.*; class DB { public static void main(String args[])throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:mydsn"); Statement stmt=con.createStatement(); ResultSet rs=stmt. ("select * from emp where id=101"); System.out.println("EmpName\tDesignation\tSalary"); while(rs.next()) { System.out.println(rs.getString(2)+"\t"+rs.getString(3)+"\t"+rs.getInt(4)); } con.close(); } }	4	N	A	2	executeQuery()
167	Analyse the following code and find errors. import java.sql.*; class DisplayRecord { public static void main(String args[])throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:xyz"); Statement stmt=con.createStatement(); ResultSet rs=stmt.executeUpdate("select * from emp where id=101"); con.close(); } }	4	N	A	2	Error is in query execution statement
168	Analyse the following code and find out errors import java.sql.*; class Record { public static void main(String args[])throws Exception { Class.forName("jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:mydsn"); Statement stmt=con.createStatement(); ResultSet rs=stmt.executeQuery("select * from emp where id=101"); System.out.println("EmpName\tDesignation\tSalary"); while(rs.next()) { System.out.println(rs.getString(1)+"\t"+rs.getString(2)+"\t"+rs.getInt(3)); } con.close(); } }	4	N	A	2	Error is in statement in which driver is registered
169	Analyse the following code and find out missing statement. import java.sql.*; class Record { public static void main(String args[])throws Exception { Connection con=DriverManager.getConnection("jdbc:odbc:xyz"); Statement stmt=con.createStatement();	4	N	A	2	Missing driver registration statement

	<pre>ResultSet rs=stmt.executeQuery("select * from emp where id=101"); System.out.println("EmpName\tDesignation\tSalary"); where(rs.next()) { System.out.println(rs.getString(2)+"\t"+rs.getString(3)+"\t"+rs.getInt(4)); } con.close(); } }</pre>				
170	Analyze the following code: <pre>ResultSet resultSet = statement.executeQuery ("select firstName, mi, lastName from Student where lastName " + " = 'Smith'"); System.out.println(resultSet.getString(1));</pre>	4	N	U	2
171	Analyze the following code: <pre>ResultSet resultSet = statement.executeQuery ("select firstName, mi, lastName from Student where lastName " + " = 'Smith'"); System.out.println(resultSet.getString(1));</pre>	4	N	A	2
172	API is which of the following	4	N	U	2
173	Are Resultsets Updateable?	4	N	A	2
174	boolean execute() method returns	4	N	U	2
175	By using which interface one can store images in the database in java ?	4	N	U	2
176	Choose missing statements in following code from given options. <pre>import java.sql.*; class DBTest { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Driver Loaded"); String url="jdbc:odbc:xyz"; Connection con=DriverManager.getConnection(url); System.out.println("Connection to database is created"); Statement st=con.createStatement(); System.out.println("Statement Object is created"); catch(SQLException e) { System.out.println("SQL Error"); } catch(Exception e) { System.out.println("Error"); } } }}</pre>	4	N	A	2
177	Choose missing statements in following code from given options. <pre>Import java.sql.*; Class conn { Public static void main(String args[]) { try { System.out.println("Drivers are properly loaded"); String url="jdbc:odbc:abc"; Connection con=DriveManager.getConnection(url); System.out.println("Connection Established"); con.close(); } catch(SQLException e) { System.out.println("SQL Error has occurred "); catch(Exception e) { System.out.println("Error! Connection not established"); } } }}</pre>	4	N	A	2
178	Choose missing statements in following code from given options. <pre>import java.sql.*; class DemoFetch { public static void main(String args[]) { Connection con; Statement stmt; ResultSet rs; String qry, url; try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); url="Jdbc:Odbc:studdsn"; con=DriverManager.getConnection(url,"",""); stmt=con.createStatement(); qry="select * from stud"; rs=_____ ; System.out.println("Roll No\tName\tPercentage"); while(rs.next()) { int rno=rs.getInt("roll"); String nm=rs.getString("sname"); double per=rs.getDouble("per"); System.out.println(rno+"\t"+nm+"\t"+per); } con.close(); }catch(Exception e){} } }}</pre>	4	N	A	2
179	Choose missing statements in following code from given options. <pre>import java.sql.*; class DemoFetch1 { public static void main(String args[]) { Connection con; PreparedStatement pstmt; ResultSet rs; String qry,url; try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); url="Jdbc:Odbc:studdsn"; con=DriverManager.getConnection(url,"",""); qry="select * from stud"; pstmt=con.prepareStatement(qry); rs=_____ ; System.out.println("Roll No\tName\tPercentage"); while(rs.next()) { int rno=rs.getInt("roll"); String nm=rs.getString("sname"); double per=rs.getDouble("per"); System.out.println(rno+"\t"+nm+"\t"+per); } con.close(); }catch(Exception e) {System.out.println(e.toString());} } }}</pre>	4	N	A	2
180	Choose missing statements in following code from given options. <pre>import java.sql.*; import java.io.*; class DemoPreparedStm { Connection con; PreparedStatement pstmt; String qry,url; public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); url="Jdbc:Odbc:studdsn"; con=DriverManager.getConnection(url,"",""); qry=_____ ; pstmt=con.prepareStatement(qry); pstmt.clearParameters(); pstmt.setInt(1,11); pstmt.setString(2,"XYZ"); pstmt.setDouble(3,65.77); int res=pstmt.executeUpdate(); if(res&gt;0) System.out.println("Record Inserted..."); else System.out.println("Error..."); con.close(); } }}</pre>	4	N	A	2

	<pre>&gt;catch(Exception e){} } }</pre>				
181	Choose the correct alternative to update employee table	4	N	A	2 PreparedStatement pstmt = null; try { String SQL = "Update Emp WHERE id = ?"; pstmt = conn.prepareStatement (SQL); ... } catch (Exception e) { pstmt.close (); }
182	Choose the correct output for the given code: <pre>import java.sql.*; class Mydatabase1 { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Driver Loaded"); Connection c=DriverManager.getConnection("jdbc:odbc:MYDSN", "", ""); Statement st=c.createStatement(); ResultSet rs=st.executeQuery("Select * from StudTable"); while(rs.next()) { System.out.println(rs.getString(1)+" "+rs.getString(2)); } rs.close(); st.close(); c.close(); } catch(Exception e) { System.out.println(e); } } }</pre>	4	Y2	A	2 S1Q54O1
183	Choose the correct syntax of creating query to read records with salary > 10000	4	N	A	2 select * from employee where salary > 10000
184	<pre>class Ddemo1 { public static void main(String args[]) throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection c=DriverManager.getConnection("jdbc:odbc:ODSN", "", ""); Statement s=c.createStatement(); ResultSet rs=s.executeQuery("select *from StudTable"); System.out.println("Name" + "\t" + "Roll_No" + "\t" + "Avg"); while(rs.next()) { System.out.println(rs.getString(1)+"\t"+rs.getInt(2)+"\t"+rs.getDouble(3)); } s.close(); c.close(); } class Ddemo1 { public static void main(String args[]) throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection c=DriverManager.getConnection("jdbc:odbc:ODSN", "", ""); Statement s=c.createStatement(); ResultSet rs=s.executeQuery("select *from StudTable"); System.out.println("Name" + "\t" + "Roll_No" + "\t" + "Avg"); while(rs.next()) { System.out.println(rs.getString(1)+"\t"+rs.getInt(2)+"\t"+rs.getDouble(3)); } s.close(); c.close(); } }</pre>	4	N	A	2 Missing package statement.
185	<pre>Connection con = DriverManager.getConnection ("jdbc:odbc:wombat", "login", "password"); Statement stmt = con.createStatement(); ResultSet rs = stmt.executeQuery("SELECT a, b, c FROM Table1"); while (rs.next()) { Integer x = rs.getInt("c"); String s = rs.getString("a"); Float f = rs.getFloat("b"); } What is WRONG with the code above?</pre>	4	N	A	2 Retrieval of the fields is in the wrong order.
186	Connection con=DriverManager.getConnection(url); this command will create the following	4	N	A	2 new con object of connection class initiated with connection of content
187	Connection object can be initialized using the ..... method of the Driver Manager class.	4	N	R	2 getConnection()
188	<pre>Consider following code and state missing code ? import java.sql.*; class exp2 { public static void main(String args[])throws Exception { try { Class.forName("-----"); Connection con=DriverManager.getConnection("Jdbc:Odbc:demo1dsn"); Statement st=con.createStatement(); ResultSet rs=st.executeQuery("select * from Table1"); System.out.println("After insertion of new record"); while(rs.next()) { System.out.println(rs.getString(1)); System.out.println(rs.getString(2)); System.out.println(rs.getString(3)); } st.executeUpdate("insert into Table1 values('jasmine',10,'banglore')"); ResultSet rs1=st.executeQuery("select * from Table1 "); while(rs1.next()) { System.out.println(rs1.getString(1)); System.out.println(rs1.getString(2)); System.out.println(rs1.getString(3)); } } catch(Exception e) {} } }</pre>	4	N	A	2 sun.jdbc.odbc.JdbcOdbcDriver
189	<pre>Consider following code and state which statement is missing in following code ? import java.sql.*; class JDBCDEMO { { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection c=DriverManager.getConnection("jdbc:odbc:ODSN", "", ""); ResultSet rs=s.executeQuery("select *from StudTable"); System.out.println("Name" + "\t" + "Roll_No" + "\t" + "Avg"); while(rs.next()) { System.out.println(rs.getString(1)+"\t"+rs.getInt(2)+"\t" "\t"+rs.getDouble(3)); } s.close(); c.close(); } }</pre>	4	N	A	2 Statement s=c.createStatement();
190	<pre>Consider Following Code. Select the statement that should be added to the program to get correct output. import java.sql.*; import java.io.*; public class DeleteRecord3 { public static void main (String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); BufferedReader br=new BufferedReader(new InputStreamReader(System.in)); System.out.print("Enter rollno to delete:"); int rno=Integer.parseInt(br.readLine()); Statement stmt=conn.createStatement(); stmt.executeUpdate("Delete from Stud where rno="+rno);</pre>	4	N	A	2 Connection conn=DriverManager.getConnection("jdbc:odbc:mcm&

	System.out.println("Record Deleted"); stmt.close(); conn.close(); br.close(); } catch(ClassNotFoundException ce){} catch(SQLException se){} catch(IOException ie){} } }																																	
191	consider following code. what is an ouput of given code? import java.sql.*; class Rsmd{ public static void main(String args[]){ try{ Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con = DriverManager.getConnection("jdbc:odbc:mydsn"); PreparedStatement ps=con.prepareStatement("select * from employee"); ResultSet rs=ps.executeQuery(); ResultSetMetaData rsmd=rs.getMetaData(); System.out.println("Total columns: "+rsmd.getColumnCount()); System.out.println("Column Name of 1st column: "+rsmd.getColumnName(1)); System.out.println("Column Type Name of 1st column: "+rsmd.getColumnTypeName(1)); con.close(); }catch(Exception e){ System.out.println(e); } } }	4	N	A	2	Total columns: 2 Column Name of 1st column: empid Column Type Name INTEGER																												
192	Consider following program what should be the correction done in the program to get correct output? Class demo { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Drivers are Loaded"); Connection con=DriverManager.getConnection("jdbc:odbc:abc"); System.out.println("Connection estbalished"); s1="select * fromemp"; Statement st=con.createStatement(); ResultSet rs=st.executeQuery(s1); rs=st.getResultSet(); while(rs.nextx()) { System.out.println("rs.getString(1)+"+rs.getInt(2)+"+rs.getInt(3)); } con.close( ); } catch(SQLException e) { System.out.println(e); } catch(Exception s) { System.out.println("s"); } } }	4	N	A	2	Both B and C option																												
193	Consider following program.What should be the output. import java.sql.*; public class Select_Demo { public static void main(String[] args) throws Exception { int records = 0; Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:DATA"); String sql = "SELECT COUNT(*) FROM User" ; PreparedStatement prest = con.prepareStatement(sql); ResultSet rs = prest.executeQuery(); while (rs.next()) { records = rs.getInt(1); } System.out.println("Number of records: " + records); con.close(); } }	4	N	A	2	Output display number of row from table.																												
194	Consider given database and Select correct output for following code: import java.sql.*; class StudentData { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con =DriverManager.getConnection("jdbc:odbc:stud"); PreparedStatement ps =con.prepareStatement("select * from Student where Marks > ?"); ps.setInt(1,70); //set question marks place holder ResultSet rs = ps.executeQuery(); //execute System.out.println("Students having marks > 70 are:"); while(rs.next()) System.out.println(rs.getString(2)); con.close(); }catch(Exception e){} } } Figure:- <table border="1"><thead><tr><th></th><th>Roll</th><th>Name</th><th>Marks</th></tr></thead><tbody><tr><td></td><td>1</td><td>Rakhee</td><td>75</td></tr><tr><td></td><td>2</td><td>Amit</td><td>49</td></tr><tr><td></td><td>3</td><td>Ajita</td><td>63</td></tr><tr><td></td><td>4</td><td>Rahul</td><td>78</td></tr><tr><td></td><td>5</td><td>Minal</td><td>67</td></tr><tr><td></td><td>6</td><td>Karthik</td><td>71</td></tr></tbody></table>		Roll	Name	Marks		1	Rakhee	75		2	Amit	49		3	Ajita	63		4	Rahul	78		5	Minal	67		6	Karthik	71	4	Y1	U	2	Students having marks > 70 are: Rakhee Rahul Karthik
	Roll	Name	Marks																															
	1	Rakhee	75																															
	2	Amit	49																															
	3	Ajita	63																															
	4	Rahul	78																															
	5	Minal	67																															
	6	Karthik	71																															
195	Consider the following code. Fill the proper method in the blank space . import java.sql.*; import java.io.*; public class UpdateRecord2 { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection conn=DriverManager.getConnection("jdbc:odbc:av"); Statement stmt=conn.createStatement(); BufferedReader br=new BufferedReader(new InputStreamReader(System.in)); System.out.println("Enter rollno:"); String rno=br.readLine(); System.out.println("Enter name:"); String nm=br.readLine(); System.out.println("Enter percentage:"); String p=br.readLine(); stmt.executeUpdate("update stud set name='"+nm+"',per='"+p+"' where rno='"+rno"); System.out.println("Record Updated"); stmt.close(); conn.close(); br.close(); } catch(ClassNotFoundException ce){} }	4	N	A	2	executeUpdate()																												

	catch(SQLException se){} catch(IOException ie){} } }				
196	Consider the following code, Find the missing statement to get correct output. public class DeleteRecords { public static void main(String[] args) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:DATA"); String query = "delete from tannis"; PreparedStatement pstmt = con.prepareStatement(query); pstmt.executeUpdate(); pstmt.close(); con.close(); } catch (Exception e) { System.out.println(e); } } }	4	N	A	2 All the above
197	Consider the following code, What should be the correction done in the program to get correct output. import java.sql.*; class CreateDemo { public static void main(String[] args) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con = DriverManager.getConnection("jdbc:odbc:DATA"); Statement st=con.createStatement(); String sql="create table Employee(Name char,Age int)"; st.execute(sql); System.out.println("created"); catch(SQLException e) { System.out.println(e); } catch(Exception e) { System.out.println(e); } } }	4	N	A	2 Missing }
198	Consider the following code. PreparedStatement stmt=con.prepareStatement("select * from emp"); ResultSet rs=stmt.executeQuery(); while(rs.next()){ System.out.println(rs.getInt(1)+" "+rs.getString(2)); } This is an example of prepared statement interface that will _____?	4	N	A	2 retrieve the record
199	Consider the following code.find error statement to execute the code import java.sql.*; public class JDBCExample { static final String JDBC_DRIVER = "com.mysql.jdbc.Driver" static final String DB_URL = "jdbc:mysql://localhost/STUDENTS"; static final String USER = "username"; static final String PASS = "password"; public static void main(String[] args) { Connection conn = null; try{ Class.forName("com.mysql.jdbc.Driver"); System.out.println("Connecting to a selected database..."); conn = DriverManager.getConnection(DB_URL, USER, PASS); System.out.println("Connected database successfully...."); }catch(SQLException se) { se.printStackTrace(); } catch(Exception e) { e.printStackTrace(); } finally{ try{ if(conn!=null) conn.close(); }catch(SQLException se){ se.printStackTrace(); } } System.out.println("Goodbye!"); }	4	N	A	2 Both option i and ii
200	Consider the following code.find missing statement in code so that get desired output import java.sql.*; public class mytabledelete { public static void main(String[] args) throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection(s); System.out.println("Connection Established"); PreparedStatement studste = con.prepareStatement("delete from student where rno=3"); studste.executeUpdate(); Statement s1 = con.createStatement(); String studqry = "select * from student"; ResultSet Rset = s1.executeQuery(studqry); while (Rset.next()) { int studid = Rset.getInt("rno"); String studname = Rset.getString("name"); System.out.println(studid + " " + studname); } } }	4	N	A	2 String s= (""jdbc:odbc:mystudtable");
201	Consider the following code.What should be the correction done in the code to get correct output? import java.sql.*; class mytable { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); String url = ("jdbc:odbc:mystudtable"); Connection con=DriverManager.getConnection(url); System.out.println("ConnectionEstablished"); Statement studste = con.createStatement(); String studqry = "create table student(rno int,name char)"; studste .execute(qry); } catch(SQLException e) { System.out.println("databse Connection error....."); } catch(Exception e) { System.out.println("Other error....."); } } }	4	N	A	2 Both option i and ii
202	Consider the following code.What will be student table data after executing this code as table was empty. import java.sql.*; public class mytableins { public static void main(String[] args) throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); String s = ("jdbc:odbc:mystudtable"); Connection con=DriverManager.getConnection(s); System.out.println("Connection Established"); PreparedStatement studste = con.prepareStatement("insert into student values(2,'Rani')"); studste .executeUpdate(); Statement s1 = con.createStatement(); ResultSet Rset = s1.executeQuery( "select * from student"); System.out.println("Roll No ....Name"); while (Rset.next()) { int studid = Rset.getInt("rno"); String studname = Rset.getString("name"); System.out.println(studid + " " +studname); } } }	4	N	A	2 only one record in table
	Consider the following code.Which statement need to update student table data by this code?				

	<pre>import java.sql.*; public class mytableupdate { public static void main(String[] args) throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); String s = ("jdbc:odbc:mystudtable"); Connection con=DriverManager.getConnection(s); System.out.println("Connection Established"); PreparedStatement studste = con.prepareStatement("update student set name='john' where rno=2"); Statement s1 = con.createStatement(); String studqry = "select * from student"; ResultSet Rset = stmt.executeQuery(studqry); while (Rset.next()) { int studid = Rset.getInt("rno"); String studname =Rset.getString("name"); System.out.println(studid + " " + studname); } } }</pre>	4	N	A	2	studste.executeUpdate();
203	Consider the following database: ID name Salary 1 ramesh 1200 2 ganesh 1111 6 sanjay 9500 What will be the correct output for following code: import java.sql.*; class SelectDemo { public static void main(String a[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Driver Loaded"); String url="jdbc:odbc:mydsn"; Connection con=DriverManager.getConnection(url); System.out.println(" Connection to DataBase created"); Statement stmt=con.createStatement(); String query="select * from emp"; ResultSet rs=stmt.executeQuery(query); while(rs.next()) { System.out.println(" ID : "+ rs.getInt(1)); System.out.println(" name : "+ rs.getString(2)); System.out.println(" Salary : "+ rs.getInt(3)); System.out.println(); } } catch(ClassNotFoundException e) { e.printStackTrace(); } catch(SQLException e) { e.printStackTrace(); } } }	4	N	A	2	Driver Loaded Connection to DataBase created ID : 1 name : ramesh S name : ganesh Salary : 1111 ID : 6 name : Sanjay Salary : 9500

408	The CallableStatement interface extends _____ interface	4	N	U	2	PreparedStatement
409	The following example to connect Java Application with access? import java.sql.*; class Test { public static void main(String ar[]) { try { String url="jdbc:odbc:mydsn"; Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection c=DriverManager.getConnection(url); Statement st=c.createStatement(); ResultSet rs=st.executeQuery("select * from login"); while(rs.next()) { System.out.println(rs.getString(1)); } }catch(Exception ee){System.out.println(ee);} } }	4	N	A	2	with DSN
410	The following step is for stmt.executeUpdate(sql); sql = "INSERT INTO Registration " + "VALUES(103, 'Sumit', 'Mittal', 28)"; stmt.executeUpdate(sql);	4	N	A	2	Insert
411	the interface to the database is handle by	4	N	U	2	APIS
412	The JDBC-ODBC bridge allows ----- to be used as -----	4	N	U	2	ODBC drivers,JDBC drivers
413	The JDBC-ODBC Bridge driver is	4	N	U	2	Both A & B

414	The JDBC-ODBC Bridge supports multiple concurrent open statements per connection?	4	N	A	2	one
415	The method - "public DatabaseMetaData getMetaData()" - belongs to the Interface _____	4	N	A	2	Connection interface
416	The methods of Statement interface are _____	4	N	U	2	All of the above
417	The output of following program is : import java.sql.*; class preparestmt { public static void main(String[] args) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("driver loaded"); String url = "jdbc:odbc:TYCM"; Connection con = DriverManager.getConnection(url); System.out.println("connection created"); PreparedStatement prepare=con.prepareStatement("select * from Information where age=15"); ResultSet rs=prepare.executeQuery(); if(rs.next()) { System.out.println("student information is"); System.out.println(rs.getString("name")); System.out.println(rs.getInt("age")); } else System.out.println("No student found"); con.close(); System.out.println("Connection is closed"); } catch (SQLException e) { System.out.println("SQL Exception"); } catch (Exception e) { System.out.println("General Exception"); }}}}	4	N	A	2	driver loaded connection created student information is BBB 15 Connec
418	The parameters of the PreparedStatement object are _____ when the user clicks on the Query button	4	N	U	2	initialized
419	The ResultSet is used to get information about a.....	4	N	U	2	ResultSet
420	The Statement interface is mainly used to_____	4	N	U	2	To execute queries asked to database
421	The statement _____ changes the Course title to Java Programming for the CourseID 11111.	4	N	U	2	update Course set title = 'Java Programing' where courseId = '11111'
422	The _____ method can be used on a _____ object to create its meta data object	4	N	U	2	getMetaData(),ResultSet
423	The _____ package contains classes that help in connecting to a database, sending SQL statements to the database, and processing the query result	4	N	U	2	java.sql
424	The _____ method sets the query parameters of the PreparedStatement Object.	4	N	U	2	setString()
425	The _____object provides you with methods to access data from the table.	4	N	U	2	ResultSet
426	This is an example of prepared statement interface that ? PreparedStatement stmt=con.prepareStatement("select * from emp"); ResultSet rs=stmt.executeQuery(); While(rs.next()){ System.out.println(rs.getInt(1) + " " + rs.getString(2)); }	4	N	A	2	B. retrieve the record
427	This is an example of Statement interface that? import java.sql.*; class PreStat { public static void main(String args[]) throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection c=DriverManager.getConnection("jdbc:odbc:student", " ", " "); Statement s=c.createStatement("select * from studTable"); ResultSet rs=s.executeQuery(); System.out.println("Name" + "\t" + "Roll_No"); while(rs.next()) { System.out.println(rs.getInt(1)+"\t"+rs.getString(2)); } s.close(); c.close(); } }	4	N	A	2	retrieve the record
428	This statement Tells the DB to empty transaction log & bring DB back to the state, before the changes in transaction log were executed	4	N	U	2	rollback()
429	Three-tier Architecture includes which of the following.	4	N	U	2	client layer and two server layers
430	To connect to a local MySQL database named test, use	4	N	U	2	Connection connection = DriverManager.getConnection("jdbc:mysql://localhost/test");
431	To delete record from database table student what modification we have to do in following program. import java.sql.*; public class JdbcDemo1 { public static void main(String args[]) throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con = DriverManager.getConnection("jdbc:odbc:mydsn"); Statement stmt = con.createStatement(); int result=stmt.executeUpdate("delete student where id=1"); System.out.println(result+" records affected"); con.close(); } }	4	N	A	2	int result=stmt.executeUpdate("delete from student where id=18
432	To establish connection with database which method of DriverManager class is used?	4	N	U	2	getConnection()

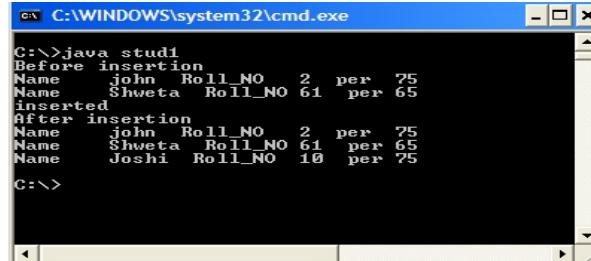

433	To establish the connection with the specified url?	4	N	U	2	public static Connection getConnection(String url)
434	To execute a SELECT statement "select * from Address" on a Statement object stmt, use	4	N	U	2	stmt.executeQuery("select * from Address");
435	To execute a stored procedure "totalStock" in a database server, which of the following code is used?	4	N	U	2	CallableStatement cbstmnt = con.prepareCall("{call totalStock}");cs.executeQuery();
436	To execute create query which method is used?	4	N	U	2	execute()
437	To obtain a scrollable or updateable result set, you must first create a statement using the following syntax:	4	N	U	2	Statement statement = connection.createStatement ResultSet.TYPE_SCROLL_INSENSITIVE,ResultSet.CONCUR_UPDATABLE);
438	To set the parameters in PreparedStatement which methods are used?	4	N	U	2	both a&b
439	To syntax for creating a table named Course should begin with _____.	4	N	U	2	create table Course (
440	To get the column names and row data from a table. Select the proper statement from the following AT * _____ line import java.sql.*; public class SelDemo { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con = DriverManager.getConnection("jdbc:odbc:c: myDSN "); Statement st = con.createStatement(); * _____ // (Choose correct option for this line) while(sel.next()) { String name = sel.getString(1); String pass = sel.getString(2); System.out.println(name+" "+pass); } } catch(Exception e) { System.out.println("Errorrrr"+e.getMessage()); } } }	4	N	A	2	ResultSet sel = st.executeQuery ("select * from Login");
441	try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Class.forName("oracle.jdbc.driver.OracleDriver"); } catch(ClassNotFoundException cnfe) { System.err.println("Error loading driver: " + cnfe); }	4	N	A	2	Will load two different drivers
442	two-tiers and three-tiers architecture is applicable with the database?	4	N	A	2	YES
443	Valid constant to set ResultSet as Scrollable is _____	4	N	A	2	Both B and C
444	We can use ResultSet navigation methods when we have ResultSet that is of type	4	N	U	2	both b&c
445	What contains object specific to database, and Used to create Connection object from the options ?	4	N	R	2	Driver Interface / Connect()
446	What correction should be done in the program to get corrected output import java.sql.*; import java.io.*; class JdbcP { public static void main(String arg[]) { try { DataInputStream in=new DataInputStream(System.in); Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Drivers loaded"); String url="jdbc:odbc:abc"; Connection con=DriverManager.getConnection(url); System.out.println("connection established"); PreparedStatement ps=con.prepareStatement("create table movie6(num Integer,mvnm Varchar(30)"); ps.executeUpdate(); System.out.println("Table Created"); String sql="insert into movie6 VALUES(?,?)"; PreparedStatement ps2=con.prepareStatement(sql); System.out.println("Enter movie code"); int mcd=Integer.parseInt(in.readLine()); ps2.setInt(1,mcd); System.out.println("Enter movie name"); String name=in.readLine(); ps2.setString(2,name); ps2.executeUpdate(); con.close(); } catch(SQLException e) { System.out.println(" sql error"); } catch(Exception e) { System.out.println(" connection error1"); } } }	4	N	A	2	String url="jdbc:odbc:abc";
447	What correction should be done in the program to get corrected output import java.sql.*; import java.io.*; class JdbcP { public static void main(String arg[]) { try { DataInputStream in=new DataInputStream(System.in); Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Drivers loaded"); String url="jdbc:odbc:abc"; Connection con=DriverManager.getConnection(url); System.out.println("connection established"); ps.executeUpdate(); System.out.println("Table Created"); String sql="insert into movie6 VALUES(?,?)"; PreparedStatement ps2=con.prepareStatement(sql); System.out.println("Enter movie code"); int mcd=Integer.parseInt(in.readLine()); ps2.setInt(1,mcd); System.out.println("Enter movie name"); String name=in.readLine(); ps2.setString(2,name); ps2.executeUpdate(); con.close(); } catch(SQLException e) { System.out.println(" sql error"); } catch(Exception e) { System.out.println(" connection error1"); } } }	4	N	A	2	Missing Statement
448	What does "msbte" indicate in the below code? Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection	4	N	U	2	Data Source Name

	con=DriverManager.getConnection("jdbc:odbc:msbte");				
449	What does the following code do? smt=con.createStatement();	4	N	A	2 A Statement object is created to send sql commands to the database
450	What happens after execution of following code import java.sql.*; public class JdbcAccessConnectionDemo { public static void main(String [] args) { Connection con = null; try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver") ; con = DriverManager.getConnection("jdbc:odbc:database1"); System.out.println("Connection OK."); con.close(); } catch (Exception e) { System.err.println("Exception: "+e.getMessage()); } } }	4	N	A	2 Conneccction OK.
451	What happens after execution of following code import java.sql.*; import java.io.*; public class new { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Drivers are loaded properly."); String url = "jdbc:odbc:Demo"; Connection c1 = DriverManager.getConnection(url); String sql="create table emp1(emp_id INTEGER,emp_name varchar(20))"; PreparedStatement ps = c1.prepareStatement(sql); ps.executeUpdate(); c1.close(); }catch(SQLException se) { System.out.println("SQL Error."); }catch(Exception e) { System.out.println("Other Error."); } } }	4	N	A	2 Successfully Run and table is created.
452	What happens if the following code is executed? import java.sql.*; public class S1Q57{ public static void main(String[] args) { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con = DriverManager.getConnection("jdbc:odbc:shree"); Statement stm = con.createStatement(); String query ="select rollno,name,percent from student "; ResultSet rs = stm.executeQuery(query); while(rs.next()) { System.out.println("Roll No =" +rs.getInt(1)); System.out.println("Name =" +rs.getString(2)); System.out.println("per =" +rs.getDouble(3)); } con.close(); } }	4	N	A	2 There is a compiler error
453	What happens if you call deleteRow() on a ResultSet object?	4	N	A	2 The row you are positioned on is deleted form the ResultSet and from t
454	What happens if you call the method close() on a ResultSet object?	4	N	U	2 the database and JDBC resources are released
455	What is correct about DDL statements (create, grant,...)?	4	N	A	2 DDL statements are treated as normal SQL statements, and are execut execute() method on a Statement(or a sub interface thereof) object
456	What is error in following program import java.sql.*; class PreparedStatementDemo { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con= DriverManager.getConnection("jdbc:odbc:Samarth"); PreparedStatement ps=con.prepareStatement("select * from student"); ResultSet rs=ps.executeQuery(); ResultSetMetaData rs1=con.getMetaData(); System.out.println(rs1.getColumnCount()); } catch(Exception e) { System.out.println(e); } } }	4	N	A	2 error:incompatible types: "ResultSetMetaData rs1=con.getMetaD
457	What is error in following program? import java.sql.*; class PreparedStatementDemo { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con= DriverManager.getConnection("jdbc:odbc:Samarth"); PreparedStatement ps=con.prepareStatement("select * from student"); ResultSet rs=ps.executeQuery(); while(rs.next()) { System.out.println(rs.getInt(1)); System.out.println(rs.getString(2)); System.out.println(rs.getString(3)); } } catch(Exception e) { System.out.println(e); } } }	4	N	A	2 java.sql.SQLException: No suitable driver found for jdbc.odbc.Samarth
458	What is error in following program? import java.sql.*; class PreparedStatementDemo { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con= DriverManager.getConnection("jdbc:odbc:Samarth"); PreparedStatement ps1=con.prepareStatement("update student set Name=? City=? ID=? where ID=?"); ps1.setString(1,"tttt"); ps1.setString(2,"Belhe"); ps1.setInt(3,777); ps1.setInt(4,777); ps1.executeUpdate(); ps1.close(); con.close(); } catch(Exception e) { System.out.println(e); } } }	4	N	A	2 java.sql.SQLException: [Microsoft] [ODBC Microsoft Access Driver] Syntax error (missing operator) in query expression 'Pa_RaM000 City=Pa_RaM001 ID=Pa_RaI
459	What is error in following program? import java.sql.*; class PreparedStatementDemo { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con= DriverManager.getConnection("jdbc:odbc:Samarth"); PreparedStatement ps1=con.prepareStatement("update student set Name=?,City=?,ID=? where ID=?"); ps1.setString(1,"tttt"); ps1.setString(2,"Belhe"); ps1.setInt(3,777); ps1.executeUpdate(); ps1.close(); con.close(); } catch(Exception e) { System.out.println(e); } } }	4	N	A	2 java.sql.SQLException: [Microsoft][ODBC Microsoft Access Driver]COUNT
	What is error in following program? import java.sql.*; class Demo3 { public static void				

460	<pre>main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcodbcDriver"); Connection con= DriverManager.getConnection("jdbc:odbc:Samarth"); PreparedStatement ps=con.prepareStatement("select * from student"); ResultSet rs=ps.executeQuery(); while(rs.next()) { System.out.println(rs.getInt(1)); System.out.println(rs.getString(2)); System.out.println(rs.getString(3)); } } catch(Exception e) { System.out.println(e); } }</pre>	4	N	A	2	java.lang.ClassNotFoundException: sun.jdbc.odbc.JdbcodbcDriver
461	What is meaning of following code snippet System.out.println("NAME\tAGE"); String sql = "select Name, Age from StudInfo"; ResultSet results = state.executeQuery(sql);	4	N	A	2	executeQuery() method will execute sql query and output is available in ResultSet class
462	<pre>What is missing in the following program? import java.sql.*; public class execute { public static void main(String args[]) { try { String url="jdbc:odbc:abcd"; Connection con=DriverManager.getConnection(url); System.out.println("Connection Established"); String sql="insert into student values(11,'Ramesh')"; Statement st=con.createStatement(); st.executeUpdate(sql); System.out.println("Data Inserted"); con.close(); } catch(SQLException e) { System.out.println("SQL Error Has Occurred"); } catch(Exception e) { System.out.println("Error"); } }}</pre>	4	N	A	2	to register the driver
463	what is Native Protocol, Pure Java Driver?	4	N	A	2	This type of driver, written entirely in Java, communicates directly with the database.
464	<pre>What is output of following code import java.sql.*; import java.io.*; public class StudentTableInsert { public static void main(String args[]) { BufferedReader br = new BufferedReader(new InputStreamReader(System.in)); String Name; int Age; Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Driver Loaded"); String URL = "jdbc:odbc:StudentDatabase"; Connection con = DriverManager.getConnection(URL); System.out.println("Connection to database created."); Statement state = con.createStatement(); System.out.println("Statement Object Created."); } }</pre>	4	N	A	2	Driver Loaded Connection to database created Statement Object created
465	<pre>What is output of following program. import java.sql.*; public class jdbc1 { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:data"); Statement st=con.createStatement(); ResultSet rs=st.executeQuery("select * from student"); while(rs.next()) { System.out.println("id:" +rs.getInt("id")); System.out.println("name:" +rs.getString("name1")); } con.close(); } catch(SQLException e) {} catch(Exception e) {} }}</pre>	4	N	A	2	values of id and name will be displayed from table
466	What is the correct sequence of database connectivity	4	N	A	2	My Computer->Control Panel->Administrative Tool-> Data Source User DSN->Add DSN
467	What is the disadvantage of Type-4 Native-Protocol Driver?	4	N	A	2	At client side, a separate driver is needed for each database.
468	<pre>What is the error in this code import java.sql.*; class ConnectionDemo { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Driver Loaded...."); String url="jdbc:odbc:abc"; Connection con=DriverManager.getConnection(url); System.out.println("Connection Established...."); System.out.println("Object is Created...."); String sql="create table Raison(Name char,Age int)"; boolean res=smt.execute(sql); if(res==true) System.out.println("table is created...."); else System.out.println("Table is not created...."); } catch(SQLException e) { System.out.println("SQL Error..."); } catch(Exception e) { System.out.println("Error is Found..."); } }}</pre>	4	N	A	2	Statement not created
469	what is the main components of JDBC ?	4	N	A	2	all of these
470	<pre>What is the missing in the following program import java.sql.*; public class connection { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Drivers are properly loaded"); String url="jdbc:odbc:abcd"; System.out.println("Connection Established"); con.close(); } catch(SQLException e) { System.out.println("SQL Error Has Occurred"); } catch(Exception e) { System.out.println("Error"); } }}</pre>	4	N	A	2	Connection to database
471	<pre>what is the missing statement in following program to access the database using jdbcodbc connection import java.util.*; import java.sql.*; public class JdbcDemo { public static void main(String args[]) { String query = "SELECT Name,Description,Qty,Cost FROM Stock"; try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con = DriverManager.getConnection ("jdbc:odbc:Inventory"); ResultSet rs = stmt.executeQuery(query); while (rs.next()) { String name = rs.getString("Name"); String desc = rs.getString("Description"); int qty = rs.getInt("Qty"); float cost = rs.getFloat("Cost"); }}</pre>	4	N	A	2	Statement stmt = con.createStatement();

	System.out.println(name+", "+desc+"\t: "+qty+"\t@ \$" +cost); } con.close(); } catch(ClassNotFoundException e){ e.printStackTrace(); } catch(SQLException e){ e.printStackTrace(); } } }					
472	What is the ouput of following code?Assume suitable data import java.sql.*; class contest { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("\n Drivers loaded properly"); String url="jdbc:odbc:abc"; Connection con=DriverManager.getConnection(url); System.out.println("\n Connected"); String sql="create table t1(emphno Integer,emphname varchar(20))"; PreparedStatement ps1=con.PrepareStatement(sql); ps1.executeUpdate(); System.out.println("\n Table created"); con.close(); }catch(SQLException e) System.out.println("\n SQL Error"); } catch(Exception e) { System.out.println("\n Other Error"); } }	4	N	A	2	Table created
473	what is the output of following code import java.sql.*; class StudentData { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con = DriverManager.getConnection("jdbc:odbc:stud"); PreparedStatement ps = con.prepareStatement("select * from Student where Marks > ?"); ps.setInt(1,40); ResultSet rs = ps.executeQuery(); System.out.println("marks"); while(rs.next()) System.out.println(rs.getString(2)); con.close(); } catch(Exception e){ } } }	4	N	A	2	marks>40
474	what is the output of following code import java.sql.*; class cont { public static void main(String args[]){ try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Drivers are properly loaded"); String url="jdbc:odbc:abc"; Connection con=DriverManager.getConnection(url); System.out.println("Connection to database created"); con.close(); } catch(SQLExcpion e) { System.out.println("SQL Error "); } catch(Exception e) { System.out.println("error"); } } }	4	N	A	2	both b and c
475	what is the output of following code Try{ String sql="update emp set salary=? Where id=?"; PreparedStatement pstmt=con.prepareStatement(sql) ; } Catch(SQL Exception e) { }	4	N	A	2	update emp by accepting salary and id as a parameter
476	What is the output of following Program import java.sql.*; public class jdbcConn { public static void main(String[] args) throws Exception{ Class.forName("org.apache.derby.jdbc.ClientDriver"); Connection con = DriverManager.getConnection("jdbc:derby://localhost:1527/testDb","name","pass"); Statement stmt = con.createStatement(); String query = "insert into emp values(2,'name1','job')"; String query1 = "insert into emp values(5,'name2','job')"; String query2 = "select * from emp"; ResultSet rs = stmt.executeQuery(query2); int no_of_rows = 0; while (rs.next()) { no_of_rows++; } System.out.println("No. of rows before commit statement = "+ no_of_rows); con.setAutoCommit(false); stmt.execute(query1); stmt.execute(query); con.commit(); rs = stmt.executeQuery(query2); no_of_rows = 0; while (rs.next()) { no_of_rows++; } System.out.println("No. of rows after commit statement = "+ no_of_rows); } }	4	N	A	2	No. of rows before commit statement = 1 No. of rows after commit stat
477	What is the output of following program: import java.sql.*; class exp10_5 { public static void main(String m[])throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:dsnname"); Statement cmd=con.createStatement(); rs=cmd.executeQuery("select * from tabel1"); while(rs.next()) { System.out.println(rs.getInt(1)+" "+rs.getInt(2)+" "+rs.getString(3)); } cmd.close(); con.close(); } }	4	N	A	2	Compile Error
478	What is the purpose of following code? import java.sql.*; class DeleteRecord { public static void main(String args[])throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:xyz"); Statement stmt=con.createStatement(); int result=stmt.executeUpdate("delete from emp"); con.close(); } }	4	N	A	2	Deletes all the record from emp
479	What is the purpose of next() method?	4	N	U	2	next ( ) method is used to retain next elements in a series.
480	What is the query used to display all tables names in SQL Server (Query analyzer)?	4	N	A	2	select * from information_schema.tables
481	What is the return value from stmt.executeQuery("insert into T values (100, 'Smith')")	4	N	A	2	Result Set object
482	What is the return value from stmt.executeUpdate("insert into T values (100, 'Smith')")	4	N	A	2	an int value indicating how many rows are effected from the invocation
483	what is the syntax of close() method in conection interface method	4	N	A	2	public void close() throws SQLException

484	What is the type of 'cmd' object in the following program. import java.sql.*; class exp11_4 { public static void main(String arg[]) { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:dsnname"); String str="select * from emp where ename='ram'; cmd=con._____ (str); ResultSet rs=cmd.executeQuery(); while(rs.next()) { System.out.println(rs.getString(1)+" "+rs.getString(2)); } cmd1.close(); con.close(); } }	4	N	A	2	PreparedStatement
485	What is the use of Statement interface?	4	N	U	2	Statement interface provides methods to execute queries with database
486	What is, in terms of JDBC, a DataSource?	4	N	U	2	A DataSource is a factory of connections to a physical data source
487	what may be the output of following program import java.sql.*; class exp10_1 { public static void main(String m[])throws Exception {Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:dsnname"); Statement cmd=con.createStatement(); ResultSets=cmd.executeQuery("select * from tabel1"); while(rs.next()) { System.out.println(rs.getInt(1)+" "+rs.getInt(2)+" "+rs.getString(3)); } cmd.close(); con.close(); } }	4	N	A	2	1 123 Mahesh 2 453 Suresh
488	What MySQL property is used to create a surrogate key in MySQL?	4	N	U	2	AUTO_INCREMENT
489	What should be at the place of _____ to get the correct output: import java.sql.*; public class Updatedbase { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:data"); Statement st=con._____ ; ResultSet rs=st.executeQuery("select * from emp"); System.out.println("before change"); while(rs.next()) { System.out.println("id:"+rs.getInt("id")); System.out.println("salary:"+rs.getString("salary")); System.out.println("name:"+rs.getString("name1")); } int k=st.executeUpdate("Update emp set salary=1000 where id=3"); System.out.println("rows affected:"+k); System.out.println("\n\nafter change"); rs=st.executeQuery("select * from emp"); while(rs.next()) { System.out.println("id:"+rs.getInt("id")); System.out.println("salary:"+rs.getString("salary")); System.out.println("name1:"+rs.getString("name1")); } con.close(); } catch(SQLException e) {} catch(Exception e) {} } }	4	N	A	2	createStatement()
490	What should be the correction done in the following program to get correct output? import java.sql.*; import java.io.*; class InsertDemo { public static void main(String args[]) { int c=0; try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); String myURL="jdbc:odbc:college"; Connection con=DriverManager.getConnection(myURL); Statement st=con.createStatement(); c=st.executeUpdate("insert into emp values(1,4000)") if(c!=0) System.out.println("Record inserted"); else System.out.println("Record NOT inserted"); con.close(); }catch(Exception e){} } }	4	N	A	2	missing semicolon
491	What should be the correction done in the following program to get correct output? import java.Sql.*; import java.io.*; class InsertDemo { public static void main(String args[]) { int c=0; try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); String myURL="jdbc:odbc:college"; Connection con=DriverManager.getConnection(myURL); Statement st=con.createStatement(); c=st.executeUpdate("insert into emp values(1,4000)"); if(c!=0) System.out.println("Record inserted"); else System.out.println("Record NOT inserted"); con.close(); }catch(Exception e){} } }	4	N	A	2	import java.SQL.*;
492	What should be the correction done in the program to get correct output? class Ddemo1 { public static void main(String args[]) throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection c=DriverManager.getConnection("jdbc:odbc:ODSN", " ", " "); Statement s=c.createStatement(); ResultSet rs=s.executeQuery("select *from StudTable"); System.out.println("Name" + " \t " + "Roll_No" + " \t " + "Avg"); while(rs.next()) 26 { System.out.println(rs.getString(1)+" \t " "+rs.getInt(2)+" \t \\"+rs.getDouble(3)); } s.close(); c.close(); } }	4	N	A	2	Missing package statement.
	What should be the correction done in the program to get correct output? import java.sql.*; class Ddemo1 { public static void main(String args[]) throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection					

	493	c=DriverManager.getConnection("jdbc:odbc:ODSN"," "); Statement s=c.createStatement(); ResultSet rs=s.executeQuery("select *from StudTable"); System.out.println("Name" + "\t" + "Roll_No" + "\t" + "Avg"); while(rs.next()) { System.out.println(rs.getString(1)+"\t" +"+rs.getInt(2)+"\t" +rs.getDouble(3)); s.close(); c.close(); } }	4	N	A	2	Missing }

	495	What statement should be modified to get the output as shown in fig. import java.sql.*; class stud1 { public static void main(String ar[])throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:studdsn"); Statement s1=con.createStatement(); ResultSet res; System.out.println("Before insertion"); res=s1.executeQuery("select * from student"); while(res.next()) { System.out.println("Name"+res.getInt(1)+" Roll_NO"+res.getInt(2)+" per"+res.getInt(3)); } Statement st=con.createStatement(); st.executeUpdate("insert into student values('Joshi',10,75)"); System.out.println("inserted"); System.out.println("After insertion"); res=s1.executeQuery("select * from student"); while(res.next()) { System.out.println("Name"+res.getString(1)+" Roll_NO"+res.getInt(2)+" per"+res.getInt(3)); } } } Figure:- 	4	Y1	A	2	System.out.println("Name "+res.getInt(1)+" "+res.getInt(2)+" "+res.getInt(3)); should be System.out.println("Name "+res.getString(1)+" "+res.getInt(2)+" "+res.getInt(3));
	496	What the following statement returns? SQLWarning warning = statement.getWarnings(); System.out.println("Message: " + warning.getMessage());	4	N	U	2	Description about SQL warning
	497	What will be display in output using the following code. import java.sql.*; class Test { public static void main(String[] args) { try{ Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con = DriverManager.getConnection("jdbc:odbc:naresh"); System.out.println("connection established"); con.close(); } catch(Exception e){ } } }	4	N	A	2	connection established
	498	what will be output of given code //Load the database Driver Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); //Establish connection with the database Connection Con=DriverManager.getConnection("jdbc:odbc:Stud1") //Create the statement object Statement stmt=con.createStatement(); //Formulate the query String sql="delete from StudTable where Name='Abc'; //Execute the query i=stmt.executeUpdate(sql); System.out.println("Record deleted...."+i); con.close();	4	N	A	2	record will be deleted
	499	What will be output of this program import java.sql.*; public class JDBCExample { public static void main(String[] args) throws Exception { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Connecting to database..."); conn = DriverManager.getConnection(jdbc:odbc:stud"); stmt = conn.createStatement(); String sql = "CREATE TABLE REGISTRATION " + "(id INTEGER not NULL, " + " first VARCHAR(255),"+"last VARCHAR(255),"+" age INTEGER, " + " PRIMARY KEY ( id ))"; stmt.executeUpdate(sql); }}	4	N	A	2	It will create a table with name registration
		What will be the out of the following code? import java.awt.*; import java.io.*; public class					

500	Demo { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Driver Loaded"); Connection con=DriverManager.getConnection("jdbc:odbc:mybd1"); System.out.println("Connection Establish"); con.close(); System.out.println("Connection close"); } catch(Exception e) { System.out.println("Error"); } } }	4	N	U	2	Error
501	What will be the output for following code? import java.sql.*; class SelectD { public static void main(String a[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Driver Loaded"); String url="jdbc:odbc:if"; Connection con=DriverManager.getConnection(url); System.out.println(" Connection to DataBase created"); Statement stmt =con.createStatement(); String query ="select * from student where stud_marks>70"; ResultSet rs =stmt.executeQuery(query); while(rs.next()) { System.out.println(" Roll number : "+rs.getInt(1)); System.out.println(" Student name : "+rs.getString(2)); System.out.println(" Percentage : "+rs.getInt(3)); System.out.println(); } } catch(ClassNotFoundException e) { e.printStackTrace(); } catch(SQLException e) { e.printStackTrace(); } } }	4	N	A	2	Display student' roll number, student name and percentage those having greater than 70.
502	What will be the Output of following code? import java.sql.*; public class SmtInterfaceDemo { public static void main(String args[]) { try{ Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:db"); System.out.println("Connection established....."); Statement smt=con.createStatement(); System.out.println("Statement Created....."); String sql="create table t2(Name char,Age int)"; boolean result=smt.execute(sql); if(result==true) { System.out.println("Table Created....."); } else { System.out.println("Table not Created....."); } con.close(); } catch(ClassNotFoundException e) { e.printStackTrace(); } catch(SQLException se) { se.printStackTrace(); } } }	4	N	U	2	Table is created with two data field in database
503	What will be the output of following code? import java.sql.*; public class JdbcGetConnection { public static void main(String args[]) { Connection con = null; Statement st = null; ResultSet rs = null; try { Class.forName("com.mysql.jdbc.Driver"); con = DriverManager.getConnection("jdbc:mysql://localhost:3306/komal", "root", "root"); System.out.println("Connection is closed : " + con.isClosed()); con.close(); System.out.println("Connection is closed : " + con.isClosed()); } catch (Exception e) { System.out.println(e); } } }	4	N	A	2	Connection is closed : false Connection is closed : true
504	What will be the output of following program? import java.sql.*; class DBTest { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Driver Loaded"); String url="jdbc:odbc:xyz"; Connection con=DriverManager.getConnection(url); System.out.println("Connection to database is created"); Statement st=con.createStatement(); System.out.println("Statement Object is created"); } catch(SQLException e) { System.out.println("SQL Error"); } catch(Exception e) { System.out.println("Error"); } } }	4	N	A	2	Driver Loaded Connection to database created Statement Object is created
505	What will be the output of following program? import java.sql.*; class conn1 { public static void main(String h[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Driver are properly loaded"); String url="jdbc:odbc:xyz"; Connection con=DriverManager.getConnection(url); System.out.println("connection established"); Statement state=con.createStatement(); String sql="create table stu14(Name char,Age int)"; boolean res=state.execute(sql); if(res==0) System.out.println("table not created"); else System.out.println("table created"); } catch(SQLException e) { System.out.println("Sql error has occurred"); } } } }	4	N	A	2	Driver are properly loaded connection established and table created
506	WHAT WILL BE THE OUTPUT OF THE BELOW PROGRAM: import java.sql.*; class ConnectionTest { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Driver loaded"); String url="jdbc:odbc:xyz"; Connection con = DriverManager.getConnection(url); System.out.println("connection to database created"); } catch(SQLException e) { System.out.println("SQL error"); } catch(Exception e) { System.out.println("error"); } } }	4	N	A	2	BOTH Option i and Option ii
507	What will be the result of executing the following code snippet? Statement sql2 = con.createStatement(); int result=sql2.executeUpdate("Select * From Publishers");	4	N	A	2	Will result in compilation error
508	What will happen if resultSet() is not present in JDBC?	4	N	A	2	None of the above

509	What will happen if we does not use the close() method?	4	N	A	2	Connection will does not close
510	What will the following statement display? select Student.* from Student, Course, Enrollment where Student.ssn = Enrollment.ssn and Enrollment.courseId and Course.title = 'Java Programming' and Student.lastName like 'S%';	4	N	A	2	The statement displays all students taking the Java Programming cours starting with S.
511	When a connection is created, by default it is in _____	4	N	U	2	auto commit mode
512	When the message "No suitable drivers found" is displayed?	4	N	U	2	if JDBC database URL passed is not constructed properly.
513	When using ODBC, which of the following processes ODBC requests and submits specific SQL statements to a given type of data source?	4	N	A	2	Driver.
514	Where is Metadata stored in MYSQL?	4	N	U	2	In MYSQL database Mysql
515	Where to write query to delete records in the following program import java.sql.*; public class DeleteRecords { public static void main(String args[]) { String s1; int cnt=0; try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Drivers are properly loaded"); String url="jdbc:odbc:abcd"; Connection con=DriverManager.getConnection(url); System.out.println("Connection Established"); Statement st=con.createStatement(); st.executeUpdate(); con.close(); } catch(SQLException e) { System.out.println("SQL Error Has Occured"); } catch(Exception e) { System.out.println("Erroe"); } } }	4	N	A	2	As a parameter to ExecuteUpdate Query
516	Which are the statements related to retrieving table names from a database?	4	N	A	2	... Connection con = .... ; DatabaseMetaData dbmd = con.getMetaData(); null; String schema = null; String table = "sys%"; String[] types = null; dbmd.getTables(catalog , schema , table , types ); ...
517	Which class has traditionally been the backbone of the JDBC architecure ?	4	N	U	2	A.the JDBC driver manager
518	Which interface allows storing results of query.F39	4	N	U	2	Resultset
519	which are Exception generated following code import java.sql.*; class Test { public static void main(String[] args) { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); String url="jdbc:odbc:xyz"; Connection con = DriverManager.getConnection(url); Statement s = con.createStatement(); s.execute("create table TEST12345 ( firstcolumn integer "); s.execute("insert into TEST12345 values(1)"); s.execute("select firstcolumn from TEST12345"); ResultSet rs = s.getResultSet(); if (rs != null) while ( rs.next() ) { System.out.println("Data from column_name: " + rs.getString(1) ); } s.close(); con.close(); } }	4	N	A	2	ClassNotFoundException, SQLException
520	Which are methods belongs to DataBaseMetaData?	4	N	U	2	getUserName(),isReadonly()
521	which are the methods are used for Connection interface	4	N	U	2	All of the above
522	Which class not comes under java.sql package	4	N	A	2	Class
523	Which class will use to create the ps object in the given code? import java.sql.*; public class create { public static void main(String a[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Driver Loaded"); String url="jdbc:odbc:mydsn"; Connection con=DriverManager.getConnection(url); System.out.println(" Connection to DataBase created"); Statement stmt=con.createStatement(); String query = "create table employee1(emp_id int,emp_name char"; _____ ps = con.prepareStatement(query); ps.executeUpdate() System.out.println("table created"); ps.close(); con.close(); } catch(SQLException e) { e.printStackTrace(); } catch(Exception e) { e.printStackTrace(); } } }	4	N	A	2	PreparedStatement
524	Which code is correct to generate the given output? Figure:-	4	Y1	A	2	a) PreparedStatement p=c.prepareStatement("Select * from Emp Name='Ram');

525	Which code segment could execute the stored procedure "countRecs()" located in a database server?	4	N	U	2
526	Which driver is called as thin-driver in JDBC	4	N	A	2
527	Which driver is efficient and always preferable to use in JDBC applications?	4	N	U	2
528	Which interface provides methods to execute queries with the database?	4	N	U	2
529	which interfaces provide methods for batch processing in JDBC	4	N	U	2
530	Which is a correct component of JDBC API	4	N	U	2
531	Which is not a Navigation method of ResultSet interface	4	N	U	2
532	which is the correct description of the close() method	4	N	A	2
533	Which is the correct method for updating table rows from given option. import java.sql.*; public class Updatedbase { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:data"); Statement st=con.createStatement(); ResultSet rs=st.executeQuery("select * from emp"); St.*****("Update emp set name1='jack' where id=2"); System.out.println("\n\nafter change"); rs=st.executeQuery("select * from emp"); while(rs.next()) { System.out.println("id:"+rs.getInt("id")); System.out.println("salary:"+rs.getString("salary")); } con.close(); } catch(SQLException e){} catch(Exception e) {} } }	4	N	A	2
534	Which is the correct option form the following for JDBC driver types?	4	N	U	2
535	Which JDBC driver maps the JDBC calls to the native method calls, which are passed to the local native Call Level Interface (CLI)?	4	N	U	2
536	Which JDBC driver Type(s) can be used in either applet or servlet code?	4	N	A	2
537	Which JDBC driver Type(s) can you use in a three-tier architecture and if the Web server and the DBMS are running on the same machine?	4	N	A	2
538	Which JDBC driver Type(s) is (are) the JDBC-ODBC bridge?	4	N	U	2
539	Which JDBC driver Types are for use over communications networks?	4	N	A	2
540	Which kind of driver converts JDBC calls into calls on the client API for Oracle, Sybase, Informix, IBM DB2, or other DBMS?	4	N	U	2
541	Which list gives a quick way to determine which Connection method is appropriate for creating different types of SQL statements?	4	N	U	2
542	Which maintains a cursor pointing to a particular row of data,Initially, cursor points to before the first row?	4	N	U	2
543	Which method executes an sql statement that may return multiple results.	4	N	U	2
544	Which method is incorrect to execute sql query	4	N	U	2

	Which method is missing of statement Interface to create table? import java.sql.*; public class createtable { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Drivers are properly loaded"); String url="jdbc:odbc:abcd"; Connection con=DriverManager.getConnection(url); System.out.println("Connection Established"); String sql="create table employee(emp_id int,emp_name char)"; PreparedStatement ps=con.prepareStatement(sql); System.out.println("table created"); ps.close(); con.close(); } catch(SQLException e) { System.out.println("SQL Error Has Occured"); } catch(Exception e) { System.out.println("Erroe"); } } }	4	N	A	2	execute()
546	Which method returns the current result in multiple result statements?	4	N	A	2	getUpdateCount()
547	Which minimum package statements are missing? class conn { conn() { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:samarth"); PreparedStatement ps=con.prepareStatement("Select * from Book"); ResultSet rs=ps.executeQuery(); while(rs.next()) { System.out.println("ID="+rs.getInt(1)); System.out.println("Name="+rs.getString(2)); System.out.println("Author="+rs.getString(3)); } } catch(Exception e) { System.out.println(e); } } public static void main(String args[]) { new conn(); } }	4	N	U	2	java.sql.*;
548	Which object provides DatabaseMetaData object?	4	N	U	2	Connection
549	Which object provides ResultSetMetaData object?	4	N	U	2	ResultSet
550	Which object provides you with methods to access data from the table?	4	N	U	2	ResultSet
551	Which of the following statement is a prepared statements ?	4	N	A	2	Insert into department values(?, ?, ?)
552	Which of the following are the methods of statement interface?	4	N	A	2	Both A & B
553	Which of the following describes the correct sequence of the steps involved in making a connection with a database. 1. Loading the driver 2. Process the results. 3. Making the connection with the database. 4. Executing the SQL statements.	4	N	A	2	1,3,4,2
554	Which of the following describes the correct url String format of getConnection() method.	4	N	U	2	protocol, subprotocol, datasource name
555	Which of the following invokes stored procedures in sql?	4	N	U	2	callable statements
556	Which of the following is correct sequence of steps regarding to establish the connection with database. 1. Creating connection 2. Closing connection 3. Executing queries 4. Creating statement	4	N	U	2	1,4,3,2
557	which of the following is not true for Statement and PreparedStatement?	4	N	U	2	None of above
558	Which of the following is the correct syntax of executeQuery() method?	4	N	U	2	ResultSet executeQuery(String str)
559	Which of the following is true	4	N	A	2	The two tiers are often called as Application layer includes JDBC drivers user interfaces whereas second layer.
560	Which of the following is used to access the database server at time of executing the program and get the data from the server accordingly ?	4	N	U	2	Dynamic SQL
561	Which of the following method is supported by Statement interface?	4	N	U	2	All of the mentioned
562	Which of the following method is used to open the connection with the database	4	N	U	2	Connection con = DriverManager.getConnection ("jdbc:odbc:somedb",
563	Which of the following piece of code shows how to retrieve the value of the Row Id for a particular Row ?	4	N	U	2	String selectQuery = "select rowid from Employees where id = 12"; resultSet = statement.executeQuery(selectQuery); resultSet.getRowId();
564	Which of the following query is correct to fetch all thye records from database. Import java. Sql.*; class MySqlCon{ public static void main (String args[]){ try { Class.forName ("com.mysql.jdbc.Driver"); Connection con = DriverManager.getConnection ("jdbc:mysql://localhost:3306/abc","root","root"); Statement stmt = stmt = con.createStatement(); ResultSet rs =	4	N	A	2	C. Stmt.executeQuery("select* from emp"); while (

	rs.next()) System.out.printIn(rs.getInt(1)+ " " + rs.getString(2) + "" + rs.getString(3)); con.close(); } catch (Exception e) { System.out.println(e);} }}				
565	Which of the following query is used for SELECT query?	4	N	U	2 executeQuery(String sql)
566	Which of the following statement is false as far as different type of statements is concern in JDBC.	4	N	U	2 D)Interim Statement
567	Which of the following statement is false as Type 4 driver is concern:	4	N	U	2 Type 4 drivers can not be used with NetScape.
568	which of the following statement is true in case security consideration for JDBC. A)normal unsigned applets are generally untrustworthy. B) Downloaded driver should be used for connection purpose only. C)No automatic or implicit use of local credentials while connecting to remote database servers. D)Untrusted applets should not be permitted to access to local database data.	4	N	A	2 all of the above
569	which of the following statement is used to scroll database forward and backward	4	N	A	2 Statement si=con.createStatement(resultSet.TYPE_SCROLL_SENSITIVE
570	Which of the following statement should be inserted to display contents of last record and where that statement should be inserted 1.import java.sql.*; 2.public class JDBCExample { 3. public static void main(String[] args) { 4. Connection conn = null; 5. Statement stmt = null; 6. Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); 7. System.out.println("Connecting to database..."); 8. conn = DriverManager.getConnection("jdbc:odbc:stud"); 9. System.out.println("Creating table in given database..."); 10. System.out.println("Creating statement..."); 11. stmt = conn.createStatement(resultSet.TYPE_SCROLL_INSENSITIVE,resultSet.CONCUR_READ_ONLY); 12. String sql = "SELECT id, age FROM Registration"; 13. ResultSet rs = stmt.executeQuery(sql); 14. int id = rs.getInt("id"); 15. int age = rs.getInt("age"); 16. System.out.print("ID: " + id); 17. System.out.print(", Age: " + age); } 18. rs.close(); 19. System.out.println("Goodbye!");}}	4	N	A	2 After line no 13 rs.last()
571	Which of the following statements are true about Two tier client server model. a)it is simple in design b)client side scripting uploads work onto the client. c) It is scalebale.	4	N	U	2 a and b
572	Which of the following statements are true?	4	N	U	2 A AND C
573	Which of the following statements is a true statement concerning the open database connectivity standard (ODBC)?	4	N	U	2 All of the above.
574	Which of the following statements is true concerning JDBC?	4	N	U	2 It is similar concept to ODBC.
575	Which of the follwing method is used for sending SQL statements	4	N	U	2 Statement
576	Which of the missing code need to be inserted in a given code to delete second row in ResultSet. import java.sql.*; import java.sql.ResultSet.*; class delset {public static void main(String args[]) {try {Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con =DriverManager.getConnection("jdbc:odbc:stud"); Statement s = con.createStatement(resultSet.TYPE_SCROLL_SENSITIVE,resultSet.CONCUR_UPDATABLE); ResultSet rs=s.executeQuery("select * from stud"); while(rs.next()) System.out.println(rs.getInt(1)+" "+rs.getString(2)+" "+rs.getInt(3)); System.out.println("After deleting row:"); rs.first(); System.out.println(rs.getInt(1)+" "+rs.getString(2)+" "+rs.getInt(3)); while(rs.next()) {System.out.println(rs.getInt(1)+" "+rs.getString(2)+" "+rs.getInt(3)); } con.close(); } catch(Exception e){ } } }}	4	N	A	2 rs.absolute(2); rs.deleteRow();
577	Which ONE of the following is missing statement in the program below? import java.sql.*; class ExecuteQueryTest { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Driver loaded"); String url="jdbc:odbc:aditya"; Connection con = DriverManager.getConnection(url); System.out.println("connection to database created"); Statement st = con.createStatement(); System.out.println("Statement object created"); String sql="select Name,Age from tanni"; ResultSet results = state.executeQuery(sql); String text=" "; while() { text +=results.getString(1)+" "+results .getInt (2)+" \n' ; } System.out.println(text); catch(SQLException e) { System.out.println("SQL error"); } catch(Exception e) { System.out.println("error"); } } }}	4	N	A	2 results.next()

578	Which one of the following methods is used to execute INSERT, UPDATE, and DELETE statements in a Java application?	4	N	U	2	executeUpdate()
579	Which statement create an error import java.sql.*; class data { public static void main(String a[]) throws Exception { Driver d= new Driver(); DriverManager.registerDriver(d); Connection con =DriverManager.getConnection("Jdbc:Odbc:XXX"); Statement s=con.createStatement(); } }	4	N	A	2	while creating Driver object
580	Which statement is correct after firing delete statement of SQL? import java.sql.*; class DeleteD { public static void main(String a[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Driver Loaded"); String url="jdbc:odbc:if"; Connection con=DriverManager.getConnection(url); System.out.println("Connection to DataBase created"); Statement stmt = con.createStatement(); String querySel = "Select * from student"; ResultSet rs = stmt.executeQuery(querySel); System.out.println("Before Delete"); while(rs.next()) { System.out.println(" Roll number : "+ rs.getInt(1)); System.out.println(" Student Name : "+ rs.getString(2)); System.out.println(" Student Marks : "+ rs.getInt(3)); System.out.println(); } String querydel = "delete from student where stud_name='Sanjay';" ; rs = stmt.executeQuery(querySel); System.out.println("After Delete"); while(rs.next()) { System.out.println(" Roll no : "+ rs.getInt(1)); System.out.println(" Student Name : "+ rs.getString(2)); System.out.println(" Student marks : "+ rs.getInt(3)); System.out.println(); } } catch(SQLException e) { e.printStackTrace(); } catch(Exception e) { e.printStackTrace(); } } } }	4	N	A	2	stmt.executeUpdate(querydel);
581	Which statement is correct in case of Type 1 JDBC driver a) Type I driver is slow driver. b) Type I Driver is not portable ,because it is a database indepedent but platform depedent. c) Type Driver is not suitable for real time application	4	N	U	2	all of above
582	Which Statement is given the error in the following code import java.sql.*; class data1 { public static void main(String a[]) { try { Driver d= new sun.jdbc.odbc.JdbcOdbcDriver(); DriverManager.registerDriver(d); Connection con =DriverManager.getConnection("Jdbc:Odbc:xxx"); Statement s=con.createStatement(); s.executeUpdate("Insert into Table1 values('hhh',12)"); if(n==1) { System.out.println("Record inserted "); con.close(); } } catch(Exception e) { System.out.println("not Inserted"+e); } } }	4	N	A	2	Sql Query Statement and variable 'if' statement
583	Which statement is static and synchronized in JDBC API?	4	N	U	2	getConnection()
584	Which Statement is used to execute Dynamic Query	4	N	U	2	PreparedStatement
585	Which statement required for getting proper output import java.sql.*; public class updatevalues1 { public static void main(String args[]) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:db"); String sql="update StudTable set Name=? where Rollno=2"; String Name="Ram"; PreparedStatement ps=con.prepareStatement(sql); ps.setString(1,Name); ----- ; System.out.println("Record Updated....."); con.close(); } catch(ClassNotFoundException e) { e.printStackTrace(); } catch(SQLException se) { se.printStackTrace(); } } }	4	N	A	2	ps.executeUpdate()
586	Which statement should be correct for displaying the correct out put? import javax.swing.*; import java.io.*; class dataM { public static void main(String a[]) { String type[]={"TABLE","View"}; try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con =DriverManager.getConnection("Jdbc:Odbc:xxx"); Statement s=con.createStatement(); DatabaseMetaData md=rs.getMetaData(); System.out.println("Database is:"+md.getDatabaseProductName() ); System.out.println("SQL Keywords is:"+md.getSQLKeywords()); ResultSet rs=md.getTables(null,null,null,types); While(rs.next()) { String to=rs.getString(2); String tn=rs.getString(3); String tt=rs.getString(4); System.out.println(to+" "+tn+" "+tt+" "); } con.close(); } catch() { System.out.println(e); } } }	4	N	A	2	Import Package and catch() Statement
587	Which statements about JDBC are true?	4	N	A	2	JDBC stands for Java DataBase Connectivity
588	Which statements are needed to establish connection to database?	4	N	A	2	Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection c=DriverManager.getConnection("jdbc:odbc:ODSN",&quot; i &quot;);

	Which statements are required in following program to insert one record in table import java.sql.*; public class JDBCExample { public static void main(String[] args) { Connection conn = null; Statement stmt = null; Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); System.out.println("Connecting to database..."); conn = DriverManager.getConnection("jdbc:odbc:stud"); System.out.println("Inserting records into the table..."); stmt = conn.createStatement();  System.out.println("Inserted records into the table..."); System.out.println("Goodbye!"); }}	4	N	A	2	String sql = "INSERT INTO Registration VALUES (1018)"; stmt.executeUpdate(sql);
589	Which statements are used to display the contents of table? import java.sql.*; public class jdbcResultSet { public static void main(String[] args) { try { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); } catch(ClassNotFoundException e) { System.out.println("Class not found "+e); } try { Connection con = DriverManager.getConnection ("jdbc:derby://localhost:1527/testDb","username", "password"); Statement stmt = con.createStatement(); ResultSet rs = stmt.executeQuery ("SELECT * FROM employee"); System.out.println("id name job"); while(rs.next()) { int id = rs.getInt("id"); String name = rs.getString("name"); String job = rs.getString("job"); System.out.println(id+" "+name+" "+job); } } catch(SQLException e){ System.out.println("SQL exception occurred" + e); } } }	4	N	A	2	getString,int methods
590	Which statements are wrong in bellow program import java.sql.*; class stud5 { public static void main(String ar[])throws Exception { Class.forName("jdbc:odbc:studdsn"); Connection con=DriverManager.getConnection("sun.jdbc.odbc.JdbcOdbcDriver"); Statement s1=con.createStatement(); ResultSet res; System.out.println("Before insertion"); res=s1.executeQuery("select * from student"); while(res.next()) { System.out.println("Name\t"+res.getString(1)+" Roll_NO\t"+res.getInt(2)+" per\t"+res.getInt(3)); } PreparedStatement st=con.prepareStatement("insert into student values(?, ?, ?)"); st.setString(1,"Sayali"); st.setInt(2,45); st.setInt(3,70); st.executeUpdate(); st.setString(1,"Katta"); st.setInt(2,43); st.setInt(3,70); st.executeUpdate(); System.out.println("After insertion"); res=s1.executeQuery("select * from student"); while(res.next()) { System.out.println("Name\t"+res.getString(1)+" Roll_NO\t"+res.getInt(2)+" per\t"+res.getInt(3)); } } }	4	N	A	2	Class.forName("jdbc:odbc:studdsn"); Connection con=DriverManager.getConnection("sun.jdbc.odbc.JdbcOdbcDriver");
591	Which type of driver converts JDBC calls into the network protocol used by the database management system directly?	4	N	U	2	Type 4 driver
592	Which type of Statement can execute parameterized queries?	4	N	U	2	PreparedStatement
593	while(rs.next()) { String n=rs.getString("name"); System.out.println("name:"+n); String n1=rs.getString("rollnumber"); System.out.println("rollnumber:"+n1); } What does the above code do?	4	N	A	2	D. none of the above
594	Write a java code to access id, age, first from table given below Employees :   id   first   last   age	4	N	A	2	A. sql = "SELECT id, age, first FROM Employees"; ResultSet rs=stmt.executeQuery(sql); while (rs.next()) { int id = rs.getInt("id"); int age = rs.getInt("age"); String first= rs.getString("first"); }
595	Write the missing statement? import java.sql.*; class Rsm{ public static void main(String args[]){ try{ Class.forName("oracle.jdbc.driver.OracleDriver"); Connection con=DriverManager.getConnection( "jdbc:oracle:thin:@localhost:1521:xe","system","oracle"); PreparedStatement ps=con.prepareStatement("select * from emp"); ResultSet rs=ps.executeQuery(); ----- System.out.println("Total columns: "+rsmd.getColumnCount()); System.out.println("Column Name of 1st column: "+rsmd.getColumnName(1)); System.out.println("Column Type Name of 1st column: "+rsmd.getColumnTypeName(1)); con.close(); }catch(Exception e){ System.out.println(e); } } }	4	N	A	2	ResultSetMetaData rsmd=rs.getMetaData();
596	Write the missing statements? import java.sql.*; class InsertPrepared{ public static void main(String args[]){ try{ Class.forName("oracle.jdbc.driver.OracleDriver"); Connection con=DriverManager.getConnection("jdbc:oracle:thin:@localhost:1521:xe","system","oracle"); PreparedStatement stmt=con.prepareStatement("insert into Emp values(?,?)"); stmt.setInt(1,101); stmt.setString(2,"Ratan"); int i=stmt.executeUpdate(); } catch(Exception e){ System.out.println(e); } } }	4	N	A	2	con.close();
597						

	System.out.println(i+" records inserted"); ----- }catch(Exception e){ System.out.println(e);} } }					
598	Write which method is used for following program execution in blank space: import java.sql.*; class exp11_1 { public static void main(String arg[]) { Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection con=DriverManager.getConnection("jdbc:odbc:dsname"); PreparedStatement cmd=con.prepareStatement("select * from emp"); ResultSet rs= cmd._____(); while(rs.next()) { System.out.println(rs.getInt(1)+" "+ rs.getString(2)+rs.getString(3)+" "+rs.getInt(4)); } cmd.close(); con.close(); } }	4	N	A	2	executeQuery()
599	_____ type of driver is very flexible and need not code installation on the client machine	4	N	U	2	Type 3-JDBC-Net Pure java
600	_____ moves the cursor to the specified row	4	N	A	2	public boolean absolute(int row)
601	_____ is an open source DBMS product that runs on UNIX, Linux and Windows.	4	N	U	2	MySQL
602	_____ is the key to _____ with respect to RDBMS?	4	N	U	2	Serialization,persistence
603	_____ Calls get converted into native c or c++ API calls	4	N	A	2	JDBC API
604	_____ interface allows strong results of query?	4	N	R	2	ResultSet
605	_____ method of Connection interface is used to create the Statement object.	4	N	U	2	createStatement()
606	_____ method of DriverManager is used to establish connection with the database.	4	N	U	2	getConnection()
607	_____ Returns the current row number, with the first row starting at 1	4	N	U	2	getRow()
608	_____ Returns a ResultSetMetaData object describing the ResultSet.	4	N	U	2	getMetaData
609	..... can not directly communicate with database to submit data & retrieve the result.	4	N	U	2	JDBC
610	Which of the following statements loads the JDBC-ODBC driver?	4	N	U	2	Class.forName("sun.jdbc.odbc.JdbcOdbcDriver")

My Home Log Out

e-Exam Manage Questions for Advanced Java Programming (17625) for topic 5 [Go Back to Subjects](#)

Q No	Question	To pic	Fig ure	Q Type	Mar ks	Answer	Ed
1	In which method of the servlet, connection is created?	5	N	R	1	init()	Ed
2	..... is the first phase of the servlet life cycle.	5	N	R	1	Initialization	Ed
3	4. Name the class that includes the getSession() method	5	N	R	1	HttpSession	Ed
4	A cookie contains _____	5	N	R	1	State information of user like name, address	Ed
5	A cookie is stored on _____ and contains state information.	5	N	R	1	client	Ed
6	A Deployment descriptor describes_____	5	N	R	1	web component settings	Ed
7	A JSP is transformed into a	5	N	R	1	Java servlet	Ed
8	A JSP is translated to _____	5	N	R	1	Servlet	Ed
9	A JSP page consists of which tags?	5	N	R	1	Both A & B	Ed
10	A JSP page uses the java.util.ArrayList class many times. Instead of referring the class by its complete package name each time, we want to just use ArrayList. Which attribute of page directive must be specified to achieve this.	5	N	R	1	import	Ed
11	A servlet is an instance of_____.	5	N	R	1	the HttpServlet class	Ed
12	A user types the URL http://www.msbte.com/result.php. Which HTTP request gets generated? Select the one correct answer	5	N	R	1	GET method	Ed
13	A _____ is a small piece of information that is persisted between the multiple client requests.	5	N	R	1	cookie	Ed
14	Abbreviate the term MIME?	5	N	R	1	Multipurpose internet Mail Extension	Ed
15	Advantage of JSP over Servlet is_____	5	N	R	1	JSP is web page scripting language and servlets are Java programs	Ed
16	An image file representing a company's logo has to be uploaded to the server. Which of the following HTTP methods can be used in this situation?	5	N	R	1	doPut()	Ed
17	An object of Which is created by the web container at time of deploying the project?	5	N	R	1	ServletContext	Ed
18	By default, how long does a cookie last?	5	N	R	1	By default, a newly created cookie persists until the browser exits.	Ed
19	By Default, How many variables are available in JSP programs?	5	N	R	1	6	Ed
20	By default, Tomcat runs on port _____.	5	N	R	1	8080	Ed
21	CGI stands for _____	5	N	R	1	Common Gateway Interface	Ed

22	CGI was expensive in terms of _____ and _____ to create separate process for each client request	5	N	R	1	Process,Memory, Resource	Ed
23	Choose correct scopes into JSP	5	N	R	1	page,request,session,application	Ed
24	choose correct syntax of directive:	5	N	R	1	&lt;%@ directive_name%&gt;	Ed
25	Cookie class consist _____.	5	N	R	1	name and value	Ed
26	Cookie is the piece of information which stores the session related data like _____.	5	N	R	1	username,password,time,date	Ed
27	Cookies can be deleted by using..... Method.	5	N	R	1	setMaxAge( )	Ed
28	Cookies sent from _____ to _____	5	N	R	1	Server,Client	Ed
29	Different methods used by cookie class are	5	N	R	1	All of the above	Ed
30	During Initialization of Servlet, a servlet instance can throw _____.	5	N	R	1	Both i) and ii)	Ed
31	Dynamic interception of requests and responses to transform the information is done by	5	N	R	1	Servlet filter	Ed
32	Filters were officially introduced in the Servlet _____ Specification.	5	N	R	1	2.3	Ed
33	Following method is not valid life cycle method of JSP	5	N	R	1	jspStop()	Ed
34	Generic Servlet belongs to _____ package of java.	5	N	R	1	javax.servlet	Ed
35	GenericServlet implements the _____ and _____.	5	N	R	1	Servlet, servletConfig	Ed
36	getCookies is method of which of the following ?	5	N	R	1	HttpServletRequest	Ed
37	getSession() method with true as parameter it will return the appropriate session object	5	N	R	1	session is existing	Ed
38	getWriter() method can be called by -----object	5	N	R	1	ServletResponse object	Ed
39	Give the examples of Application Server from the following?	5	N	R	1	All of the above	Ed
40	How can we get context init parameter and run some code before rest of the application can service a client?	5	N	R	1	ServletContextListener	Ed
41	How does tomcat executes a JSP?	5	N	R	1	By one of Tomcat's thread	Ed
42	How many character we send though doGet()?	5	N	R	1	1024	Ed
43	How many copies of a JSP page can be in memory at a time?	5	N	R	1	one	Ed
44	How to send data in get method?	5	N	R	1	through URL	Ed
45	HTTP servlet uses methods like_____.	5	N	R	1	doPost(),doGet()	Ed
46	HttpServlet is a subclass of _____.	5	N	R	1	GenericServlet	Ed
47	Identify correct servlet interface	5	N	R	1	Servlet	Ed
48	Identify correct syntax of service() method of servlet class	5	N	R	1	void service(ServletRequest req, ServletResponse res)	Ed
49	If an expiration date is not explicitly assigned to a cookie _____	5	N	R	1	it is deleted when the current browser session ends	Ed
50	If you want to track active session or how many users are there? which listener you should use.	5	N	R	1	HttpSessionListener	Ed

51	in a web application, running in a webserver, who is responsible for creating request and response object	5	N	R	1	Servlet	Ed
52	In Http request method which is non-idempotent?	5	N	R	1	POST method	Ed
53	In HTTP Request Which Asks for the loopback of the request message, for testing or troubleshooting?	5	N	R	1	TRACE	Ed
54	In JSP a Canvas object provides access to a Graphics object via one of its methd called_____	5	N	R	1	paint()	Ed
55	In order to run JSP ..... is required.	5	N	R	1	Java Web Server	Ed
56	In response to HTTP Request servlet sends _____	5	N	R	1	HTTP Response	Ed
57	In which file do we define a servlet mapping?	5	N	R	1	web.xml	Ed
58	In which of these getAttribute () and setAttribute() method is not defined?	5	N	R	1	ServletConfig	Ed
59	In which phase of JSP life cycle ,JSP page turns into servlet?	5	N	R	1	JSP Compilation	Ed
60	init() ,service(),destroy() methods are defined in _____	5	N	R	1	javax.servlet.Servlet interface	Ed
61	Java servlets are an efficient and powerful solution for creating ..... for the web.	5	N	R	1	Dynamic content	Ed
62	javax.servlet package does not contain following class or interface.	5	N	R	1	HttpServlet	Ed
63	JSDK stands for	5	N	R	1	Java Servlet Development Kit	Ed
64	JSP basically used to .....	5	N	R	1	develop server pages	Ed
65	JSP containers are required to support ..... different formats of JSP syntax	5	N	R	1	Two	Ed
66	JSP embeds in ..... in .....	5	N	R	1	Java, HTML	Ed
67	JSP implicit object associated with request is	5	N	R	1	HttpServeletRequest	Ed
68	JSP includes a mechanism for defining ..... or custom tags	5	N	R	1	dynamic attributes	Ed
69	JSP is not governed by the syntax and semantics defined by the ..... specifications.	5	N	R	1	Java 2	Ed
70	JSP is transformed into _____	5	N	R	1	Java Servlet	Ed
71	JSP page compiled and it turn in to_____	5	N	R	1	Servlet	Ed
72	JSP Start and end With the Symbol	5	N	R	1	&lt;% %&gt;	Ed
73	JSP supports ..... implicit objects that JSP container makes available to developers in each page.	5	N	R	1	9	Ed
74	Life cycle of a JSP page consist of following steps.	5	N	R	1	Translation,compilation,Loading and initialization,Request Handling,Destroy	Ed
75	Life cycle of the servlet is managed by	5	N	R	1	servletContainer	Ed
76	Name a class that includes the getSession() method that is used to get the HttpSession	5	N	R	1	HttpServletRequest	Ed
77	Name the class that can be used to get the cookies from the client browser	5	N	R	1	HttpServletRequest	Ed

78	Name the http method that sends the same response as the request.	5	N	R	1	TRACE method	Ed
79	Name the http method used to send resources to the server	5	N	R	1	PUT method	Ed
80	Name the interface which is used to get initialization parameters for Servlet	5	N	R	1	ServletConfig	Ed
81	Name the location of compiled class files within a jar file?	5	N	R	1	/WEB-INF/classes	Ed
82	Name the method defined in the HttpServletResponse class that may be used to set the content type.	5	N	R	1	setContentType	Ed
83	On typing a URL on the address bar, which HTTP request gets generated? Select the one correct answer	5	N	R	1	GET method	Ed
84	Parameters are present in URL while using _____ method	5	N	R	1	doGet()	Ed
85	Servlet are webpages generated by the web server In response to the requests send by the	5	N	R	1	client	Ed
86	Servlet is _____ side scripting language	5	N	R	1	Server	Ed
87	Session management is possible using _____	5	N	R	1	All of the mentioned	Ed
88	State true or false for the following statements in Java. i) Java beans slow down software development process. ii) Java Servlets do not have built in multithreading feature.	5	N	R	1	i-false, ii-false	Ed
89	The doGet() Extracts values of the parameter type and number by using _____	5	N	R	1	request.getParameter()	Ed
90	The GET and POST methods are specified in _____.	5	N	R	1	an HTML form	Ed
91	The getSession() method with its parameter [getSession(true)]. It will return the appropriate session object when _____	5	N	R	1	the session is existing	Ed
92	The HTTPSErvlet class is defined in _____ package	5	N	R	1	javax.servlet.http	Ed
93	The HttpServlet class support _____.	5	N	R	1	All of the mentioned	Ed
94	The init parameter name and value pairs that are defined in web.xml file are handled by _____ Object.	5	N	R	1	ServletConfig	Ed
95	The Java _____ specification defines an application programming interface for communication between the Web server and the application program.	5	N	R	1	Servlet	Ed
96	The javax.servlet.jsp package has two interfaces find in the following?	5	N	R	1	JspPage & HttpJspPage	Ed
97	The JspPage interface defines the _____ and _____ method which the page writer can use in their pages and are invoked in much the same manner as the _____ and _____ methods of a servlet.	5	N	R	1	jspInit(), jspDestroy(), init() , destroy()	Ed
98	The lifecycle of Servlet is managed by_____	5	N	R	1	ServletContainer	Ed
99	The major difference between servlet and CGI is	5	N	R	1	Servlets are thread based and CGI is process based	Ed
100	The maximum size of data can be sent by doGet() of HTTP request is	5	N	R	1	240 bytes	Ed
101	The parameters can be passed to an applet by using <PARAM> tag in the following way:	5	N	R	1	&lt;PARAMNAME=parameter_name VALUE=parameter_value&gt;	Ed
102	The purpose of init () in servlet life cycle is	5	N	R	1	initialization	Ed
	The servlet can read its initialization arguments through the						

103	_____.	5	N	R	1	ServletConfig object	Ed
104	The whole life cycle of a servlet breaks up into 3 phases:	5	N	R	1	Initialization, Service , Destroy	Ed
105	The _____ method is called when the servlet is first created, and is not called again as long as the servlet is not destroyed.	5	N	R	1	init	Ed
106	These methods doGet(),doPost(),doHead(),doDelete(),doTrace() are used in?	5	N	R	1	HttpServlet	Ed
107	The_____ package contains a number of interfaces and classes that are commonly used by servlet developers	5	N	R	1	javax.servlet.http	Ed
108	This method is called once just before the servlet is unloaded and taken out of service.	5	N	R	1	public void destroy()	Ed
109	TLDs are used by a _____ to validate the tags and by JSP page development tools	5	N	R	1	web container	Ed
110	To compile a Java servlet program, the _____ file must be in the classpath.	5	N	R	1	TomcatRootDir\common\lib\servlet.jar	Ed
111	To get the servlet environment information	5	N	R	1	ServletContext object is used	Ed
112	Tomcat is a _____	5	N	R	1	Web Server	Ed
113	what are mechanism available in servletContextListener interface?	5	N	R	1	contextInitialized(),contextDestroyed()	Ed
114	What are the correct statements about filter?	5	N	R	1	All of these	Ed
115	What are the true sentences about Session-Id?	5	N	R	1	All of these	Ed
116	What is bytecode?	5	N	R	1	Machine Independent code	Ed
117	What is difference between servlets and applet 1)Servlets executes on server ,where applet execute on browser 2)Servlets have no GUI,Where as Applet has GUI 3) Servlets create static web pages ,where as applet creates dynamic pages 4)Servlets can handle only a single request, where as applet can handle multiple request	5	N	R	1	1,2 are correct	Ed
118	What is invoked via HTTP on the Web server computer when it responds to requests from a user's Web browser?	5	N	R	1	Java Servlet	Ed
119	What is return type of getSession( ) method?	5	N	R	1	HttpSession	Ed
120	What is servlet?	5	N	R	1	Servlets are small program used for developing and executing web applications.	Ed
121	What is the meaning of jar?	5	N	R	1	java archived	Ed
122	What JSP Stands for_____	5	N	R	1	Java server pages	Ed
123	What method is used to specify a container's layout in JSP?	5	N	R	1	setLayout()	Ed
124	What programming language(s) or scripting language(s) does Java Server Pages (JSP) support?	5	N	R	1	Java only	Ed
125	What servlet processor was developed by Apache Foundation and Sun?	5	N	R	1	Apache Tomcat	Ed
126	What value does readLine() returns when it has reached the end of a file in JSP?	5	N	R	1	Null	Ed
127	Where the servlets run?	5	N	R	1	on server side	Ed

128	Where the session data will store ?	5	N	R	1	Session objects.	Ed
129	Which method returns names of the request parameters as Enumeration of String objects	5	N	R	1	getParameterNames	Ed
130	Which among the below is the class of javax.servlet package	5	N	R	1	GenericServlet	Ed
131	Which are true about tag libraries in web applications?	5	N	R	1	all of the above	Ed
132	Which attribute is mandatory while creating cookie	5	N	R	1	Value	Ed
133	Which cookie is valid for single session only; it is removed each time when user closes the browser?	5	N	R	1	Non-persistent cookie	Ed
134	Which HTTP method gets invoked when a user clicks on a link? Select the one correct answer	5	N	R	1	GET method	Ed
135	Which http method send by browser that asks the server to get the page only?	5	N	R	1	get	Ed
136	Which interface declares life cycle method of servlet?	5	N	R	1	Servlet	Ed
137	Which interface defines a getSession() method?	5	N	R	1	HttpServletRequest	Ed
138	Which is interface of following	5	N	R	1	Servlet	Ed
139	Which is least visibility scope for Javabean in JSP	5	N	R	1	Page	Ed
140	Which is not the method in servlet to handle http request	5	N	R	1	doShow()	Ed
141	Which JSP tag is used to transfer processing to another JSP page ?	5	N	R	1	&lt;jsp:forward&gt;	Ed
142	Which life cycle method is used to process a client's request?	5	N	R	1	service()	Ed
143	Which methods are central to life cycle of a servlet?	5	N	R	1	init(), service() and destroy()	Ed
144	Which method decides whether doGet() or doPost() method to call?	5	N	R	1	service	Ed
145	Which method does not exist on HttpServlet class?	5	N	R	1	init()	Ed
146	Which method is called on every servlet request ?	5	N	R	1	service()	Ed
147	Which method is used in the servlet class, to retrieve the input values from HTML page?	5	N	R	1	request.getParameter()	Ed
148	Which method is used to end servlet life cycle	5	N	R	1	destroy	Ed
149	Which method is used to extract cookies from a request?	5	N	R	1	getCookies()	Ed
150	Which method is used to specify before any lines that use the PrintWriter?	5	N	R	1	setContentType()	Ed
151	Which method of HttpServletRequest is used to create a session?	5	N	R	1	getSession()	Ed
152	Which method of HttpServletResponse is used to redirect an HTTP request to another URL?	5	N	R	1	sendRedirect()	Ed
153	Which method of the component class is used to set the position and size of a component in JSP?	5	N	R	1	setBounds()	Ed
154	Which methods are available in ServletContext interface?	5	N	R	1	getAttribute(),getMimeType(String File),void Log(String s)	Ed
155	Which method allows the client to send data of unlimited length to the web pageserver a single time.	5	N	R	1	doPost()	Ed

156	which of following is not true for servlet?	5	N	R	1	it is single threaded	Ed
157	Which of the following are class	5	N	R	1	GenericServlet	Ed
158	Which of the following are examples of JSP directive.	5	N	R	1	include	Ed
159	Which of the following are interface? 1.ServletContext 2.Servlet 3.GenericServlet 4.HttpServlet	5	N	R	1	1,2	Ed
160	Which of the following are the session tracking techniques?	5	N	R	1	URL rewriting, using session object, using cookies, using hidden fields	Ed
161	Which of the following correctly represents the following JSP statement. <%=x%>	5	N	R	1	&lt;jsp:expression&gt;x&lt;/jsp:expression&gt;	Ed
162	Which of the following implicit objects is not available to a JSP page by default?	5	N	R	1	context	Ed
163	Which of the following is an approach for state maintenance in Web applications?	5	N	R	1	All of the above.	Ed
164	Which of the following is legal JSP syntax to print the value of i. Select the one correct answer	5	N	R	1	&lt;%int i = 1;%>	Ed
165	Which of the following is not a server-side technology ?	5	N	R	1	DHTML	Ed
166	Which of the following is used to redirect the response from a servlet to a JSP page?	5	N	R	1	response.sendRedirect()	Ed
167	Which of the following JSP variables are not available within a JSP expression. Select the one correct answer.	5	N	R	1	httpsession	Ed
168	Which of the following method does not exist in HttpServlet class?	5	N	R	1	init	Ed
169	Which of the following method is used to destroy the session?	5	N	R	1	destroy( )	Ed
170	Which of the following methods are main methods in life cycle of servlet? 1.init() 2 .service() 3.destroy() 4.wait()	5	N	R	1	1,2 and 3	Ed
171	Which of the following packages are required to create servlets in java?	5	N	R	1	javax.servlet, javax.servlet.http	Ed
172	Which of these is a protocol for breaking and sending packets to an address across a network?	5	N	R	1	TCIP/IP	Ed
173	Which of these is not a method of GenericServlet?	5	N	R	1	doGet	Ed
174	Which of these method can be called multiple times in servlet's life cycle?	5	N	R	1	service()	Ed
175	Which of these protocol uses service() method to process the request in servlet?	5	N	R	1	HTTP	Ed
176	Which packages represent interfaces and classes for servlet API?	5	N	R	1	both a and b	Ed
177	Which servlet processor was developed by Apache Foundation and sun?	5	N	R	1	Apache Tomcat	Ed
178	Which statements about HttpSession objects are true? 1. A session may become invalid due to inactivity. 2. A new session is created each time a user makes a request. 3. A session may become invalid as a result of a specific call by a servlet. 4. Multiple requests made from the same browser may have access to the same session object.	5	N	R	1	1,3,4 are correct	Ed

179	Which tag is used to declare one or more variables or methods	5	N	R	1	&lt;%!----%&gt;	Ed
180	Why JSP is basically used today?	5	N	R	1	b) To develop server pages	Ed
181	_____ is the first phase of servlet life cycle	5	N	R	1	initialization	Ed
182	_____ Method returns true if the server created the session and it has not yet been accessed by the client.	5	N	R	1	isNew()	Ed
183	_____ is a small piece of Information that is passed back & forth in HTTP request & response	5	N	R	1	Cookie	Ed
184	_____ declares life cycle methods of servlet.	5	N	R	1	Servlet	Ed
185	_____ is a technology for developing web pages that supports dynamic content which helps developer to insert java code in HTML pages by making use of special tags <% _____ %>.	5	N	R	1	JSP	Ed
186	_____ is used to read data from a client request.	5	N	R	1	ServletRequest	Ed
187	_____ method gives the current session	5	N	R	1	getSession()	Ed
188	_____ class provides functionality that makes it easy to handle requests and responses.	5	N	R	1	GenericServlet	Ed
189	_____ Defines page-dependent attributes, such as scripting language, error page, and buffering requirements.	5	N	R	1	&lt;%@ page ... %&gt;	Ed
190	_____ method execute at end of servlet life cycle.	5	N	R	1	destroy()	Ed
191	_____ methos is secure.	5	N	R	1	doPost()	Ed
192	..... Life cycle method handles all client request.	5	N	R	1	service( )	Ed
193	import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class HelloWorld extends HttpServlet { public void doGet(_____, _____) throws ServletException, IOException { res.setContentType("text/html"); PrintWriter out = res.getWriter(); out.println("<HTML>"); out.println("" <HEAD><TITLE>Hello World</TITLE></HEAD>"); out.println("" <BODY>"); out.println("<H1>Hello World</H1>"); out.println("</BODY> </HTML>"); } } What are the parameters for doGet()?	5	N	A	2	HttpServletRequest req &amp; HttpServletResponse res	Ed
194	Consider the following program and identify the missing method name ***** if you want to implement HTTP POST. import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class ColorGetServlet extends HttpServlet { public void ***** (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { String color = request.getParameter("color"); response.setContentType("text/html"); PrintWriter pw = response.getWriter(); pw.println("<B>The selected color is: "); pw.println(color); pw.close(); } }	5	N	A	2	doGet()	Ed

305	DatabaseMetaData gives information about_____	5	N	U	2	Database	Ed
306	Debug the following code and find which statement contains error. import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class DemoServlet extends HttpServlet { public void service(HttpServletRequest req,HttpServletResponse res) throws ServletException,IOException { res.setContentType("text/html"); PrintWriter pw= res.getWriter(); pw.println("<h2> Welcome to servlet programming..."); pw.close(); } }	5	N	A	2	No error	Ed
307	Deployment descriptor describes	5	N	U	2	web component settings	Ed
308	Difference between doGet() and doPost() methods is_____. Select any of given options A. In doGet() the parameters are appended to the URL and sent along with header information. B. In doPost(),will send the information through a socket back to the webserver and it won't show up in the URL bar. C. doGet() is a request for information; D. doPost() provides information (such as placing an order) that the server is expected to remember	5	N	U	2	All above are valid differences	Ed
309	Difference between servlet and applet is_____. Select any of given options A. Servlet executes on Servers,where as applet executes on browser. B. Servlet have no GUI,where as an applet has an GUI. C. Servlet can handle only one request,where as applet can handle multiple request. D. Servlet creates static web pages ,where as applet creates dynamic web pages.	5	N	U	2	Only A and B are correct.	Ed
310	Diffrence between JSP and Servlet is_____. Select any of given options A) In MVC, jsp act as a view. B) Servlets run faster compared to JSP. C) In MVC, servlet act as a controller. D) Using JSP, we can build custom tags which can directly call Java beans.	5	N	U	2	All above are valid differences	Ed
311	During initialization of servlet a servlet instance can throw	5	N	U	2	Both	Ed
312	Dynamic Interception of request and responses to transform the information is done by_____	5	N	U	2	Servlet filter	Ed
313	Fill correct statement to get output import java.io.*; import javax.servlet.; import javax.servlet.http.*; public class SessionIdServlet extends HttpServlet { public void doGet(HttpServletRequest request,HttpServletResponse response) throws ServletException,IOException { response.setContentType("text/html"); PrintWriter pw=response.getWriter(); HttpSession session=_____; String id=session.getId(); pw.println("session Id is:"+id); } }	5	N	A	2	request.getSession()	Ed

	Fill in the missing statements import javax.servlet.*; import javax.servlet.http.*; import java.io.*; public class AddCookieServlet extends HttpServlet { public void doPost(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { String data = request.getParameter("data"); Cookie cookie = ----- ----- response.addCookie(cookie); response.setContentType("-----"); PrintWriter pw = response.getWriter(); pw.println("<B>MyCookie has been set to"); pw.println(data); pw.close(); } }	5	N	A	2	new Cookie("MyCookie", data); text/html	Ed
314	Find correct output of following code HTML FILE <html> <body> <form action="pass1"> name:<input type="text" name="t1"> password:<input type = "password" name="t2"> <input type="submit" value="login"> </form> </body> </html> // Servlet file import java.io.*; import javax.servlet.*; public class pass1 extends GenericServlet { public void service(ServletRequest req,ServletResponse res)throws ServletException, IOException { res.setContentType("text/html"); PrintWriter pw = res.getWriter(); String un="abc"; String pwd="xyz"; String p1=req.getParameter("t1"); String p2=req.getParameter("t2"); if((p1.equals(un)) && (p2.equals(pwd))) { pw.println("<h1>welcome to home page</h1>"); } else{ pw.println("invalid"); } pw.close(); } }	5	N	A	2	Firstly input username & password then it displays "welcome to home page"	Ed
315	Find error in following code from given options. import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class ColorPostServlet extends HttpServlet { public void doPost(ServletRequest request,ServletResponse response) throws ServletException, IOException { String color = request.getParameter("color"); response.setContentType("text/html"); PrintWriter pw = response.getWriter(); pw.println("<B>The selected color is: "); pw.println(color); pw.close(); } }	5	N	A	2	Error in doPost() method	Ed
316	Find errors in following code. import java.io.*; import javax.servlet.*; public class MyServlet extends GenericServlet { public void service(ServletRequest request, ServletResponse response) { response.setContentType("text/html"); PrintWriter pw = response.getWriter(); pw.println("<B>Servlet programming</B>"); pw.println(" It is cool!"); pw.close(); } }	5	N	A	2	Error in service() method declaration	Ed
317	Find out error in the following program import javax.servlet.*; import javax.servlet.http.*; import java.io.*; public class SessionDemo extends HttpServlet { public void doGet(HttpServletRequest req,HttpServletResponse res) throws ServletException,IOException { res.setContentType("text/html"); PrintWriter pw=res.getWriter(); HttpSession hs=req.getSession(true); //Print Session ID pw.println("Session ID= "+hs.getId()); } }	5	N	A	2	statement where http servlet class is extended	Ed
318	Find out the error in the following code. import java.io.*; import javax.servlet.*; public class servlet extends HttpServlet { public void service(ServletRequest request, ServletResponse response) throws ServletException, IOException { response.setContentType("text/html"); PrintWriter printwriter = response.getWriter(); printwriter.println("<B>Hello from Java!</B>"); printwriter.close(); } }	5	N	A	2	Mismatch servlet	Ed
319	Find out the missing statement <html> <head> <title>Reading Cookies</title> </head> <body> <center> <h1>Reading Cookies</h1> </center> <% Cookie cookie = null; Cookie[] cookies =						

	320 <pre>null; // Get an array of Cookies associated with this domain if( cookies != null ){ out.println("&lt;h2&gt; Found Cookies Name and Value&lt;/h2&gt;"); for( int i = 0; i &lt; cookies.length; i++){ cookie = cookies[i]; out.print("Name : " + cookie.getName( ) + ", "); out.print("Value: " + cookie.getValue( )+" &lt;br/&gt;"); } }else{ out.println("&lt;h2&gt;No cookies founds&lt;/h2&gt;"); } %&gt; &lt;/body&gt; &lt;/html&gt;</pre>	5	N	A	2	cookies = request.getCookies();	Ed
321	Find out the missing statement in following program import java.io.*; import javax.servlet.*; public class simple extends GenericServlet { public void service(ServletRequest rq,ServletResponse rs) throws IOException, ServletException { rs.setContentType("text/html"); out.println("<html>"); out.println("<body bgcolor=red>"); out.println("<h1>Hello World!</h1>"); out.println("</body>"); out.println("</html>"); } }	5	N	A	2	PrintWriter out = rs.getWriter();	Ed
322	Find out the missing statement to get the correct output in bellow program import java.io.*; import javax.servlet.*; import javax.servlet.http.*; import java.util.*; public class SessionTracking extends HttpServlet { public void doGet(HttpServletRequest req,HttpServletResponse res) throws ServletException,IOException { res.setContentType("text/html"); PrintWriter w = res.getWriter(); Integer count=(Integer)ss.getAttribute("tracker.count"); if(count==null){ count=new Integer(1); } else count=new Integer(count.intValue()+1); ss.setAttribute("tracker.count",count); w.println("<h1>Sessiontracking Demo</h1>"); w.println("You have visited this page "+count+"times"); w.println("here is session data"); Enumeration enu=ss.getAttributeNames(); while(enu.hasMoreElements()) { String name= (String)enu.nextElement(); w.println(name+ " "+ss.getAttribute(name)); } } }	5	N	A	2	HttpSession ss=req.getSession();	Ed
323	Find the Syntactically Correct Statement	5	N	A	2	public void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException	Ed
324	Find the statement missing in the below code import java.io.*; import javax.servlet.*; public class HelloWorld extends HttpServlet { public void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { PrintWriter out = response.out.println("Hello World"); } }	5	N	U	2	both A and B	Ed
325	Find the wrong statement in given program: import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class HelloServlet extends HttpServlet { public void service(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { response.setContentType("text/html"); PrintWriter pw = response.getWriter(); pw.println("<b> Hello This is first servlet program"); pw.close(); } } Figure:-  	5	Y1	A	2	response.getWriter(); replace this statement with response.getWriter();	Ed

					
326	Following are the life cycle methods of servlet: 1. service() 2. init() 3. destroy() Select the correct sequence in which these methods are executed during life cycle of a particular servlet.	5	N	U	2 2, 1,3
327	following is the code to get all the cookies . choose the proper option to fill the blank space in the code <code>Cookie ck[] = request.getCookies(); for(int i=0;i&lt;ck.length;i++){ out.print("&lt;br&gt;" + ck[i].getName() + " " + _____ //printing name and value of cookie }</code>	5	N	A	2 ck[i].getValue();
328	Following Java program will throw exception _____.Select any one option from given options import javax.servlet.http.*; import javax.servlet.*; import java.io.*; public class DemoServlet extends HttpServlet{ public void doGet(HttpServletRequest req,HttpServletResponse res)throws { res.setContentType("text/html"); PrintWriter pw=req.getWriter(); pw.println("<html><body>"); pw.println("Welcome to servlet"); pw.println("</body></html>"); pw.close(); }}	5	N	A	2 throws ServletException,IOException
329	following servlet read parameters passed through the html page. Write the correct HTML code for given servlet. Import jba. Io.*; import java.util.*; import javax.servlet.*; public class Example2servlet extends Generic servlet { public void service(HttpServletRequest req, HttpServletResponse res) throws ServletException, IOException { PrintWriter pw = res.getWriter(); Enumeration e = req.getParameterNames(); while (e.hasMoreElements()) { String paramName = (String)e.nextElement(); pw.print(paramName+""); String pvalue = req.getParameter(paramName); pw.print(pvalue); } pw.close(); } } <html> <head> <title> <meta http-equiv="Content-type" content="text/html; charset= UTF-8" /> </head> <body> <form name = "form" method ="post" action = "http://localhost:8080/WebApplication1/Example2Servlet"> <table> <tr> <td> <input type = "text" name = "name" /> </td> <td> <input type = "text" name = "phone" /> </td> </tr> <tr> <td> <input type = "submit" value = "submit" /> </td> </tr> </table> </body> </html>	5	N	A	2 d.&lt;tr&gt; &lt;td&gt; phone : &lt;/td&gt; &lt;td&gt;&lt;input type = textbox name =phone' size =25&quot; value = &quot;&quot; &gt;&lt;/td&gt; &lt;/tr&gt;
330	Following statement means: HttpSession getSession( )	5	N	U	2 It will return existing session object,If not it will create a new session.
331	For a given ServletResponse response, which retrieve an object for writing text data?	5	N	U	2 response.getWriter()
332	For a HttpSession, say session, how do you get its attribute?	5	N	U	2 session.getAttribute("lastName");
	For Displaying Session ID which statement/statements are missing? <code>import java.io.*; import javax.servlet.*; import javax.servlet.http.*;</code>				

333	<pre>public class SessionExample1 extends HttpServlet { public void doGet(HttpServletRequest request, HttpServletResponse response) throws IOException, ServletException { HttpSession session = request.getSession(true); response.setContentType("text/html"); PrintWriter out = response.getWriter(); ----- --- out.println("ID="+id); } }</pre>	5	N	A	2	String id=session.getId();	Ed
334	<p>For given figure which method of RequestDispatcher is applicable (S1Q41)</p> <p>Figure:-</p> <pre> sequenceDiagram     participant Client     participant S1     participant S2     Client-&gt;&gt;S1: Request     activate S1     S1-&gt;&gt;S2: forward()     deactivate S1     activate S2     S2--&gt;&gt;Client: Response of S2 only, that too, directly     deactivate S2   </pre>	5	Y1	U	2	forward	Ed
335	For the below html code: <input type="text" name="username"> The servlet code to retrieve the value from the text box is:	5	N	U	2	String str=req.getParameter("username"); where req is HttpServletRequest object	Ed
336	For the following code identify the correct syntax of service () method of servlet class. import java.io.*; import javax.servlet.*; public class HelloServlet extends GenericServlet { public void service(_____)throws ServletException, IOException { response.setContentType("text/html"); PrintWriter pw = response.getWriter(); pw.println("<B>Hello"); pw.close(); } }	5	N	A	2	void service(ServletRequest req,ServletResponse res)	Ed
337	For the following code select the missing statement that can be used . import java.io.*; import java.net.*; import javax.servlet.*; public class Exp extends GenericServlet{ public void service(ServletRequest request, ServletResponse response) throws ServletException, IOException { response.setContentType("text/html"); PrintWriter out = response.getWriter(); out.println("<b>Values u entered are:</b>"); out.println("Hello "+name+" "); out.close(); } }	5	N	A	2	String name=request.getParameter("name");	Ed
338	<p>For the following output, what is the html &lt;form&gt; tag code?</p> <p>Figure:-</p>	5	Y1	A	2	&lt;FORM METHOD="GET" ACTION="/servlet/Hello"&gt;	Ed

							
339	Generic servlet implements the _____ & _____ interface.	5	N	U	2	Servlet & servlet config	Ed
340	getSession() is a method of _____ class.	5	N	U	2	HttpServletRequest	Ed
341	getSession(true) method will return appropriate session object if.....	5	N	U	2	the session is existing	Ed
342	getWriter method is accessed as _____	5	N	U	2	response.getWriter()	Ed
343	Given a web application ShoppingCart with 2 files: ShoppingCart/customer/ addProductToCart.jsp ShoppingCart/customer/ showCart.jsp which of the following code are valid in addProductToCart.jsp to dispatch request to the showCart.jsp?	5	N	A	2	RequestDispatcher nextView = request.getRequestDispatcher("showCart.jsp");	Ed
344	Given an HttpServletRequest request and an HttpServletResponse response: 41. HttpSession session = null; 42. // insert code here 43. if (session == null) { 44. // do something if session does not exist 45. } else { 46. // do something if session exists 47. } To implement the design intent, which statement must be inserted at line 42?	5	N	U	2	session = request.getSession (false);	Ed
345	Given an HttpServletRequest request and HttpServletResponse response, which sets a cookie "username" with the value "joe" in a servlet?	5	N	U	2	response.addCookie(new Cookie("username", "joe"));	Ed
346	Given that resp is an HttpServletResponse, and no custom headers exist in this response before this snippet executes: resp.setHeader("myHeader", "foo"); resp.setHeader("myHeader", "bar"); resp.setHeader("myHeader", "baz"); String [] s = resp.getHeaders("myHeader"); What is the value of s[0]?	5	N	A	2	Compilation fails	Ed
347	Given the following servlet mapping definition for the web application named 'secureapp', <servlet> <servlet-name>ProcessLoginData</servlet-name> <servlet-class>DoLogin</servlet-class> </servlet> <servlet-mapping> <servlet-name>ProcessLoginData</servlet-name> <url-pattern>/do/Login</url-pattern> </servlet-mapping> which of the following URLs will correctly request the Servlet?	5	N	U	2	http://localhost:8080/secureapp/do/Login?name="bob"	Ed
348	Given: <%-- insert code here --%> <html> <body> Today is: <%= new Date()%> </body> </html> What needs to go on line 1?	5	N	A	2	&lt;%@ page import='java.util.Date' %&gt;	Ed
349	Given: 1. public void service(ServletRequest request, 2. ServletResponse response) { 3. ServletInputStream sis = 4. // insert code here 5. } Which retrieves the binary input stream on line 4 ?	5	N	A	2	request.getInputStream();	Ed
350	How does Tomcat execute a JSP?	5	N	U	2	By one of Tomcat's threads	Ed
	How is the form data stored as a cookie on client machine? Pick out the						

351	correct servlet code for the below html code: <html> <head> <meta http-equiv="Content-Type" content="text/html; charset=UTF-8"> <title>Form</title> </head> <body> <form method="get" action="CServlet"> Enter your name : <input type="text" name="myname"> <input type="submit" value="go"> </form> </body> </html>	5	N	A	2	String s=request.getParameter("myname"); Cookie c=new Cookie("name", s); response.addCookie(c);	Ed
352	http://jenkov.com/somePage.html?param1=hello&m2=world Such line will be in browser address bar which statements are true	5	N	A	2	all of above	Ed
353	i) is key component of server side java development ii) is a small pluggable extension to a server that enhances functionality iii) runs only in Windows Operating System iv) allows developers to customize any java enabled server	5	N	U	2	i, ii & iv are true	Ed
354	Identify the following is/are true for JSP technology ? I. It is persistent. II. Platform independent. III. Browser executes the code.	5	N	U	2	Both (I) & (II)	Ed
355	Identify correct syntax of addCookie() method	5	N	U	2	void addCookie(Cookie cookie)	Ed
356	Identify correct syntax of doPost() method used in servlets.	5	N	U	2	void doPost(HttpServletRequest req, HttpServletResponse res)	Ed
357	Identify correct syntax of service() method of servlet class	5	N	U	2	void service(ServletRequest req, ServletResponse res)	Ed
358	Identify method used by following url http://localhost:8080/examples/servlet/test.html?uid=xyz?pass=vvpp?	5	N	A	2	get()	Ed
359	Identify proper syntax of doGet()	5	N	U	2	void doGet(HttpServletRequest req, HttpServletResponse res) throws IOException, ServletException	Ed
360	Identify the correct sequence in Lifecycle of JSP	5	N	U	2	Compile, Initialize, Execute, Destroy	Ed
361	Identify the correct sequence of Steps for creation and execution of java and html file for servlet A) Create a directory structure under Tomcat for your application. Write the servlet source code. You need to import the B)javax.servlet package and the javax.servlet.http package in your source file. C)Compile your source code. D)Create a deployment descriptor. E)Run Tomcat. F)Call your servlet from a web browser.	5	N	U	2	ABCDEF	Ed
362	identify the correct signature of setContextLength() method of ServletResponse interface.	5	N	U	2	void setContextLength(int size)	Ed
363	If you want to override a JSP file's initialization method, within what type of tags must you declare the method?	5	N	A	2	&lt;%!%&gt;	Ed
364	If your servlet class file does not have a package statement, the servlet .class file must be placed in _____ by default.	5	N	A	2	TomcatRootDir\webapps\examples\WEB-INF\classes	Ed
365	import java.io.*; import java.util.*; import javax.servlet.*; import javax.servlet.http.*; public class DateServlet extends HttpServlet { public void doGet(HttpServletRequest request) throws ServletException, IOException { HttpSession hs = request.getSession(true); response.setContentType("text/html"); PrintWriter pw = response.getWriter(); pw.print("<B>"); Date date = (Date)hs.getAttribute("date"); if(date != null) { pw.print("Last access: " + date + " "); } Date = new Date(); hs.setAttribute("date", date); pw.println("Current date: " + date); } } find the error in the above code.	5	N	A	2	Both A and B	Ed
366	In a URL query string, the parameter name and value are associated using the _____ symbol.	5	N	U	2	=	Ed

367	In following Java code fill statement showing ***.Select any one option from given options import java.servlet.*; import java.io.IOException; public class Primitive implements Servlet { public void init (ServletConfig config) throws ***** { System.out.println("init"); } }	5	N	A	2	ServletException	Ed

	In following servlet program "data" is a _____ import javax.servlet.*; import javax.servlet.http.*; public class AddCookieServlet extends HttpServlet { public void doPost(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { String data = request.getParameter("data"); Cookie cookie = new Cookie("MyCookie", data); response.addCookie(cookie); response.setContentType("text/html"); PrintWriter pw = response.getWriter(); pw.println("<B>MyCookie has been set to"); pw.println(data); pw.close(); } }	5	N	A	2	Value of "Name" attribute	Ed
383	In HTTP Request Which Asks for the loopback of the request message, for testing or troubleshooting?	5	N	A	2	TRACE	Ed
384	In JSP Action tags which is used to include the content of another resource it may be jsp, html or servlet?	5	N	A	2	jsp:include	Ed
385	In JSP Action tags which tags are used for bean development?	5	N	U	2	All mentioned above	Ed
386	In JSP, the classes that allow primitive types to be accessed as objects are known as	5	N	A	2	Wrapped classes	Ed
387	In order to run JSP ..... is required.	5	N	U	2	Java Web Server	Ed
388	In order to create a HttpServlet following import statements are used: A. import java.io.*; B. import javax.servlet.*; C. import javax.servlet.http.*; Which of the above statements are mandatory?	5	N	U	2	Statements A, B, C are compulsory.	Ed
389	In RequestDispatcher which method is used to sends the same request and response objects to another servlet?	5	N	A	2	forward()	Ed
390	In Servlet programming, the cookie is represented by the cookie class in the _____ package.	5	N	A	2	javax.servlet.http	Ed
391	In Session tracking which method is used in a bit of information that is sent by a web server to a browser and which can later be read back from that browser?	5	N	U	2	Cookies	Ed
392	In the following statements identify the disadvantages of CGI?	5	N	U	2	All mentioned above	Ed
393	In web application running in a webserver who is responsible for creation request & response object .	5	N	A	2	Container	Ed
394	In which advantage of servlet, Servlets are managed by JVM so no need to worry about memory leak, garbage collection etc.?	5	N	A	2	Robust	Ed
395	In which file do we define a servlet mapping?	5	N	U	2	web.xml	Ed
396	In which folder we have to save java file for servlet?	5	N	U	2	classes	Ed
397	In which of the following cases the request.getAttribute() will be helpful?	5	N	A	2	If a servlet or jsp is invoked using forward method	Ed
398	In which technology, we mix our business logic with the presentation logic?	5	N	A	2	Servlet	Ed
399	index.html <html> <form method="GET"action="MyServlet"> <input type="text" name="foo" />  <input type="text" name="foo" />   <input type="submit" value="Submit" /> </form> </html> MyServlet.java import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class MyServlet extends HttpServlet { public void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { String second = request.getParameterValues("foo")[1];	5	N	A	2	second = request.getParameterValues("foo")[1];	Ed
400							

	***** } } From the above code fill statement showing ***** that retrieve the text from the second text field.					
401	init(),service() and destroy() methods are define in 1.java.servlet.Servlet interface 2.java.servlet.HttpServlet class 3.java.servlet.ServletRequest interface 4.java.servlet.ServletResponse interface	5	N	A	2	1
402	insert the correct statements in the given program import java.io.*; import javax.servlet.*; public class pass1 extends GenericServlet { public void service(ServletRequest req,ServletResponse res) throws ServletException, IOException { res.setContentType("text/html"); PrintWriter pw = res.getWriter(); String un="abc"; String pwd="xyz"; String p1=req.getParameter("t1"); String p2=req.getParameter("t2"); if((p1.equals(un)) && (p2.equals(pwd))) { pw.println("<h1>welcome to home page</h>"); } else pw.println("invalid"); pw.close(); }}	5	N	U	2	setContentType("text/html") String p1=req.getParameter("t1"); String p2=req.getParameter("t2");
403	int getServerPort() This method _____	5	N	A	2	Returns the port number on which this request was received.
404	Is Servlet thread Safe?	5	N	A	2	No
405	Java Servlet i) Is a key component of server side Java Development ii) is a small pluggable extension to a server that enhances functionality iii) runs only in Windows Operating System iv) allows developers to customize any java enabled server	5	N	U	2	ii, iii & iv are true
406	Java servlets are better than the CGI programs because _____.	5	N	A	2	A and C
407	JSP declaration do not have access to automatically defined variable like request,response etc. Which of the following are correct.select the one correct answer.	5	N	A	2	To use the character %>; inside a scriptlet, you may use %>; instead
408	JSP directives provide directions and instructions to the container, telling it how to handle certain aspects of JSP processing. There are three types of JSP directives and they are _____	5	N	A	2	&lt;%@ page ... %>; &lt;%@ include ... %>; &lt;%@ taglib ... %>;
409	JSP includes a mechanism for defining ----- or custom tags.	5	N	U	2	dynamic attributes
410	JSP pages have access to implicit objects that are exposed automatically. One such object that is available is request. The request object is an instance of which class?	5	N	U	2	HttpServletRequest
411	JSP tags are divided into which types?	5	N	U	2	All the above
412	methods that set the cookie attributes are : _____	5	N	U	2	A & B Both
413	My Application has a servlet, which do addition as shown below and sets the value in context scope. It then prints the result. public void doGet(HttpServletRequest req, HttpServletResponse resp) { resp.setContentType("text/html"); PrintWriter out=resp.getWriter(); int param_1=Integer.parseInt( request.getParameter("Param1")); int param_2=Integer.parseInt( request.getParameter("Param2")); getServletContext.setAttribute("result", (param_1 + param_2)); out.print("Result =="+getServletContext.getAttribute("result")); } But sometimes I get wrong results. How can I fix it?	5	N	A	2	By Putting the "result" attribute in request scope.
	My application has a servlet, which do addition as shown on given values and sets the value in context scope. It then prints the result.					

414	PrintWriter out=response.getWriter(); int param_1 =Integer.parseInt(request.getParameter("Param1")); int param_2 = Integer.parseInt(request.getParameter("Param2")); getServletContext.setAttribute("result",(param_1 + param_2)); out.print("Result =="+getServletContext.getAttribute("result")); But sometimes I get wrong results. What do you think might be the reason?	5	N	A	2	Many clients must be accessing the servlet	Ed
415	n the following code, what are the statements within doGet() method to display "Hello from Servlet" on the web browser. import java.io.IOException; import java.io.PrintWriter; import javax.servlet.ServletException; import javax.servlet.http.HttpServlet; import javax.servlet.http.HttpServletRequest; import javax.servlet.http.HttpServletResponse; public class NewServlet extends HttpServlet { protected void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { } }	5	N	A	2	PrintWriter pr=response.getWriter(); pr.println("Hello from Servlet");	Ed
416	Name the class that can be used to get cookies from the client browser.	5	N	U	2	HttpServletRequest	Ed
417	Non-persistent cookies It is valid for _____ session only	5	N	A	2	Single	Ed
418	Observe the program import java.io.IOException; import java.io.PrintWriter; import javax.servlet.ServletException; import javax.servlet.annotation.WebServlet; import javax.servlet.http.HttpServlet; import javax.servlet.http.HttpServletRequest; import javax.servlet.http.HttpServletResponse; public class HelloServlet extends HttpServlet { protected void processRequest(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { response.setContentType("text/html;charset=UTF-8"); PrintWriter out = response.getWriter(); String name = request.getParameter("name"); int a = Integer.parseInt( request.getParameter("num1")); int b = Integer.parseInt( request.getParameter("num2")); sum = a + b; out.println("Hi! " + name + "The sum is " + sum); out.close(); } }	5	N	A	2	This program will read user name and two values and display the sum of two values	Ed
419	Of the following four valid comment styles that can be used within JSP pages, which can the end user see?	5	N	A	2	&lt;!-- (c)2000 mabte.com --&gt;	Ed
420	Output of Following Program import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class HelloServlet extends HttpServlet { public void doGet(HttpServletRequest req,HttpServletResponse res) throws ServletException, IOException { response.setContentType("text/html"); PrintWriter out = req.getWriter(); out.println("<HTML>\n" +"<HEAD>\n<TITLE>Hello</TITLE></HEAD>\n" +"<BODY>\n" + "Hello World</H1>\n" + "</BODY>\n</HTML>"); } }	5	N	A	2	Compilation Error	Ed
421	Predict the output <html> <head><title>A Comment Test</title> </head> <body> <p> Today's date: <%=(new java.util.Date()).toLocaleString()%> </p> </body> </html>	5	N	A	2	Today's date: 15-sep-2007 07:02:07	Ed
422	public abstract class HttpServlet extends	5	N	U	2	GenericServlet	Ed
	public class FirstServlet extends HttpServlet { public void doPost(HttpServletRequest request, HttpServletResponse response){ try{ response.setContentType("text/html"); PrintWriter out =						

423	response.getWriter(); String n=request.getParameter("userName"); out.print("Welcome "+n); Cookie ck=new Cookie("uname",n); response.addCookie(ck); out.print("<form action='servlet'>"); out.print("<input type='submit' value='go'>"); out.print("</form>"); out.close(); }catch(Exception e){System.out.println(e);} } Output will have messgae Welcome with user name and go button. On click of Go	5	N	A	2	Run the servlet2	Ed
424	public class ServletX extends HttpServlet { public void doGet(HttpServletRequest req, HttpServletResponse res) throws IOException, ServletException { req.getSession().setAttribute("key", new X()); req.getSession().setAttribute("key", "x"); req.getSession().removeAttribute("key"); } } and given a listener public class X implements HttpSessionBindingListener { public void valueBound(HttpSessionBindingEvent event) { System.out.print("B"); } public void valueUnbound(HttpSessionBindingEvent event) { System.out.print("UB"); } } Which logging output would be generated by an invocation of the doGet method?	5	N	A	2	BBUBUB	Ed
425	public class SessionTracker extends HttpServlet { public void doGet(HttpServletRequest req, HttpServletResponse res) throws ServletException, IOException { res.setContentType("text/html"); PrintWriter out = res.getWriter(); HttpSession session = req.getSession(); Integer count = (Integer)session.getAttribute("tracker.count"); if (count == null) count = new Integer(1); else count = new Integer(count.intValue() + 1); session.setAttribute("tracker.count", count); } }	5	N	A	2	tracker.count is session variable	Ed
426	Select advantage of JSP from the following -	5	N	U	2	All of the mentioned	Ed
427	Select appropriate syntax for adding cookie.	5	N	U	2	HttpServletResponse-object.addCookie(Cookie obj);	Ed
428	Select correct option for syntax of servlet life cycle methods.	5	N	A	2	public void init(ServletConfig config) throws ServletException public void service(ServletRequest, ServletResponse) public void destroy()	Ed
429	Select missing lines in following code to get ouput . import java.io.*; import javax.servlet.*; public class First implements Servlet{ ServletConfig config=null; public void init(ServletConfig config){ this.config=config; System.out.println("servlet is initialized"); } public void service(ServletRequest req,ServletResponse res) throws IOException,ServletException{ res.setContentType("text/html"); out.print("<html><body>"); out.print("<b>hello simple servlet</b>"); out.print("</body></html>"); } public void destroy(){ System.out.println("servlet is destroyed"); } public ServletConfig getServletConfig(){return config;} public String getServletInfo(){return "copyright 2007-1010";}}	5	N	A	2	PrintWriter out=res.getWriter();	Ed
430	select missing statement in given program. import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class CheckingTheSession extends HttpServlet{ protected void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { response.setContentType("text/html"); PrintWriter pw = response.getWriter(); pw.println("Checking whether the session is new or old "); ***** if(session.isNew()) { pw.println("You have created a new session"); } }}	5	N	A	2	HttpSession session = request.getSession();	Ed
	Select the correct statement to get the output import java.io.*; import						

431	javax.servlet.*; import javax.servlet.http.*; public class SessionIdServlet extends HttpServlet { protected void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { response.setContentType("text/html"); PrintWriter pw=response.getWriter(); HttpSession session=request.getSession(); String id=session.getId(); pw.println("Session Id is:"+ id) }}	5	N	A	2	missing semicolon,missing }	Ed
432	Select the missing code to print sevletconfig object initialization parameter in the following servlet import java.io.*; import javax.Servlet.*; public class Example5Servlet extends GenericServlet { public void service ( ServletRequest req, ServletResponse res ) throws ServletException, IOException { ServletConfig config = getServletConfig (); PrintWriter pw=res.getWriter (); pw.println("parameter name:"+config.getInitParameter("parameter name ")); close (); } }	5	N	A	2	pw.println("parameter name:&lt;B&gt;"+config.getInitParameter("parameter name "));	Ed
433	Select the missing method from following code. public class HelloForm extends HttpServlet { public void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { Cookie firstName = new Cookie("first_name",request.getParameter("first_name")); Cookie Name = new Cookie("last_name", request.getParameter("last_name")); firstName.setMaxAge(60*60*24); lastName.setMaxAge(60*60*24); response.addCookie( firstName ); response.setContentType("text/html"); PrintWriter out = response.getWriter(); String title = "Setting Cookies Example"; out.println( "<head><title>" + title + "</title></head>" + "<h1 align="center">" + title + "</h1>\n" + "<li><b>First Name</b>: " + request.getParameter("first_name") + "\n" + "<li><b>Last Name</b>: " + request.getParameter("last_name") + "\n" + "\n" + "</body></html>" ); } }	5	N	A	2	response.addCookie( Name );	Ed
434	Select the missing statement in given code import java.io.*; import javax.servlet.*; public class HelloServlet extends GenericServlet { public void service(ServletRequest request,ServletResponse response) { response.setContentType("text/html"); PrintWriter pw = response.getWriter(); pw.println("<B>Hello!"); pw.close(); } }	5	N	U	2	public void service(ServletRequest request,ServletResponse response) throws ServletException, IOException	Ed
435	Select the missing statement to get correct output public class welcomeservelet extends GenericServlet { public void service(ServletRequest request,ServletResponse response) throws ServletException,IOException { response.setContentType("text/html"); PrintWriter pw =response.getWriter(); pw.println("<B>welcome to servlet!"); pw.close(); } }	5	N	A	2	import java.io.*; import java.servlet.*;	Ed
436	Select the package used to import the abstract class HttpServlet and interfaces HttpServletRequest and HttpServletResponse	5	N	U	2	import javax.servlet.http.*	Ed
437	select the proper code to get cookies values	5	N	A	2	import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class getcookie extends HttpServlet { public void doGet(HttpServletRequest request,HttpServletResponse response) throws ServletException { // Get cookies from header of HTTP request. Cookie[] cookies = req.getCookies();	Ed
438	select the proper syntax of doGet() method	5	N	U	2	void doGet(HttpServletRequest req,HttpServletResponse res) throws IOException, ServletException	Ed
						import java.io.*; import javax.servlet.*; public class DemoServlet extends	

439	Select the valid program which shows all life cycle methods of GenericServlet.	5	N	A	2	GenericServlet { public void init() { // initialization goes here } public void service(ServletRequest req,ServletResponse res) throws IOException,ServletException { // actual service is provided here } public void destroy(){ }}	Ed
440	Separation of business logic from JSP this is the advantage of?	5	N	A	2	Custom Tags in JSP	Ed
441	service method of servlet is used	5	N	U	2	to send request and to get response	Ed
442	Servlet Life Cycle have _____ state.	5	N	U	2	5	Ed
443	Servlet offer following advantage over CGI	5	N	U	2	CGI is not platform independent but servlet are platform independent	Ed
444	ServletContext is 1. an Interface 2. A container which is used to store an object so that it is available for whole application 3. A container which is used to store an object so that it is available for session only. 4. A container which is used to store an object so that it is available for request only.	5	N	U	2	1,2	Ed
445	Servlets becomes thread safe by implementing the javax. Servlet. SingleThreadModelInterface _____	5	N	U	2	as every request is handled by separate instances of the Servlet.	Ed
446	Servlets only needs be loaded once, while CGI programs needs to be load for every request so that servlet should perform faster than CGI	5	N	U	2	True	Ed
447	Servlets play important role in MVC Architecture as -----	5	N	A	2	Controller	Ed
448	State true or false for the following statements in Java i) Java beans slow down software development process. ii) Java servlets do not have built in multithreading feature.	5	N	U	2	i-false,ii-false	Ed
449	Steps in JSP Page execution	5	N	U	2	1. Compilation 2. Initialization 3. Execution 4. Cleanup	Ed
450	Suppose the servlet class named Test does not have the package statement, by default, you use _____ to invoke it	5	N	A	2	http://localhost:8080/examples/servlet/Test	Ed
451	Suppose the two parameters in the doGet or doPost method are request and response. To retrieve a cookie from a client, use _____.	5	N	A	2	You have to use request.getCookies() to obtain all cookies in an array	Ed
452	Suppose the two parameters in the doGet or doPost method are request and response. To specify HTML content type sent to the client, invoke _____.	5	N	U	2	response.setContentType("text/html")	Ed
453	Suppose you want to know each time request comes in, so that you can log it. Which listener is appropriate for that?	5	N	U	2	ServletRequestListener	Ed
454	Syntax of Scriptlet Element	5	N	U	2	<% code %>	Ed
455	Task performed by filter is	5	N	U	2	All the above	Ed
456	The authentication mechanism in the servlet specification uses a technique called?	5	N	A	2	Role Based Authentication	Ed
457	The correct sequence of JSP life Cycle is	5	N	U	2	init(), Service(), destroy()	Ed
458	The difference between servelets and JSP is the	5	N	U	2	Syntax	Ed
459	The doGet() method extract values of the parameters type and number by using_____.	5	N	U	2	request.getParameter()	Ed
460	The following method of HttpServlet is invoked in response to HTTP POST request.	5	N	U	2	doPost()	Ed

461	The following methods belongs to the life cycle methods of the servlet.	5	N	U	2	All Of Above	Ed
462	The following program contains two errors. Identify them from the following- import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class SessionDemo extends GenericServlet { public void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { response.setContentType("text/html"); PrintWriter out = response.getWriter(); String n=request.getParameter("userName"); out.print("Welcome "+n); HttpSession session=response.getSession(); session.setAttribute("uname",n); out.close(); } }	5	N	A	2	error 1: extends GenericServlet instead of HttpServlet error 2: response.getSession() instead of request.getSession()	Ed
463	The follwing program prints: _____ import java.io.*; import java.util.*; import javax.servlet.*; import javax.servlet.http.*; public class ClientPull extends HttpServlet { public void doGet(HttpServletRequest req, HttpServletResponse res) throws ServletException, IOException { res.setContentType("text/plain"); PrintWriter out = res.getWriter(); res.setHeader("Refresh", "10"); out.println(new Date().toString()); } }	5	N	A	2	Date	Ed
464	The getAttribute(String attr) returns	5	N	U	2	Returns value of the server attribute	Ed
465	The getInitParameter() method of ServletConfig interface returns_____	5	N	U	2	It returns the Initialization parameter value.	Ed
466	The getSession() method with 'true' as its parameter [getSession(true) ] it will return the appropriate session object when	5	N	U	2	the session is existing	Ed
467	The getSession() method with true as its parameter [getSession(true)] it will return the appropriate session object when	5	N	U	2	the session is existing	Ed
468	The given diagram is about: Figure:- 	5	Y1	U	2	Life Cycle of Servlet	Ed
469	The include() method of RequestDispatcher _____.	5	N	A	2	sends a request to another resource like servlet, jsp or html	Ed
470	The init parameter name and value pairs that are defined in web.xml are handled by.	5	N	A	2	ServletConfig object	Ed
471	The Java _____ specification defines an application programming interface for communication between the Web server and the application program.	5	N	A	2	Servlet	Ed
472	The life cycle of a servlet is managed by_____ -	5	N	U	2	servlet container	Ed
473	The main difference between Generic Servlet and HTTP servlet is	5	N	U	2	Generic servlet is protocol platform independent & HTTP servlet having built in HTTP protocol support	Ed
474	The major difference between servlet and CGI is	5	N	A	2	Servlets are thread based and CGI is process based	Ed

475	The method getWriter returns an object of type PrintWriter This class has println methods to generate output Which of these classes define the getWriter method? Select the one correct answer	5	N	A	2	HttpServletResponse	Ed
476	The service phase of the servlet life cycle represents all interactions with requests until the servlet is .....	5	N	U	2	destroyed	Ed
477	The setAttributes(), getAttributes(), getAttributesNames() & removeAttributes() are the bindings of _____.	5	N	U	2	Session	Ed
478	The Status code _____ shows "Resource Temporarily Moved"	5	N	U	2	302	Ed
479	The values of <servlet-name> and <servlet-class> in web.xml file .....	5	N	A	2	may be same	Ed
480	The _____ directive lets you provide information for the page, such as importing classes and setting up content type. The page directive can appear anywhere in the JSP file.	5	N	A	2	page	Ed
481	The _____ method on the session object is used to remove a set attribute.	5	N	A	2	removeAttribute("attributeName")	Ed
482	These methods doGet(),doPost(),doHead,doDelete(),doTrace() are used in?	5	N	U	2	HttpServlets	Ed
483	Through which tag you can define servlet config in web.xml?	5	N	U	2	init-param	Ed
484	To declare the variables in JSP which tag is used	5	N	U	2	Declaration Tag	Ed
485	To get the servlet environment information.	5	N	U	2	ServletConfig object is used.	Ed
486	To Send binary output in the response ,the following method of HttpServletResponse may be used to get the appropriate Writer/Stream object	5	N	U	2	getOutputStream()	Ed
487	What are the methods available in ServletContextListener interface?	5	N	U	2	contextInitialized(),contextDestroyed()	Ed
488	What are the true sentences about Session-Id?	5	N	A	2	All of these.	Ed
489	What contents are displayed by following JSP program in browser window ? <html> <head><title>Hello World</title></head> <body> Hello World!  <% out.println("Value="+(2*5)); %> </body> </html>	5	N	A	2	Hello World! Value=10	Ed
490	What does the below code do? Cookie cookie = new Cookie("mycookie","msbte"); response.addCookie(cookie); where response is object of HttpServletResponse	5	N	U	2	Creates a cookie with name as "mycookie" and value as "msbte" and saves it in user's machine	Ed
491	What gets printed when the following is compiled. Select the one correct answer. <% int y = 0; %> <% int z = 0; %> <% for(int x=0;x<3;x++) { %> <% z++;++y; %> <% }%> <% if(z<y) { %> <%= z%> <% } else { %> <%= z - 1%> <% }%>	5	N	A	2	3	Ed
492	What happens after execution of following code import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class cookiesDemo extends HttpServlet { private static final long serialVersionUID = 1L; protected void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { Cookie t=null; response.setContentType("text/html"); PrintWriter out=response.getWriter(); out.println("<HTML><BODY>"); t=new Cookie("token", null); Cookie token = null; token.setMaxAge(6); response.addCookie(token); out.println("Information collected by the Cookies: "); out.println("User Name:"+token.getValue()); out.println("					Successfully run and display the user name.	Ed

	</HTML></BODY>"); out.close(); } }					
493	What happens after execution of following code import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class sessionDemo extends HttpServlet { private static final long serialVersionUID = 1L; protected void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { response.setContentType("text/html"); PrintWriter pw=response.getWriter(); HttpSession session=request.getSession(true); Integer count=(Integer)session.getValue("tracker.count"); if(count==null) count=new Integer(1); else count= new Integer(count.intValue()+1); session.putValue("tracker.count",count); pw.println("<HTML><BODY><H2>SESSION TRACKING DEMO </H2>"); pw.println("You Have Visited This Page: "+count+"times"); pw.println("Session ID is :" +session.getId()); pw.println("</HTML></BODY>"); } }	5	N	A	2	Successfully run and display visited page count , session ID.  <a href="#">Ed</a>
494	What is Error of following Program ? import javax.servlet.*; import javax.servlet.http.*; import java.io.*; import java.util.*; public class HttpRequestDemoServlet2 extends HttpServlet { public void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { response.setContentType("text/html"); PrintWriter out = response.getWriter(); out.println("<HTML>"); out.println("<HEAD>"); out.println("<TITLE>Obtaining Multi-Value Parameters</TITLE>"); out.println("</HEAD>"); out.println("<BODY>"); out.println(" "); out.println(" Select your favorite singer:"); out.println(" "); out.println("<FORM METHOD=POST>"); out.println(" <INPUT TYPE=CHECKBOX " + "NAME=favoriteMusic VALUE=Alka>Alka"); out.println(" <INPUT TYPE=CHECKBOX " + "NAME=favoriteMusic VALUE=Shreya>Shreya"); out.println(" <INPUT TYPE=CHECKBOX " + "NAME=favoriteMusic VALUE=Sunidhi>Sunidhi"); out.println(" <INPUT TYPE=CHECKBOX " + "NAME=favoriteMusic VALUE=Kavita>Kavita"); out.println(" "); out.println("<INPUT TYPE=SUBMIT VALUE=Submit>"); out.println("</FORM>"); out.println("</BODY>"); out.println("</HTML>"); } throws ServletException, IOException { String[] values = request.getParameterValues("favoriteMusic"); response.setContentType("text/html"); PrintWriter out = response.getWriter(); if (values != null) { int length = values.length; out.println("You have selected: "); for (int i=0; i<length; i++) { out.println(" " + values[i]); } } } }	5	N	A	2	public void doPost(HttpServletRequest request, HttpServletResponse response)  <a href="#">Ed</a>
495	What is byte code?	5	N	U	2	machine independent code  <a href="#">Ed</a>
496	What is default value of session attribute in JSP	5	N	U	2	&lt;%@ page session="true"; %&gt;  <a href="#">Ed</a>
497	what is difference between generic servlet and HTTP Servelet? 1. Generic servelet belongs to javax.servlet package where as HTTP belongs to javax.servlet.http package 2. Generic servlet implements servlet and java.io.Serializable and HTTP implements java.io.Serializable 3. Generic depedent on protocol and HTTP is does not depedent on protocol.	5	N	U	2	Only 1 & 2  <a href="#">Ed</a>
498	What is Error in Program ? import java.io.*; import javax.servlet.*; public class HelloServlet extends GenericServlet { throws ServletException, IOException {	5	N	A	2	public void service(ServletRequest request, ServletResponse response)  <a href="#">Ed</a>

	response.setContentType("text/html"); PrintWriter pw = response.getWriter(); pw.println("<B>Hello!"); pw.close(); } }						
499	What is meaning of jar	5	N	U	2	java archived	Ed
500	What is ouput of program? import java.io.*; import java.util.Date; import java.util.Hashtable; import javax.servlet.*; import javax.servlet.http.*; public class DateServlet extends HttpServlet { public void service(HttpServletRequest req, HttpServletResponse res) throws ServletException, IOException { Date today = new Date(); res.setContentType("text/plain"); ServletOutputStream out = res.getOutputStream(); out.println(today.toString()); } public String getServletInfo() { return "Returns a string representation of the current time"; } }	5	N	A	2	date will be displayed	Ed
501	What is Output of following program //client <html> <head></head> <body><form name =sd action="http://127.0.0.1:8080/examples/servlet/sd1"> Name: <input type="text name="name1"value=""> <input type ="submit" value="login"> </form> </body> </html> //servlet import java.io.*; import java.net.*; import javax.servlet.*; import javax.servlet.http.*; public class sd1 extends HttpServlet { public void service(HttpServletRequest rq,HttpServletResponse rs) throws ServletException,IOException { rs.setContentType("text/html"); PrintWriter out=rs.getWriter(); String nm= (String)rq.getParameter("name1"); out.println("Hello "+nm); } }	5	N	A	2	Hello name inputed in text box	Ed
502	What is Servlet Jobs ?	5	N	U	2	All The Above	Ed
503	What is the difference between cookies and HttpSession?	5	N	U	2	Cookies works at clientside whereas HttpSession works at serverside.	Ed
504	What is the difference between GenericServlet and HttpServlet?	5	N	U	2	all of the above	Ed
505	What is the diffrence between servlet and applet? 1. Servlet execute on server, where as applet execute on browser. 2. Servlet have no GUI, where as applet has GUI. 3. Servelet create static web page where as applet create dynamic web pages. 4. Servelet can handle only one request where as applet can handle multiple request.	5	N	A	2	1,2 are correct	Ed
506	What is the limit of the datato be passed from HTML when doGet() is used?	5	N	U	2	2kb	Ed
507	What is the missing statement in the following program to get the proper output import java.io.*; import java.util.*; public class HelloWorld extends HttpServlet { public void doGet(HttpServletRequest request, HttpServletResponse response) throws IOException, ServletException { response.setContentType("text/html"); PrintWriter out = response.getWriter(); HttpSession hp=request.getSession(true); Date create=new Date(hp.getCreationTime()); Date access=new Date(hp.getLastAccessedTime()); out.println("<h1> Session is created at "+create); out.println("<h1> Last access time is "+access); out.println("<h1> Session id is "+hp.getId()); } }	5	N	A	2	missing Package statement	Ed
508	What is the output iof program i mport java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class HelloWorld extends HttpServlet { private String message; public void init() throws ServletException { message = "Hello World"; } public void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException{	5	N	A	2	Hello Word	Ed

	<pre>response.setContentType("text/html"); PrintWriter out = response.getWriter(); out.println("&lt;h1&gt;" + message + "&lt;/h1&gt;"); } public void destroy() { } }</pre>					
509	What is the output of following program on the web page import java.util.*; import javax.servlet.*; public class HelloServlet extends GenericServlet { public void service(ServletRequest request, ServletResponse response) throws ServletException, IOException { response.setContentType("text/html"); PrintWriter pw = response.getWriter(); pw.println("<B>Hello!"); pw.close(); } }	5	N	A	2	Hello!
510	What is the result of following code, given there already exists a header by name "TestHeader". <pre>response.addHeader("TestHeader","TEST VALUE");</pre>	5	N	A	2	The "TEST VALUE" will be replaced by headers old value.
511	what programming language(s) or scripting language(s) does Java Server Pages(JSP) support?	5	N	A	2	Java only
512	What should we write at the place of _____ to get proper output <pre>import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class example extends _____ { public void doGet(HttpServletRequest request, HttpServletResponse response) throws IOException, ServletException { response.setContentType("text/html"); PrintWriter out = response.getWriter(); // print out cookies String name = request.getParameter("t1"); String value = request.getParameter("t2"); Cookie c = new Cookie(name, value); response.addCookie(c); String n1 = c.getName(); String v1 = c.getValue(); out.println("&lt;h3&gt; The Name Of Cookie is:&lt;/h3&gt;" + n1); out.println("&lt;h3&gt; The Value Of Cookie is:&lt;/h3&gt;" + v1); } }</pre>	5	N	A	2	HttpServlet
513	What the getSession() method with true parameter will returned?	5	N	U	2	the session is existing
514	What the ServletContainer does?	5	N	U	2	Provides the Runtime environment for servlets.
515	What we should write at the place of _____ to get the proper output. <pre>import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class password extends HttpServlet { public void doGet(HttpServletRequest request, HttpServletResponse response) throws IOException, ServletException { response.setContentType("text/html"); PrintWriter out = _____; out.println("&lt;html&gt;"); out.println("&lt;head&gt;"); out.println("&lt;title&gt;Hello World!&lt;/title&gt;"); out.println("&lt;/head&gt;"); out.println("&lt;body&gt;"); String a = request.getParameter("t1"); String b = request.getParameter("t2"); int a1 = a.length(); int b1 = b.length(); if(b.length() &lt;= 6) { out.println("&lt;h3&gt; Welcome To Home Page&lt;/h3&gt;"); } else { out.println("&lt;h3&gt;Password Should not more than 6 Character&lt;/h3&gt;"); } out.println("&lt;/body&gt;"); out.println("&lt;/html&gt;"); } }</pre>	5	N	A	2	response.getWriter();
516	What will be displayed in the output? A JSP page called test.jsp is passed a parameter name in the URL using http://localhost/test.jsp?name="John".and the test.jsp file contains the following code: <pre>&lt;%! String myName=request.getParameter();%&gt; &lt;% String test="Welcome" +myName; %&gt; &lt;%= test%&gt;</pre>	5	N	U	2	The program will give a syntax error.
517	What will be output for following program of servlet: <pre>import javax.servlet.*; public class Pract15 extends GenericServlet { public void service(ServletRequest r, ServletResponse res) throws IOException, ServletException { res.setContentType("text/html");</pre>	5	N	A	2	Compile time error will occur

	PrintWriter p = res.getWriter(); p.println("<HTML>"); p.println("<HEAD> HELLO </HEAD>"); p.println("</HTML>"); } }					
518	what will be the correct output following program. import java.io.*; import javax.servlet.*; public class H extends GenericServlet { public void service(ServletRequest req, ServletResponse res) throws ServletException, IOException { res.setContentType("text/html"); PrintWriter pw = res.getWriter(); pw.println("<B>Hello!!"); pw.close(); } }	5	N	A	2	Hello message is printed with bold style <span style="color: blue;">Ed</span>
519	what will be the correct output of the following program? import java.io.*; import javax.servlet.*; public class H extends GenericServlet { public void service(ServletRequest req, ServletResponse res) throws ServletException, IOException { res.setContentType("text/html"); PrintWriter pw = res.getWriter(); pw.println("<H1>Hello!!"); pw.close(); } }	5	N	A	2	Hello message is printed with H1 style <span style="color: blue;">Ed</span>
520	what will be the final output after Enter the value for First & Second and also click on Clac Button? import javax.servlet.*; import javax.servlet.http.*; import java.io.PrintWriter; import java.io.IOException; public class calcServlet extends HttpServlet { public void doGet(HttpServletRequest req, HttpServletResponse res) throws ServletException, IOException { PrintWriter pw = res.getWriter(); res.setContentType("text/html"); pw.println("<html><head><title>CALCULATOR</title></head>"); pw.println("<body>"); pw.println("<form method=post action=calcServlet>"); pw.println("Enter first No.:"); pw.println("<input type=text name=nm>"); pw.println("Enter Second No.:"); pw.println("<input type=text name=r>"); pw.println("<input type=submit value=calc>"); pw.println("</form></body></html>"); pw.close(); } public void doPost(HttpServletRequest req, HttpServletResponse res) throws ServletException, IOException { String a=req.getParameter("nm"); String b=req.getParameter("r"); int c=Integer.parseInt(a); int d=Integer.parseInt(b); int e=c+d; int f=c-d; int g=c*d; PrintWriter pw = res.getWriter(); res.setContentType("text/html"); pw.println("<html><head><title>CALCULATOR</title></head>"); pw.println("<body>"); pw.println(a+"+"+b+"="+e+" "); pw.println(a+"*"+b+"="+g+" "); int h=c/d; pw.println(a+"/"+b+"="+h+" "); pw.println("</body></html>"); pw.close(); } public void destroy() {} }  Figure:- 	5	Y3	U	2	o1 <span style="color: blue;">Ed</span>

	Which Content Type used in following Program? import javax.servlet.http.*; import javax.servlet.ServletException; import java.io.PrintWriter; import java.io.IOException; public class ServiceServlet extends HttpServlet { public void service(HttpServletRequest request,HttpServletResponse response) throws ServletException,IOException { response.setContentType("text/plain"); PrintWriter out=response.getWriter(); if(request.getMethod().equals("GET")) { out.println("Request handled by the service() method"); } else { response.setStatus(HttpServletResponse.SC_BAD_REQUEST); out.println("Method not supported by this servlet"); } out.close(); } } Figure:- 	5	Y1	A	2	text/plain	Ed
536							
537	Which cookie name was incorrect	5	N	U	2	"Username@gmail.com";	Ed
538	Which cookie it is valid for single session only; it is removed each time when user closes the browser?	5	N	U	2	Non-persistent	Ed
539	Which file will start tomcat Server?	5	N	U	2	startup.bat	Ed
540	Which import statement required for following program. public class servlet extends GenericServlet { public void service(ServletRequest request, ServletResponse response) throws ServletException, IOException { response.setContentType("text/html"); PrintWriter printwriter = response.getWriter(); printwriter.println("<B>Hello from Java!</B>"); printwriter.close(); } }	5	N	A	2	import java.io.*; import javax.servlet.*;	Ed
541	Which interfaces contained by Servlet	5	N	A	2	HttpServletRequest ,HttpServletResponse ,HttpSession, HttpSessionBindingListener	Ed
542	Which is least visibility scope for java beans In JSP	5	N	U	2	Page	Ed
543	which is not the methods of GenericServlet class	5	N	U	2	getSession()	Ed
544	Which is the Microsoft solution for providing dynamic Web content?	5	N	A	2	ASP	Ed
545	Which is the missing statement in following code to get proper output: import java.io.*; import java.util.*; public class HelloWorld extends HttpServlet { public void doGet(HttpServletRequest request, HttpServletResponse response) throws IOException, ServletException { response.setContentType("text/html"); PrintWriter out = response.getWriter(); HttpSession hp=request.getSession(true); Date	5	N	A	2	Missing Package Statement	Ed

	create=new Date(hp.getCreationTime()); Date access=new Date(hp.getLastAccessedTime()); out.println("<h1> Session is created at "+create); out.println("<h1> Last access time is "+access); out.println("<h1> Session id is "+hp.getId()); } }						
546	Which JDBC driver types can be used in either applet or servlet code	5	N	U	2	type 3 and 4	Ed
547	Which JSTL code snippet can be used to perform URL rewriting?	5	N	A	2	&lt;a href='&lt;c:url value="foo.jsp"/&gt;' /&gt;	Ed
548	Which mechanism is included by jsp for defining custom tags?	5	N	U	2	dynamic attributes	Ed
549	Which method is called by the servlet container to allow the servlet to respond to a request.	5	N	U	2	service()	Ed
550	Which method is used to get HttpSession object and it belongs to which object?	5	N	U	2	getSession method and HttpServletRequest	Ed
551	Which method of the request object is used to extract values of the input fields in a form when it is submitted?	5	N	A	2	getParameter()	Ed
552	Which method of the servlet is/are called several times in its life?	5	N	U	2	doPost()	Ed
553	Which method returns a servletConfig object that contains any initialization parameters?	5	N	U	2	servletConfig getServletConfig()	Ed
554	Which method returns the current session associated with this request, or if the request does not have a session, creates one?	5	N	A	2	getSession()	Ed
555	Which Method used for following output?  Figure:- 	5	Y1	A	2	request.getMethod().equals("GET")	Ed
556	Which methods are used to Extract all names or value pairs from the Http request	5	N	U	2	getParameterNames() and getParameterValues()	Ed
557	Which minimum packages are required to execute this Program? public class RequestHeaderExample extends HttpServlet { public void doGet(HttpServletRequest request, HttpServletResponse response) throws IOException, ServletException { response.setContentType("text/html"); PrintWriter out = response.getWriter(); Enumeration e = request.getHeaderNames(); while (e.hasMoreElements()) { String name = (String)e.nextElement(); String value = request.getHeader(name); out.println(name + " = " + value); } } }	5	N	A	2	import java.io.*; import javax.servlet.*; import javax.servlet.http.*; import java.util.*;	Ed
558	Which of the following allows substitution of code to occur at the translation time in a JSP page?	5	N	A	2	&lt;@ include&gt; directive	Ed
559	Which of the following are examples of JSP directive.	5	N	U	2	include	Ed
560	Which of the following are the session tracking techniques?	5	N	A	2	URL rewriting,using session object,using cookies,using hidden fields	Ed

561	Which of the following are true for JSP technology? 1. It is persistent 2. Platform independent 3. Browser executes the code	5	N	U	2	Both 1 and 2 above	Ed
562	Which of the following correctly represents the following JSP statement. <% x=1>	5	N	A	2	&lt;jsp:scriptlet&gt;x=1;&lt;/jsp:scriptlet&gt;	Ed
563	Which of the following describes the correct sequence of the steps involved in executing Java Server Pages? a. Web server forwards HTTP request to JSP engine b. Browser sends HTTP request for JSP page c. servlet processes the request and produces output in HTML format which is then send as HTTP response to the web browser. d. JSP engine compiles servlet into executable class and forwards original request to servlet engine e. JSP engine loads JSP page from disk and converts it into java servlet	5	N	U	2	b-a-e-d-c	Ed
564	Which of the following is correct syntax of init() method of servlet ?	5	N	U	2	void init(ServletConfig sc) throws ServletException	Ed
565	Which of the following is legal JSP syntax to print the value of i Select the one correct answer	5	N	U	2	&lt;%int i = 1;%> &lt;%= i %>;	Ed
566	Which of the following is not a standard method called as part of JSP life cycle	5	N	U	2	jspService()	Ed
567	Which of the following is not true for servlet?	5	N	U	2	It is single threaded	Ed
568	Which of the following is true 1)JSP is a client side technology 2)We can't do client side validation with JSP 3)JSP is dynamic scripting	5	N	A	2	2,3 are true	Ed
569	Which of the following is true about getSession(boolean flag) statement?	5	N	U	2	Both A and C are correct	Ed
570	Which of the following is true regarding TLD	5	N	A	2	All of these	Ed
571	Which of the following is used to redirect the response from a servlet to a JSP page?	5	N	A	2	response.sendRedirect()	Ed
572	Which of the following JSP variables are not available within a JSP expression. Select the one correct answer.	5	N	U	2	httpsession	Ed
573	Which of the following method is not supported by ServletRequest Interface?	5	N	U	2	void setContextLength(int size)	Ed
574	Which of the following methods are main methods in life cycle of servlet	5	N	U	2	Service()	Ed
575	Which of the following represents the XML equivalent of this statement <%@ include file="a.jsp"%> . Select the one correct statement	5	N	A	2	&lt;jsp:include page="a.jsp"/>;	Ed
576	Which of these statements are false about GenericServlet?	5	N	U	2	Genric Servlet extends HttpServlet and override doGet() method	Ed
577	Which package needs to be imported to execute the given program public class First extends GenericServlet{ public void service(ServletRequest req,ServletResponse res) throws IOException,ServletException{ res.setContentType("text/html"); PrintWriter out=res.getWriter(); out.print("<html><body>"); out.print("<b>hello generic servlet</b>"); out.print("</body></html>"); } }	5	N	A	2	a) import java.io.*; import javax.servlet.*;	Ed
578	Which retrieves all cookies sent in a given HttpServletRequest request?	5	N	U	2	request.getCookies()	Ed
	Which Staement is missing from following code showing ***** <html> <body> <H1><center>Result for <%=request.getParameter("a1")%> </center></H1> <% int						

579	i=Integer.parseInt(request.getParameter("t1")); int j=Integer.parseInt(request.getParameter("t2")); int k=0; String str="***** ; if(str.equals("add")) k=i+j; if(str.equals("mul")) k=i*j; if(str.equals("div")) k=i/j; %>	5	N	A	2	request.getParameter("a1");	Ed
580	Which Statement have error in following code importjava.sql.*; import java.io.*; importjavax.servlet.*; importjavax.servlet.http.*; public class p155 extends Servlet{ public void service(HttpServletRequest request,HttpServletResponse response) throws IOException{ PrintWriter z=response.getWriter(); response.setContentType("text/html"); try{ String x=request.getParameter("username"); String y=request.getParameter("password"); Class.forName("sun.jdbc.odbc.JdbcOdbcDriver"); Connection conn=DriverManager.getConnection("jdbc:odbc:kmps"); Statement stat=conn.createStatement(); ResultSet rs=stat.executeQuery("select * from kmpls where username='"+x+"' and password='"+y+"'"); If (rs.next()==false){ z.println("<html><body> "); z.println("<center><b>Authentication Failure</b>"); z.println("  "); z.println("<h3>Try Again</h3></center>"); z.println("   "); z.println("</body></html>"); } Else{ z.println("<html><body>"); z.println("  "); z.println("<center><b>"+"Hello"+rs.getString("username")+"</b>"); z.println("<h3>You can Proceed</h3><center>"); z.println("   "); z.println("</body></html>"); } Conn.close(); stat.close(); } Catch(Exception e){ System.out.println("The error has been occurred"+e.getMessage()); } }	5	N	A	2	While extending Servlet	Ed
581	Which statement is missing to display the image on Servlet import javax.servlet.*; import java.io.*; public class image extends GenericServlet { public void service(ServletRequest req,ServletResponse res) throws ServletException,IOException { res.setContentType("image/jpeg"); PrintWriter pw=res.getWriter(); pw.println("<html>"); pw.println("</html>"); } }	5	N	A	2	pw.println("<img src='Sunset.jpg' width=600 height=800>");	Ed
582	Which statement is required instead of _____ <html> <body> <%@ page import= _____ %> Today is: <%= new Date() %> </body> </html>	5	N	A	2	java.util.Date	Ed
583	Which statement is required in order to complete the following program code? import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class HelloWorld extends HttpServlet { private String message; public void init() throws ServletException { message = "Hello World"; } public void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { response.setContentType("text/html"); out.println( <h1> + message + </h1>); } public void destroy() { // do nothing. } }	5	N	U	2	PrintWriter out = response.getWriter();	Ed
584	Which statement should be added to get the desired result? import java.servlet.*; import java.servlet.http.*; import java.io.*; public class RegisterSerlet extends HttpServlet { public void doPost(HttpServletRequest req, HttpServletResponse res) throws ServletException, IOException { string f1 = res.getParameter("First"); string l1 = res.getParameter("last"); res.setContentType("text/html"); PrintWriter PW = res.getWriter(); pw.println("The Entered Name Is" pw.close() } }	5	N	A	2	pw.println(f1 + " + l1);	Ed

585	Which statements should be written in the place of dotted lines to display output "Hello World" on web browser import javax.servlet.*; import java.io.*; public class ServletDemo extends GenericServlet { public void service(ServletRequest request,ServletResponse response) { try { ..... } catch(Exception e) { System.out.println(e); } } }	5	N	A	2	PrintWriter pw=response.getWriter(); pw.println("Hello World");	Ed
586	Which statement of servlet counts and displays the number of times it has been accessed since the last server reboot. Figure:- 	5	Y1	U	2	PrintWriter out = res.getWriter();	Ed
587	Which statement is missing at place marked as ***** import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class HelloServlet extends HttpServlet { public void service(HttpServletRequest request, HttpServletResponse response) throws ServletException,IOException { response.setContentType("text/html"); ***** pw.println("<b> Hello This is first servlet program"); pw.close(); } }	5	N	A	2	PrintWriter pw = response.getWriter();	Ed
588	Which tag is used to execute java source code in JSP	5	N	U	2	Scriptlet Tag	Ed
589	Which wrong method is used in following code import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class s extends HttpServlet { protected void GenericServlet(HttpServletRequest request,HttpServletResponse response)throws ServletException,IOException { response.setContentType("text/html"); PrintWriter pw=response.getWriter(); HttpSession session=request.getSession(); String id=session.getId(); pw.println("Session Id is: "+id); } }	5	N	A	2	GenericServlet(HttpServletRequest request,HttpServletResponse response)	Ed
590	With JSP tag is used to transfer for processing another JSP page	5	N	U	2	&lt;jsp:use:include&gt;	Ed
591	write missing statement in bellow code import java.io.*; import javax.servlet.*; public class Welcome servlet extends GenericServlet { public void service(Servlet request,Servlet Response) throws ServletException,IOException { response.setContentType("text/html"); printwriter pw=response.getWriter(); pw.println("<B>WELCOME TO SERVLET!"); } }	5	N	A	2	pw.close();	Ed
592	Write the comments on following statements: 1 res.setContentType("text/html"); 2 PrintWriter pw = res.getWriter();	5	N	A	2	1.Sets the content type 2.PrintWriter object that you can use to send character text to the client.	Ed
593	Write the method in the following code for adding cookies. import java.io.*; import javax.servlet.*; import javax.servlet.http.*; public class AddCookieServlet extends HttpServlet { public void doPost(HttpServletRequest request,HttpServletResponse response) throws IOException,ServletException { String data =	5	N	A	2	addCookie	Ed

	request.getParameter("data"); Cookie cookie = new Cookie("MyCookie",data); response._____(cookie); response.setContentType("text/html"); PrintWriter pw = response.getWriter(); pw.println("<b>My Cookie Has been set to : "); pw.println(data); pw.close(); } }					
594	You are creating a servlet that generates stock market graphs. You want to provide the web browser with precise information about the amount of data being sent in the response stream. Which HttpServletResponse methods will you use to provide this information?	5	N	A	2	response.setContentLength(numberOfBytes);  <span style="color: blue;">Ed</span>
595	Your web page includes a Java SE v1.5 applet with the following declaration: <object classid='clsid:CAFEEFAC-0015-0000-0000-ABCDEFEDCBA' width='200' height='200'> <param name='code' value='Applet.class' /> </object> Which HTTP method is used to retrieve the applet code?	5	N	U	2	Get  <span style="color: blue;">Ed</span>
596	_____ uses doGet(),doPost(),doHead,doDelete(),doTrace().	5	N	U	2	HttpServlet  <span style="color: blue;">Ed</span>
597	_____ this package responsible for following code Date date = (Date)hs.getAttribute("date"); if(date != null) { pw.print("Last access: " + date + " "); } date = new Date();	5	N	A	2	Import java.util.*; package  <span style="color: blue;">Ed</span>
598	_____ method of the request object is used to extract values of the input fields in a form when it is submitted ?	5	N	U	2	getParameter()  <span style="color: blue;">Ed</span>
599	_____ are JSP code fragments embedded within <% ...%> tags.	5	N	A	2	Scriptlets  <span style="color: blue;">Ed</span>
600	_____ method is used to Return the value of the Parameter named pname	5	N	U	2	getParameterName(pname)  <span style="color: blue;">Ed</span>
601	.....is first phase of servlet life cycle.	5	N	U	2	initialization  <span style="color: blue;">Ed</span>
602	Apache Tomcat is a _____.	5	N	U	2	Web server that is capable of running Java programs.  <span style="color: blue;">Ed</span>
